Peterson Equipment Company, Inc.

Charles "Pete" D. Peterson, Jr.

In 1965, Charles "Pete" D. Peterson, Jr. invented a device to help utility people quickly take pressure readings. With the support of his wife, Bonnie, and children, he decided to become an entrepreneur to fulfill a need in the natural gas and HVAC industry. Pete started designing and manufacturing the plugs in his garage and ran the business from a small table in his master bedroom. The business quickly grew and in 1969 Pete formed his own company, Peterson Equipment Co., Inc. to design, develop, and produce pressure and temperature test plugs.

Pete's inventions include the most popular pressure and temperature reading plugs used today with a $\frac{1}{8}$ " NPT brass housing. This Pete's Plug® allows for the use of a $\frac{1}{8}$ " diameter pressure needle to be used without becoming bent or clogged like other standard needles. Importantly, the Pete's Plug® also has two self closing valves for rapid sealing upon removal of the needle or temperature probe. A second plug was developed with a $\frac{1}{2}$ " NPT housing that would allow pressure & temperature readings using a bi-metal thermometer. Pete strengthened his original design with a simple but important feature of a rubber strap to keep the plug cap attached to the plug body for easier and longer use out in the field.

The Pete's Plug® is offered in brass and stainless steal with nordel and neoprene. The Pete's Plug® is used by the Natural Gas & Hydronic Industries as well as in numerous other applications. Thanks in part to our wonderful sales representatives around the world, the sales of the Pete's Plug® are over 40 Million units in the last 55+ years and is the standard pressure or temperature test plug used by many companies and industries throughout the world. Today, the Pete's Plug® and all Peterson Equipment Co., Inc.'s products are manufactured by hand. The products are produced in the United States of America. Our main plant is located in Katy, Texas. Pete's company is still a family

The Pete's Plug®

In general, the Pete's Plug® is a time and money-saving device which is well-suited for most plant and pipeline systems and is designed to eliminate gauge cocks and thermometer wells. Hot and chilled water systems, heat exchangers, pumps, differential readings, air, gas lines and numerous other applications are only a few of the areas where the Pete's Plug® are presently being used.

Pete's Plug® will allow you to take pressure and temperature readings quickly and eliminate the need for leaving costly gauges or temperature indicators on the line. Depending on the application, the Pete's Plug® can be operated to a maximum of 1,000 PSI and 200° or 275°F (93°C or 135°C) for neoprene or nordel respectively. A maximum working pressure of 1,500 PSI can be obtained within the temperature ranges of 140° to -20°F (60°C to -29°C) within reasonable time frame to return the cap for a securely

The enhanced version of Pete's Plug® is still the only pressure and temperature test plug with two self-closing valves, but the valves are improved, which speeds valve closure.

HOW TO OPERATE | The Pete's Plug® is permanently installed in the line at recommended test points. The cap protects the valve and provides an additional seal. After the cap has been removed, either a test thermometer or a gauge can be inserted through the two self-closing valves in the Pete's Plug®. Readings are made and adjustments or tests can be accomplished when the probes are withdrawn and the two valves close. The protective cap is then reinstalled. Tests should be made as quickly as possible since the valve reseal time is dependent upon time of insertion, time and pressure. Slower

Pressure Gauge Adapters

The pressure gauge adapter has a probe constructed of 304 stainless steel. The probe is 0.156" in diameter and extends 2" on the standard adapter and $3\frac{1}{2}$ " on the extra long adapter.

Also, the 1/8" diameter probe operates in any Pete's Plug® besides #12500, #12510 and XL length Pete's Plugs®. Please note that the #500XL gauge adapter will operate any of the Pete's Plugs® with the exclusion of the #2510
