PRESS RELEASE

Tractor-Trailer Rollover Involving Hazardous Materials

At approximately 4:16 AM on November 2, 2026, the Claremont Fire Department responded to the intersection of North and Main Streets for a reported tractor-trailer rollover.

The initial response included Ladder 1 and Rescue 1. While enroute, responding crews were advised that the tractor-trailer was transporting hazardous materials.

Upon arrival, crews quickly determined that the lone occupant of the tractor-trailer had self-extricated and sustained no serious injuries.

Further investigation identified the hazardous material being transported as Compressed Natural Gas (CNG). Crews immediately established an isolation zone and conducted an assessment of the containers. It was determined that the containers had not been compromised and there was no active release of hazardous materials.

At the time of this press release, fire department personnel remain on scene as efforts continue to safely manage the incident.

Main Street remains closed in the area of Citizens Street and North Street.

James Chamberlain
Chief of Department
