Intervention Name and Purpose

Using a sequencing visual to teach hand washing to prevent the spread of infections and maintain health.

Materials Needed for Intervention

Washing Hands File Folder

Procedure

Backward chain by placing all pieces in order and leave the last piece off. Give the instruction to, "Put the steps in order." A correct response is recorded when the individual places the pieces in the correct order.

Phases

Phase	Description	Intro Date	Mastery Date
1	Leave only the last piece off - individual places the last piece in the sequence.		
2	Leave the last 2 pieces off - individual places last 2 pieces.		
3	Leave the last 3 pieces off - same as above.		
4	Leave the last 4 pieces off - same as above.		
5	Leave the last 5 pieces off - same as above.		
6	Leave the last 6 pieces off - same as above.		
7	Individual independently places all 7 pieces in order.
