

DanverTM

Who We Are

Danver Stainless Outdoor Kitchens is the leader in high-performance stainless steel outdoor kitchens. We continue to lead the way in bringing color, style, design, and function from the indoors to the outdoors, perfecting our approach to transforming outdoor living spaces.

As the industry standard, we offer hundreds of sizes, dozens of styles, a variety of appliance applications, and an expansive palette of award-winning powder coat finishes.

We are happy to be your personal resource on your design journey. Let us bring your dream outdoor kitchen to reality.

Why Denver

With over 20 years of innovation, Denver Stainless Outdoor Kitchens cabinetry is manufactured with 100% environmentally friendly stainless steel and made to order in the USA.

Our powder coat finishes enhance the beauty of our cabinetry while reducing maintenance to a bare minimum. For the luxurious feel that is complementary to indoor kitchen drawers, all our drawers feature double wall construction and full extension under-mount soft-close/self-close technology. Our cabinets come standard with magnetized closures and gaskets, with soft-close door hinges.

With a line of cabinetry sizes in 3" increments from 9" to 48", including ADA-compliant cabinetry, Denver's outdoor cabinetry can house virtually all outdoor appliances, helping to create a complete outdoor entertaining experience.

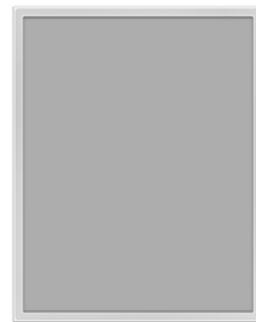

Design & Durability

Outdoor living is about more than just personal style and atmosphere; it's also about function and longevity. Denver Stainless Outdoor Kitchens are designed and engineered for longevity, regardless of geography, climate or weather conditions.

Denver puts style and function first. Our exclusive stainless steel door styles and drawer fronts provide strength and durability while ensuring function and beauty are never compromised.

Color Options

Danver offers a comprehensive color palette that includes bright and neutral colors, metallics, textures, and wood grain powder coat finishes. With our color collection, designing a personalized outdoor kitchen that showcases individual style and taste is easy.

In addition to providing an attractive appearance, our powder coat finishes reduce maintenance to a bare minimum. Selecting outdoor rated, UV-resistant powder coat finishes ensures the look you want is the look you will have for the lifetime of your kitchen.

Urbane

Designed by international architect and designer Daniel Germani, Urbane draws inspiration from heritage-style European kitchens to bring timeless, sophisticated design to the outdoors.

The collection's careful attention to detail offers visual contrast through a blend of traditional stainless steel and powder-coated panels, empowering design professionals to create outdoor kitchens to fit any footprint, style and function. In keeping with Denver's standards, Urbane offers options to integrate a sink, appliances, and other components.

Cosmopolitan Collection

Danver's new Cosmopolitan Collection offers a fresh, minimalist approach to outdoor cooking, entertainment, and storage. This collection is set apart for its versatility in spaces with size restrictions or other limitations that require stylish, ergonomic solutions.

Consisting of the Cosmopolitan Kitchen, Tables, and Buffets, each offering in the Collection is purpose-driven to meet your unique needs. Cosmopolitan Tables are available with or without casters, and ADA compliant sizes are also available.

Beyond the Cabinets

Danver can accommodate nearly all outdoor appliances – grills, power burners, griddles, smokers, and more – into your design. Our attention to detail guarantees a seamless fit for your favorite appliances.

For an all-inclusive space, include amenities like a trash, sink, fridge, kegerator, wine cooler, and ice maker. The design possibilities are almost limitless, making Danver the top choice for all of your outdoor living spaces.

We work with a variety of high-end appliance brands for the best in design and function.

Trades & Professionals

Today's home buyers are looking for function, design, and durability in their outdoor entertainment spaces. From single family homes to large multi-family complexes, entertainment spaces with outdoor kitchens increase the value of your project. Since our inception, Denver has been partnering with architects, landscape architects, designers and builders to create luxurious outdoor kitchen solutions for their clients.

Multi-Family & Hospitality

In a constantly shifting environment, Denver sets the pace for innovative solutions. We have engineered products that guarantee accessibility for all in multi-family, senior living, educational, hospitality, and commercial applications.

Our cabinetry is suitable for virtually every climate and application, including poolside and rooftops. Discover the benefits of designing an attractive amenity space with a luxurious outdoor kitchen.

Post & Panel System

Our pioneering Post and Panel System (PPS) is a robust, cost-effective solution designed for multi-family common areas. The PPS has the same durability and aesthetics as our traditional stainless steel cabinetry without the unnecessary storage space.

The PPS is a skeletal system that provides countertop support and extended workspaces, as well as removable panels that are easy to clean and replace. PPS projects are shipped flat and ready for installation, creating a stress-free and attractive solution for multi-family projects.

Gas Timer Shutoff

Shutoff timers are perfect for use in multi-family, commercial, and other common space projects where gas usage maintenance is needed.

Designed to replace a manual shutoff valve, this mechanical timer controls gas flow for natural gas and propane appliances.

Sustainability

Danver Outdoor Kitchens blends design and sustainability through durable, recyclable stainless steel, offering long-lasting performance with minimal maintenance. Eco-conscious powder-coat finishes add protection with low VOC emissions, enabling sophisticated colors, bold architectural tones, or realistic wood grains without relying on materials that deteriorate outdoors. By accommodating nearly every outdoor appliance—including efficient induction technology—Danver Outdoor Kitchens empowers homeowners to create refined, environmentally responsible outdoor spaces that deliver beauty, durability, and energy-smart performance for years to come.

Design

Visit danver.com for cabinetry and production details, as well as a variety of design tools and libraries of our cabinets in 2020, CAD, REVIT, SketchUp, and other professional design formats.
