What People are saying about this product!

- My go to tool for setting up a scope for a client.
- If I would have had this tool years ago, I could have saved countless hours.
- This product takes the mystery out of ordering the right scope height rings the first time.
- I have been able to now set up clients that have mobility issues and fit them correctly the first time.
- I can take this tool with me to any location and know that within minutes order the correct rings for my client.
- Time is worth money to me. This product has saved me more time than any one product I have used in years.
