

# Capability Statement

# WestScope Infrastructure

Built for Industry, Driven by Results & Focused on Best Practice.

“Focused on Best Practice” underpins every aspect of our operations — from detailed Scopes of Work through to safety, execution, and workmanship on every project.

WestScope Infrastructure delivers turnkey solutions across complex projects, alongside routine maintenance supported by digital asset reporting and tracking, ensuring full visibility and integration between client, asset and contractor.

With a fully owned fleet of specialised plant and equipment, we are equipped to deliver reliably, efficiently and without compromise.

Industrial & Commercial Plumbing

Fire Protection

Pump Systems

Commercial Gas Fitting

Process & Non-Process Infrastructure

Boosted Flow Testing

# Who We Are

WestScope Infrastructure delivers installation, reactive and preventative maintenance, construction services and asset upgrades across critical services including industrial plumbing and piping, commercial gas, fire protection and pump systems.

We operate across industrial, commercial, mining and rail sectors, supporting high-performing assets in complex and live environments. Our team is experienced in adapting to diverse site conditions, operational constraints and compliance requirements, always ensuring safe and efficient project delivery.

We specialise in technically demanding, high-risk and critical works where precision and experience are essential.

We possess the necessary desire & drive to work alongside clients to deliver project outcomes we are all proud of, whether it be installation of new assets, or critical breakdown response.

WestScope Infrastructure maintains full ownership of specialised plant, equipment and tooling, providing complete control over delivery, quality and scheduling. This ensures rapid mobilisation, minimal downtime and the ability to respond at short notice, without reliance on third-party hire or availability constraints.

## Our People and Our Operations

WestScope Infrastructure is underpinned by well-established systems and disciplined processes, supported by an efficient administrative team and led by a working director actively engaged in project delivery. Our tradesmen and apprentices are trained to the highest standard and operate at the leading edge of industry practice, ensuring precision, consistency and performance across all works.

We are passionate about building the future of the trade, with a strong focus on training and mentoring young apprentices. We are committed to supporting their development both professionally and personally, creating a pathway for long-term careers while strengthening the capability of the industry as a whole.

WestScope Infrastructure places strong emphasis on clear communication and thorough reporting throughout every stage of engagement. Our structured reporting provides accurate, detailed and timely information, ensuring clients have full visibility of asset condition, works undertaken and any recommended actions, supporting informed decision-making and ongoing asset performance.

This also ensures when we are engaged for any works, your finalisation of documentation and project success is achieved quicker, and we are very proud of the result.

# Capabilities & Services

## Industrial & Commercial Plumbing

- All plumbing & piping infrastructure projects, maintenance and breakdown support.
- Installation & Maintenance of assets site wide
- Pump System Installation & Maintenance

## Fire Protection

- Civil Pipeline Installations
- Steel Pipeline fabrication & Installation
- AS1851 Testing & Maintenance
- Diesel mechanical breakdown and rectifications / servicing
- End To End complete system installation and commissioning

## Boosted Flow Testing

- Independent Third Party commissioning service
- Fire Appliance with High Rise capabilities & digital pressure control
- Ultraonic Flow Metering, Flow Tubes & Nozzles
- Thorough, preferred Reporting

## Commercial Gas Services

- Service & Breakdown rectification of commercial gas equipment
- OEM Trained and Parts supplied
- Gas Engineering / System design or audits completed
- Commercial Equipment Supply & Installation

## Diverse Company Skillset

- We possess what we believe to be one of the most diverse skillsets across multiple industries.
- WestScope actively aims to deliver across plumbing, piping, pumping, fire protection, commercial gas and general site services to offer our clients a wide range in one place, as well as thoroughly enjoying the fields in which we operate.
- Our staff thrive in industry environments that provide opportunity to deliver, and adapt to the ever-changing site scenarios, parameters and expectations.
- Fully equipped and deployment-ready, WestScope Infrastructure's workshop is stocked with the plant, equipment and materials required for immediate mobilisation – enabling rapid response and uninterrupted delivery.

# Project coverage

WestScope Infrastructure have had the honour to be involved in some projects fundamental to vast Industry Performance throughout the state. We have approached every project with enthusiasm and with the common goal in mind, deliver the best result, form great relationships and be proud of what we achieve.

