ANTIBIOTICS

DUFA-PENSTREP

**Benzylpenicillin procain 200,000 IU
Dihydrostreptomycin sulphate 200mg**

Penicillin is a bactericidal against penicillin-susceptible microorganisms. Streptomycin is an aminoglycoside antibiotic with bactericidal activity against both gram-negative and some gram-positive bacteria. Penicillins and aminoglycosides act synergistically.

Dosage Recommended:

- Horse, cattle: 1 ml per 20 kg body weight per day for up to 5 days
- Calves, swine, sheep, goats, dogs and cats: 1 ml per 10 kg body weight per day for up to 5 days

DUF AFUR 5% **Ceftiofur (as HCl) 50mg**

Ceftiofur is a cephalosporin antibiotic with bactericidal activity against both gram-positive and gram-negative bacteria.

Dosage Recommended:

- Cattle: 1 - 2 ml per 50 kg body weight per day - 2 mg ceftiofur per kg body weight
- For respiratory disease on 3 - 5 consecutive days
- For foot rot on 3 consecutive days
- For metritis on 5 consecutive days.
- Swine: 1 ml per 10 kg body weight per day on 3 consecutive days.

DUFAFLOR 30% **Florfenicol 300mg**

Florfenicol is a synthetic broad spectrum antibiotic effective against most gram-positive and gram-negative bacteria isolated from domestic animals.

Dosage Recommended:

- Cattle, IM route: 1 ml per 15 kg body weight, twice 48 hours apart
- Cattle, SC route: 2 ml per 15 kg body weight, single dose
- Swine, IM route: 1 ml per 20 kg body weight, twice 48 hours apart

DUF AFLOXACIN 10% **Enrofloxacin 100mg**

Enrofloxacin is a fluoroquinolone antibiotic with bactericidal activity against both gram-positive and gram-negative bacteria as well as Mycoplasma spp, Chlamydia spp. and Rickettsia spp.

Dosage Recommended:

- 1 ml per 40 kg body weight per day for 3 days In severe cases of respiratory infections and salmonellosis: up to 2 ml per 40 kg body weight per day for 3 days (swine) or 5 days (cattle)

DUFAMOX-G 150/40

**Amoxicillin trihydrate 150mg
Gentamicin (as sulphate) 40mg**

Amoxicillin is a beta-lactam antibiotic with bactericidal activity against gram-positive and gram-negative microorganisms.

Dosage Recommended:

- 1 ml per 10 kg body weight per day for 3 days
- Cattle: should not exceed 20 ml
- Swine: 10 ml,
- Sheep and goats: 5 ml in at any one injection site.

DUFAMOX 15% LA **Amoxicillin (as trihydrate) 150 mg**

Amoxicillin is broad spectrum semi-synthetic penicillin with bactericidal activity against a wide range of gram-positive and gram-negative bacteria

Dosage Recommended:

- Dogs and cats - 1ml per 10kg
- Cattle - 20 ml
- Swine - 10 ml
- Sheep and goats - 5 ml

VITAMINS, HORMONES AND ANTI-PARASITIC

DUF AVIT AD3E 80/40/20

**Retinyl palmitate (A) 80,000 IU
Cholecalciferol (D3) 40,000 IU
α-Tocopherol acetate (E) 20mg**

Vitamin A, D3 and E are essential for optimal growth and production.

Dosage Recommended:

- Cattle, horses: 10 - 20 ml
- Calves, foals: 5 ml
- Swine: 5 - 8 ml
- Piglets: 1 - 3 ml
- Sheep, goats: 4 ml

MULTIVIT

**Retinyl palmitate (A) 50,000 IU
Cholecalciferol (D3) 25,000 IU
α-Tocopherol acetate (E) 4mg
Thiamine HCl (B1) 2.5mg
Riboflavin sodium phosphate (B2) 2.1mg**

**Pyridoxine HCl (B6) 1.25mg
Cyanocobalamin (B12) 0.03mg
Ascorbic acid (C) 2mg
Nicotinamide (B3) 12.5mg
Dexpanthenol (B5) 3mg**

Treatment and prevention of vitamin A, B1, B2, B3, B5, B6, B12, C, D3 and/or E deficiencies in cattle, horses, sheep, goats and swine, particularly in times of illness, convalescence and general unthriftiness.

Dosage Recommended:

- Horses and cattle: 8 - 12 ml
- Foals and calves: 3 - 5 ml
- Sheep and goats: 3 - 5 ml
- Lambs: 2 - 3 ml
- Piglets (<10 kg): 1 ml
- Piglets (10 - 30 kg): 1 - 3 ml
- Sows: 4 - 5 ml

DUFA-IRON 20% PLUS
Iron III-hydroxide-dextran complex 200 mg
Cyanocobalamin (B12) 100 mcg

Combines iron dextran and vitamin B12 (cyanocobalamin). It is critical in the development of genetic material and the production of red blood cells, and contributes to normal functioning of metabolism and nervous and immune systems.

