Job Description:

- Gree-America is seeking an Entry-Level HVAC Engineer to provide Mechanical / HVAC designs & related services on a variety of projects.
- Submit technical designs for assigned projects; assist in the production drawings and specifications for new buildings, and for renovations and additions to existing facilities.
-
- Work as representative for Gree-America referral projects.
-
- Provide coordination assistance of project designs.
-
- Develop and maintain positive client relationships.
-
- Utilize AutoCAD and Revit software.

Required Qualifications:

- Preferred BS or HVAC Engineering degree - Six months of In-House training will be provided.
-
- Ability to work with wide variety of clientele in both commercial/retail markets.
-
- Experience with AutoCAD and drawing design.
-
- HVAC &/or MEP experience, load calculations in retail or commercial markets for new buildings or renovations, building codes, with Project Management experience.
-
- Knowledge of building mechanical codes and the ability to perform accurate load calculations.
-
- Strong mechanical/HVAC design capability in retail, grocery or related markets.
- Knowledge of sustainable design practices. Successful client and project management experience and the ability to lead and guide supporting staff members.
-
