IX. **Information Items:**

   a. **State Fair Report:**

   Because this is less than 30 days after the Fair, Mr. Paluszak gave a high-level report regarding the Fair. Council can expect a more complete report regarding the Fair at the October 24th, 2019 meeting. 2019 was as a very successful year. There was a slight dip in attendance due to two very hot days, but overall the fair was up in almost all revenue categories. Financial reports will take 60 to 90 day to reflect all the data from the Fair. Several world events happened just prior to the Fair that the management team addressed, as well as feedback received that people were reluctant to attend fairs or other large events. Within a few weeks prior to the Fair there were several mass shootings nationally including at a festival, a recent e-coli incident at a fair resulting in multiple cases and one death, and other current events that caused concerns. The Oregon State Fair responded to those concerns in several proactive ways and made several operational changes that were appreciated by our guests and successful.
X. Action Items

a. State Fair Council

i. Discussion and action regarding contracting for services to prepare a site and building condition assessment for state-owned properties leased by the Oregon State Fair Council.

Mr. Paluszak began by providing the background of this item: During development and approval of the 2019 Oregon State Fair & Expo Center (OSFEC) budget, the Council committed to a contingency item of $300,000 to fund a campus-wide site and buildings conditions assessment of state-owned real property leased by the Oregon State Fair Council (OSFC). This was budgeted as a contingency item in the event that state funding was not made available for this purpose, as was being requested.

The 2019-21 state budget includes bond funding for the benefit of OSFEC for restoration of the Poultry and Stadium historic structures restoration ($5 million), and for certain facility-wide projects ($5.325 million). The granted state funding did not include funding, as requested, of $300,000 for the site and building conditions assessment.

We sought and received two proposals for the facilities condition assessment from firms with experience doing such work. Enclosed is the proposal from LRS Architects, a Portland design firm. They are familiar to us and have provided design services to OSFEC in the past.

Management believes LRS best meets our needs for this assessment for the following reasons:

1. The LRS cost proposal is roughly 25% lower than that of the other proposer, and far more encompassing and inclusive with regard to scope of work
2. The LRS proposal is far more detailed and complete
3. The LRS proposal incorporates and fully details their proposed work on the Poultry and Stadium facilities
4. The LRS proposal includes a full cost breakdown including cost of services by their sub-consultants
5. The LRS proposal includes a detailed project schedule
6. LRS has developed a “rating system” for OSFEC facilities

Mr. Paluszak explained that their proposal is for a not to exceed amount of $251,218, which is within the amount budgeted of $300,000 to conduct the site and building condition assessment. Additionally, OSFEC’s internal costs for managing, coordinating and facilitating the work to be performed is estimated at approximately $48,000, bringing the total project cost to within the amount budgeted.

Mr. Paluszak then introduced Steve Mileham and Gail Sargent of LRS who gave a presentation regarding the firm and their consultants, projects they have done, and the work proposed should they be chosen to do the site and building condition assessment for OSFEC.

Action: Following discussion a motion was made by Vice Chair Cameron and seconded by Council Member McGuigan to approve contracting for services to prepare a site and building condition assessment for state-owned properties leased by the Oregon State Fair Council with LRS Architects in an
amount not to exceed $252,000 as the first phase of long-term capital development, upgrade and historic preservation of the property; and to put forth the project as a capital project if at all possible.