## Atlas Image Resources

FIRE PROTECTION & PLUMBING // MINING

- Supply & Installation of In Ground & Above Ground site wide fire system
- Installation of Pumps & Tanks infrastructure
- Hydrostatic & Flow Testing
- HDPE & Steel Pipework Fabrication
- Compound Plumbing Services (Potable & Non-potable water)
- Deep Sewer & Septic System Design & Installation

## High Rise Ratio Valve Replacements

INFRASTRUCTURE // HIGH RISE BUILDING

- Isolation & Removal of existing valve train sets
- Pipework adaption, welding and fabrication
- Engineering, supply & installation of Pressure Reducing Valve Stations
- Flow Testing & Commissioning
- All works conducted in a live hotel environment

## Christmas Island Phosphates

FIRE PROTECTION // MINING

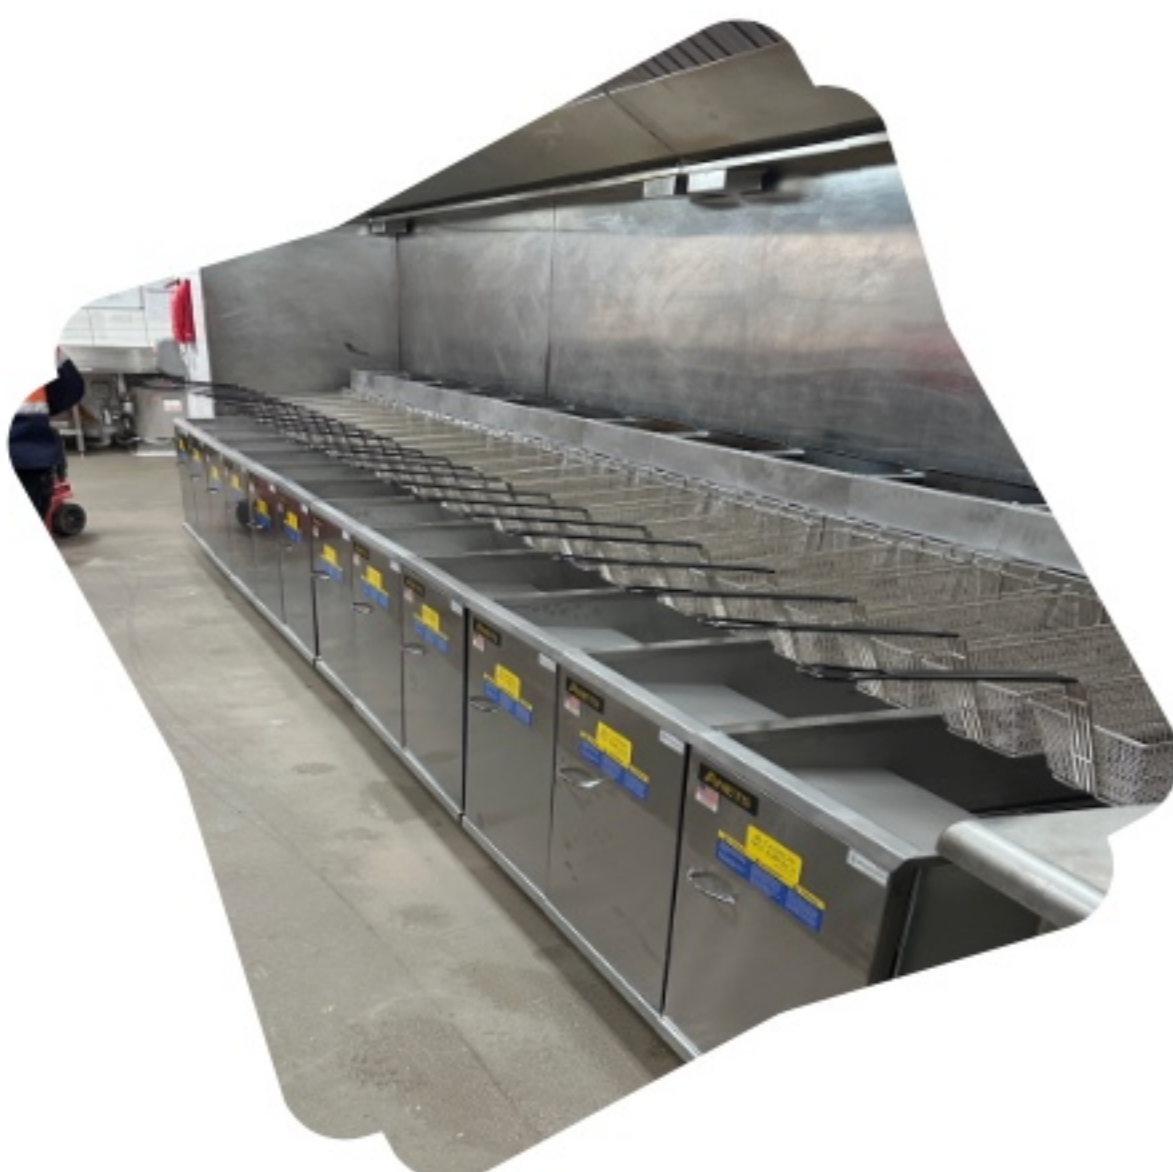

- Supply & Installation of Wet Fire Service to Christmas Island Phosphates Dryer mine site location
- Offshore management of materials, plant, equipment & labour
- On-site fabrication & site-ran pipework
- Commissioning services
- Pump Compound sprinkler system installation

## Optus Stadium

COMMERCIAL GAS FITTING // HOSPITALITY

- Offsite fabrication of gas service manifolds & pre-piping of appliances (75x Deep Fryers)
- On site disconnection and removal of existing appliances
- Supply & Installation of new triple bank fryer sets
- Commissioning as required and handover

# Continued Project coverage

WestScope Infrastructure have had the honour to be involved in some projects fundamental to vast Industry Performance throughout the state. We have approached every project with enthusiasm and with the common goal in mind, deliver the best result, form great relationships and be proud of what we achieve.

## Covalent Lithium Deluge System

FIRE PROTECTION // MINING & REFINING

- Supply & Installation of deluge system for lithium charging station
- On-site fabrication and installation of High Level steel pipework
- Works Scope delivered in a live refinery environment

## Third party fire system commissioning (ongoing – multiple sites & clientelle)

FIRE PROTECTION // VARIOUS

- WestScope attend and conduct Boosted Flow Testing, Pump Duty Testing and reports
- Sites range from commercial construction to government, industrial, hospital and high rise facilities
- Private Channel communication on site ensures efficiency and safety unparalleled
