CLIMATIC CONTROL
TECHNICAL WORKS LLC

Art of Automation

Optimize Your Machine

We are Authorized Distributor of Delta Products in UAE
Climatic control is Leading Trading and system integrator Automation Company in factories and HVAC Industry With long experience in Industrial Automation in Egypt and GCC.

Our mission is to provide efficient economic solutions for industrial automation projects and machine retrofitting.

Our Vision is to be leader of Industrial Automation solution in UAE and GCC.

INNOVATION AND CUSTOMIZATION TO ACHIEVE EXCELLENCE
Climatic Control range of solutions reflects mission and vision of the company: design, develop and manufacture products, applications and engineering solutions to satisfy the need for technological innovation, flexibility and competitiveness of the market.

Capitalize on the experience gained and share it with strategic and technology partners.

All of these resources allow Climatic control to acquire specific technical skills and then integrate them into multidisciplinary projects. The three areas of business co-exist and complete each other in order to provide a global coverage of the market.
15 years of experience in the Factory Automation, Motion control, energy, oil & gas and water treatment sectors enable Climatic control to present itself as a complete and perfect partner for the development of industrial engineering.

**Applications**
- Factory Automation
- HVAC Automation
- Building Automation
- Elevator
- Motion Control
- Energy Saving

**Industria Automation Products**
- VFD
- PLC
- HMI & SCADA
- Servo
- Sensors
- Field Devices

**Machine Retrofitting**
- Upgrade Machine from relay control to PLC.
- Upgrade old PLC’S to new One.
- Programming (Siemens – Omron-delta-Mitsubishi-LSIS – Schneider …etc).
CP2000 and CFP2000

For fan and pump applications
C2000

Vector Control Drive
For General Drive Controls
SLIM PLC
Mid-Range PLC
Modular PLC
User interfaces for smart information management
Many “smart factories” have recently chosen Climatic Control. Large and small industrial companies have decided to invest in automation systems and industrial robotics, relying on a partner with international experience, always by their side.

Every industrial automation sector can find a valuable partner in Climatic control. The concept of industry 4.0 is now a priority for all those companies, from the manufacturing to the processes undertaken to improve efficiency and effectiveness. Climatic control offers innovative and tailored solutions for plant intelligence to enhance the productivity and profitability of the companies.
