SEQUENCE OF OPERATIONS FOR ALL OPERABLE SYSTEMS

Note: This sequence of operations is intended for screen mount safety requirements. Always consult the manufacturer's instructions and applicable safety standards for detailed procedures.

1. Power-Up Sequence:
   - 1.1. Verify Power: Ensure that all power sources are disconnected.
   - 1.2. Mount Safety Sensor: Securely mount the safety sensor to the screen, ensuring it is properly aligned and positioned to detect the intended object.
   - 1.3. Connect Wiring: Connect the safety sensor's wiring to the control system, following the manufacturer's instructions.
   - 1.4. Power Up: Apply power to the system.
2. System Initialization:
   - 2.1. Safety Sensor Calibration: Calibrate the safety sensor according to the manufacturer's instructions to ensure accurate detection.
   - 2.2. Control System Configuration: Configure and interface with existing Creston control system to recognize the safety sensor input and respond appropriately. Provide additional conduit pathway and wiring as required for control system operation.
   - 2.3. Safety Interlock Configuration: Provide and configure any safety interlocks or emergency stop devices to work in conjunction with the safety sensor.
3. Normal Operation:
   - 3.1. Object Detection: When the safety sensor detects the intended object (e.g., a person, machine part), shall send a signal to the control system.
   - 3.2. Control System Response: The control system processes the signal and takes appropriate action, such as:
     - 3.2.1. Stopping or pausing the system.
     - 3.2.2. Preventing hazardous motion.
     - 3.2.3. Enabling a safe mode of operation.
   - 3.3. Operator Interaction: The operator can interact with the system as needed, following established safety procedures.
4. Emergency Stop:
   - 4.1. Emergency Stop Activation: If an emergency situation arises, the operator can activate the emergency stop button or device.
   - 4.2. System Response: The control system immediately stops all hazardous motion and deactivates the safety sensor.
   - 4.3. Reset Procedure: Follow the manufacturer's instructions for resetting the emergency stop and restarting the system.
5. Important Safety Considerations:
   - 5.1. Maintenance: Follow the manufacturer's recommended maintenance schedule for the safety sensor and control system.
   - 5.2. Training: Provide adequate training to operators on the proper use and operation of the safety sensor and emergency stop procedures.
   - 5.3. Compliance: Ensure that the safety sensor installation and operation comply with all applicable safety standards and regulations.

GENERAL NOTES

1. PROVIDE ACOUSTICAL SOUND MASKING PADS, LOWRY OR EQUAL, FOR ALL OUTLETS INSTALLED AT AUDITORIUM.