- Services offered to all Fire Protection & Plumbing professionals

## Pump Station Upgrades

PLUMBING & INFRASTRUCTURE // RAIL

- Breakdown Response to failed pump station for critical Rail Infrastructure site
- Cherne Plug management of live sewer network
- Included Supply & Installation of new SEG Pumps & hardware
- Fabrication & Supply of new discharge pipework and valve chamber manifolds
- Conducted on live site operations

## Golden West Bakeries

PLUMBING & SERVICES

- Installation & commissioning of new Process Water Services for industrial bakery manufacturing systems
- New compressed air services supplied and installed
- Stainless Steel fabrication of bespoke items for seamless project delivery

## Areas Serviced

WestScope Infrastructure provides statewide service coverage across Western Australia, supporting assets in the metropolitan, regional and remote locations.

With the capability to mobilise labour, plant and equipment, we deliver both Planned and Reactive works across mining, industrial, commercial and rail sectors, regardless of location or logistical complexity.

## Assets, Plant & Equipment

- Site compliant vehicles
- Tilt Tray Truck
- Excavator w/ buckets & rotating grab attachments
- Telehandler w/ fork, bucket and jib attachments
- Remote Operations Workshop Sea Container
- Fire Appliance w/ Waterous CMU Pump
- Hydrostatic Testing Equipment
- Flow Testing Equipment including tube type and digital
- Clamp on ultrasonic flow measuring equipment
- Annubar Flow Testing Equipment (Digital)
- Roll Grooving Equipment
- Threading Equipment
- Bandsaws, Hydraulic Pipe Cutters etc.
- Electrofusion Welding Equipment
- Butt Fusion Welding Equipment
- Tracer Gas Leak Detection Equipment
- CCTV Pipeline Inspection Equipment
- Hydro-jetting Equipment
- Confined Space Entry tooling
- Atmospheric Gas Testing tooling
- Specialised Lifting Equipment, gantries etc.
- R.O.V subsea vehicle
- Forklift
- Road, ring & wet saw cutting Equipment
- Site Lighting
- Mag Drill & steel working tooling
- Pipe Freezing Liquid Nitrogen tooling
- Trash Pump
- Compactors (Plate & Jumping jacks)
- Generators
- Laser Cleaning Unit
- Compressors
- Copper & Stainless Tube Press Tooling
- Backflow Test Equipment
- Cherne Drain Plugging Equipment
- Hydraulic Hose Crimper
