

PLAYER NAME
MOLLY FRAZIER

CLASS
-

HANDEDNESS
LEFT

E-mail:
frazier.e@gmail.com

Age:
16

State:
United States

High School:
-

Height:
5' 6"

Weight:
143 lb

Coach:
Corey Mathis

Organization Name:
AZ Storm

STRIKE ZONE HEATMAP

RELEASE HEIGHT

Vertical height above the ground at the point the pitch is released.

RELEASE SIDE

The distance from the center of the rubber at the point of release from the pitcher's POV where the right is a positive number and the left is a negative number.

HARD HIT

Any ball hit within 12.5% of a player's Max Exit Velo.

RELEASE ANGLE

Vertical angle of the ball leaving the pitchers hand where up is positive (higher pitches or pitches with a large amount of negative vertical movement) and a downward angle being negative (pitches lower in the zone or traditionally higher positive vertical break).

HORIZONTAL ANGLE

The Directional degree when the ball leaves the pitchers hand where to the left is negative and the right is positive from the Pitcher's POV. Traditionally, all RH P's have a negative angle and LHP's have a positive angle to varying degrees.

STRIKE ZONE BREAKDOWN

Heart of Plate: Batter wants to Swing, pitcher wants him to Take

Shadow Zone: 50/50 on pitch called either way

Chase Region: Batter wants to Take, pitcher wants the Swing

Waste Area: 1+ foot off edge of strike zone
