**What People in the field  
are saying about the  
NVSAT!**

---

- This is a tactical multiplier in the field.
- *This gives any squad the tactical advantage at night, I will NOT go without this in my kit.*
- If I would have had this tool years ago, while serving as a forward observer.
- Definitely designed by the user in the field.
- I use it on a regular basis on my hunting outings and new see what I have been missing at night.
- For such a minimal investment this product does what it claims to do.