Dosage Recommended:

- Piglets: 1 ml IM in rump musculature
- Calves: 2 - 4 ml SC in a fold of skin over the neck

DUFAFOSFAN 10% + B12

Butafosfan 100mg
Cyanocobalamin (B12) 0.055mg

Butafosfan, a phosphonic acid compound, stimulates appetite and reduces the physiological effects of stress. Vitamin B12 (cyanocobalamin) is an essential component of carbohydrate and lipid metabolism, and is required for the formation of red blood cells and the amino acid methionine.

Dosage Recommended:

- Horses and cattle (5 - 25 ml), Calves and foals (5 - 12 ml), Goats and sheep (2.5 - 5 ml), Lambs and kids (1.5 - 2.5 ml), Swine (2.5 - 10 ml), Piglets (1 - 2.5 ml), Dogs and cats (0.5 - 5 ml)
- Poultry (1 - 3 ml per litre)

DUFAMEC 1% Ivermectin 10mg

Dufamec 1% is an injectable solution containing ivermectin, an antiparasitic agent with activity against many endo- and ectoparasites.

Dosage Recommended:

- Cattle: 1 ml per 50 kg body weight
- Sheep: 0.5 ml per 25 kg body weight
- Swine: 1 ml per 33 kg body weight
- Dogs and cats: 0.1 ml per 5 kg body weight

OXYTOCINE 10 I.U. Oxytocin 10 IU

Stimulation of smooth muscle in the oestrogen sensitised uterus. Action on the mammary gland stimulates milk let down.

Dosage Recommended:

- Mares, cows, sows: 1 - 4 ml
- Ewes, goats: 0.2 - 1 ml
- Dogs: 0.2 - 1 ml
- Cats: 0.2 - 0.5 ml

ANTI- INFLAMMATORIES

DEXAMETHASON 0.2% Disodium phosphate 2mg

A synthetic glucocorticosteroid with an intermediate duration of activity. It exhibits potent antiphlogistic, anti-inflammatory, anti-allergic, immune-suppressive and gluconeogenic actions

Dosage Recommended:

- Horses, cattle: 5-15 ml
- Foals, calves, sheep, goats, swine: 1-3 ml
- Piglets, dogs, cats: 0.25-0.5 ml
- Horses (intraarticular): 1 ml

DUFAPROFEN 10% Ketoprofen 100mg

Ketoprofen is a non-steroidal anti-inflammatory drug (NSAID) belonging to the arylpropionic acid group.

Dosage Recommended:

- Horses: 1 ml per 45 kg once daily IV for up to 5 days
- Laminitic animals: 1 ml per 27 kg IV once daily
- Donkeys: 1 ml per 45 kg twice daily IV for up to 5 days
- Cattle, sheep and goats: 1 ml per 33 kg once daily IV
- Swine: 1 ml per 33 kg once daily IM for up to 5 days
- For dogs and cats: dilute 1 ml in 9 ml of sterile water and dose 0.1 to 0.2 ml of this dilution per 1 kg IV, IM or SC once daily for up to 3 days.

PHENYLBUTAZON 20% Phenylbutazone 200mg

A non-steroidal anti-inflammatory drug (NSAID) belonging to the pyrazolone group.

Dosage Recommended:

- No more than 4.4 mg phenylbutazone per kg body weight. Horses, cattle and swine: up to 1 ml per 45 kg body weight per day for no more than 5 days.

DAIRY AND RUMINANTS

KANAPEN-P
Kanamycin sulphate 50mg
Procaine benzyl penicillin 100,000 IU

Formulated to treat the toughest forms of mastitis due to the synergistic and bactericidal action of Kanamycin and Penicillin

Dosage Recommended:

For single intramammary administration. Clean and disinfect the teat and administer content of one injector per quarter. If required, repeat after 24 hours.

CLOXA-BEN DRY COW Cloxacillin benzathine 1g

Cloxacillin benzathine, an antistaphylococcal penicillin, is primarily used for penicillin-G resistant organisms (e.g. beta-lactamase producing Staphylococcus spp.)

Dosage Recommended:

For single intramammary administration. Disinfect the teats after the last milking at the start of the dry period and administer content of one injector per quarter. Treat all quarters.

DUFAMEC 0.5% POUR-ON Ivermectin 5mg

Dufamec 0.5% Pour-On is a pour-on solution containing ivermectin, an antiparasitic agent with activity against many endo- and ectoparasites.

Dosage Recommended:

Cattle: 1 ml per 10 kg (500 mcg ivermectin per kg body weight) Deliver the dose onto a clean, narrow strip on the back of the animal extending from withers to head of the tail, as directly to the skin as possible. If animals are to be treated collectively rather than individually, they should be grouped according to their body weight and dosed accordingly, in order to avoid under- or overdosing.
