

# Q & A

Q: How did you find mentors?

A: I just asked for people I respected if they would be willing to mentor me.

Q: How do you know which battle is important?

A: You need to evaluate if the issue aligns with your values and the significance of the outcome.

Q: How were you get introduced computer science?

A: I took a computer course during high school and did programming on punch cards. During college, I took courses in computer systems, electrical engineering and etc. I learned during my career that information flow is just as important as materials flow in manufacturing. Information provided basis for decision making.
