

Viewcrest Village Community Garden

Harvest Outreach Program

The Harvest Share Program is designated for Viewcrest Village Residents with limited mobility (ie: elderly, handicap limitations) who wish to participate in the Community Garden but are unable to do the physical activity that involves growing their own vegetables.

By signing-up for the Harvest Share Program, Residents can receive fresh vegetables during the harvest times. There is a limited amount of time for this program. If you are interested please sign-up early to guarantee a spot. This is a free program and is first come first served.

When you choose to sign-up for the Harvest Share Program you will be informed on the website with updates on how the harvest is coming along, which vegetables will be available.

Enrolling in this program can save you money and reap the rewards of fresh vegetables without the high cost.
