

Back-office Outsourcing

A school's core competence is its academic excellence and integrity. A private school has the added pressure of customer service and managing the operation as a business.

Resalico can help with the business pressure by creating economies of scale and financial (P&L, BS, cashflow) efficiencies:

- Full audit of back-office functions and business processes
- Develop strategies to maximise efficiency and value
- Create qualitative management reporting to stakeholders
- Maximise marketing value-add.
