### Cryoskin Facial

1 Session      5 Sessions

Member      \$165      \$750

Retail      \$185      \$850

## Frequently Asked Questions

### When will I start seeing results?

Immediately! However, 3-5 sessions for CryoSlimming and CryoToning are recommended for best results.

### How long do the results last?

CryoSlimming results last as long as 6 months after the end of the treatment, while CryoToning and Cryoskin Facial results last for 4-5 weeks after the end of the treatment.

### How often can I get Cryoskin treatments?

Each treatment is different so each service requires a different amount of time between sessions. We recommend waiting 2 weeks between CryoSlimming sessions and 1 week between CryoToning and Cryoskin Facial Sessions.

### What can I do to prepare before each session?

For a CryoSlimming session, avoid eating sugar or carbo at least 2 hours prior to your sessions. For Cryoskin Facials, come with a clean face (no make up, or be aware you'll have to wash your face before your session. We also recommend drinking plenty of water before or after any treatment.

Device, Product or Service	Description	Price	
<b>Primary Neurofeedback and Biofeedback Training</b>			
<b>Consultations</b>	Review history in detail, identify plans and options, or other discussions and review of progress.	Per half hour	\$95
<b>Neurofeedback Sessions</b>	Appointments generally range from 30-45 minutes (includes discussions, training, setup/cleanup).	Regular Session	\$115
<b>HeartMath Session</b>	Helps individuals “reset” or recalibrate. Helps to get clients to live in the now. Reduces stress and overwhelm. Improvement with rapid heartbeats, reduces anxiety, drop in fatigue, improve focus, improve depression.	Regular Session Per half hour	\$35
<b>Brain Mapping</b>			
<b>qEEG brain map</b>	Identifies patterns that correlate with and/or contribute to symptoms related to learning disabilities, processing issues, concussions, ADHD, emotional/mood issues, anxiety, racing mind, difficulty quieting, developmental issues and self-soothing. Includes neurofeedback protocol recommendations that more accurately target the issue, often resulting in accelerated training success.	Initial map & written summary	\$795
		Optional follow-up map	\$595
<b>Auditory, visual and sensory processing map</b>	Sometimes used in addition to the qEEG brain map when visual or auditory processing issues are suspected, to guide more targeted neurofeedback training.		\$300
<b>Other Neurofeedback and Biofeedback Services</b>			
<b>Training Set up session</b>	Brain training and coaching services used together will add the set up cost of the cap and training equipment. .		\$25
<b>Alpha theta neurofeedback</b>	Helps with sleep, letting go of past emotional blocks, getting off alcohol and quieting the mind. Enhances creativity, self-esteem and peak performance. Sometimes called the “doorway to the subconscious.” This includes cap and set up cost.		\$120 (up to 45 minutes)
<b>Cognitive Testing (CNS)</b>			
<b>Testing: Cognitive/Memory/Attention Screening</b>	This baseline computerized test assesses performance in memory, executive function, processing speed and attention. Provides well-validated test results comparing you to others in your age group.		\$100
<b>Cancellation Policy</b>			
<b>Cancellation fee</b>	Fee for missed appointments and cancellations with less than 24 hours’ notice		\$150
