

1. Who We Are

Ability Finance is a boutique financial services firm with presence in Brazil and Israel, dedicated to bringing Brazilian institutional investors closer to the most advanced and strategic sectors of the Israeli innovation ecosystem — Biotechnology, Defense, Artificial Intelligence, and Deep Tech.

We work with precision, discretion, and curated analysis. We are selective by principle, and dedicated by philosophy. We combine technical depth, direct relationships with Israeli fund managers, and a boutique approach centered on the institutional investor.

2. The Opportunity

The Brazilian market increasingly seeks global diversification with depth, quality, and strategic clarity.

Israel offers exactly that: global leadership in innovation, a mature technology ecosystem, structural advances in AI, Defense, and Biotech, consistent governance, and USD-based investments with low correlation to Brazilian cycles.

Our mission is to transform this opportunity into a clear, accessible, and institutionally secure path for Brazilian investors.

3. The Purpose of Ability Finance

Ability Finance was created to enable, with excellence, the connection between two highly complementary worlds: Brazil's sophisticated capital and Israel's strategic innovation.

We offer local presence in both countries, direct relationships with high-level managers, clear and reliable processes, deep cultural and technical understanding, and structured communication designed for the Brazilian institutional market.

4. Why Israel Makes Sense

Israel is one of the most dynamic and resilient innovation ecosystems in the world.

For institutional investors, it offers exposure to sectors with strong global demand, proprietary innovation, USD-denominated investments, low correlation with traditional assets, and structural solidity. It is a source of balance, innovation, and intelligent diversification.

5. The Pillars of Ability Finance

High-Precision Boutique: rigorous curatorship, deep selection, and individualized attention.

Strategic Access to the Israeli Ecosystem: direct relationships, geographic proximity, technical understanding, and connection with top-tier managers.

Relationship, Transparency, and Professional Elegance: clear communication, continuous follow-up, trust, integrity, and discretion.

6. What We Do

Manager Selection and Curatorship: choices based on governance, track record, specialization, and robustness.

Institutional Facilitation: clear, technical information and processes adapted to Brazilian standards.

Education and Contextualization: objective explanation of rationales, sectors, and thesis.

Monitoring and Relationship: continuous presence before, during, and after the process.

7. The Strategic Moment

Brazil is undergoing a new cycle of institutional investor sophistication.

Israel is experiencing strong technological acceleration and opportunities in essential sectors.

Ability Finance is positioned exactly at the point where these two movements converge.
