The World Class Brand

A complete range of quality high-force tools for all industrial applications, with local availability and after sale service anywhere in the world.... this is what has made Enerpac the undisputed global market leader in high-pressure hydraulics.

Across every continent, Enerpac's network of authorized distributors and service centers can reach even the most remote locations, supplying and servicing products that are designed to enhance productivity and performance, while making the workplace safer.

With over 150 sales specialists and a network of service and engineering support in 17 countries across the globe, Enerpac has become the product of choice in industries such as manufacturing, construction, energy, oil and gas, shipbuilding, railroads, mining, and metals transformation.

Always at the leading edge of technology, Enerpac has continued to develop its range of time and cost-savings tools, utilizing modern engineered materials to improve productivity and minimize operator fatigue.

Enerpac's commitment to the continued development of quality high force tools ensures that the products you purchase are the best tools in the industry. We will continue to lead the way in the development of quality high force tools for all industrial applications.

10 Reasons to Work with Enerpac

- Expert Design
- Highly Reliable
- Service Excellence
- Worldwide Experience
- Application Support
- Availability
- Quality
- Value
- Innovative Products
- Systems Solutions

Global Network

Enerpac has an extensive network of authorized distributors and service centers located in more than 90 countries worldwide. You can rely on Enerpac for the products and technical support you need to get your job done, anywhere in the world.

Logistics Excellence

Enerpac's mission is to maintain service excellence in the ever-changing world of modern distribution. Providing our extensive range of products to our thousands of distributors worldwide demands a logistic expertise only a market leader can provide.

A Tradition of Innovation

Enerpac has a long history of finding new solutions to better meet the challenges of the industries we serve. We were the first to develop a composite hand pump and the first to offer a computerized lifting system. Our latest innovations include the XA-Series of air driven foot pumps, designed for less operator fatigue - with the unique XVAR!® technology, delivering variable oil flow and fine metering for precise control, a full range of aluminum cylinders with the strength of steel and the advantages of aluminum and the Z-Class series of power pumps... pumps that were designed to run cooler, use less electricity and are easy to service.

To support the demands of the construction industry, Enerpac continues to develop Heavy Lifting Technologies. These technologies include controlled hydraulic movement for your most challenging applications.

ENERPAC 
POWERFUL SOLUTIONS. GLOBAL FORCE.

Enerpac hydraulic cylinders are available in hundreds of different configurations. Whatever the industrial application... lifting, pushing, pulling, bending, holding... whatever the force capacity, stroke length, or size restrictions... single- or double-acting, solid or hollow plunger, you can be sure that Enerpac has the cylinder to suit your high force application.

Enerpac jacking cylinders fully comply to ASME B30.1 (except RD-Series).

GR2 Bearing Technology

The exclusive GR2 is a unique bearing design on RC-Series DUO cylinders which absorbs eccentric load stresses to protect your cylinder against abrasion, over-extending or plunger blow-outs and jamming or top-end mushrooming. As a result, RC-Series DUO cylinders provide long, trouble-free operation.

Easy assembly and disassembly using only standard shop tools.

Heavy-duty, pre-tensioned spring improves retraction rate for enhanced productivity.

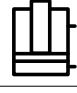

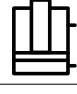

Unique GR2 Bearing System surrounds the seal of longer stroke models resulting in improved side-load resistance and extended operating life.

Additional shape and texture to the **cylinder thread protector** and pliable plug-in/pop-off coupler cap for easy operation with gloved and oily hands.

Note: The cut-away drawing is representative of typical cylinder construction and may not represent all cylinders in this section.

Cylinder & Lifting Products Section Overview

* Capacity (tons)	Stroke Range (in)	Cylinder Type and Functions	Series		Page
5-100	.63-14.25	General Purpose Cylinders, Single-acting Cylinder Accessories 	RC-DUO		6 10
20-150	1.97-9.84	Aluminum Cylinders Single-Acting, Solid Plunger, Lock Nut, Hollow Plunger  	RAC RACL RACH		12 14 16

7-150 2-100	3.00-6.13 2.44-18.11	Aluminum and Steel Jacks Industrial Bottle Jack 	JH/JHA GBJ		56 57
60-200	14.0-27.0	POW'R-RISER® Lifting Jack 	PR		58
200	14.0 / 24.5	Pow'R-LOCK™ Portable Lift System	PL		60
55-220	5.91-6.34	Climbing Jacks	BLS		62
60-250	19.69-59.06	Synchronous Hoisting Systems	SHS SHAS		64

* All cylinder capacities are nominal values, unless otherwise stated. [Maximum] capacities are theoretical and may vary, depending on cylinder condition and application.

▼ Shown from left to right: RC-506, RC-50, RC-2510, RC-154, RC-10010, RC-55, RC-1010

- Unique GR2 Bearing Design, reduces wear, extending life
- Collar threads, plunger threads and base mounting holes enable easy fixturing (on most models)
- Designed for use in all positions
- High strength alloy steel for durability
- Redesigned cylinder thread protector for ease of use
- Heavy-duty, pretensioned spring improves retraction speed
- Baked enamel finish for increased corrosion resistance
- CR-400 coupler and dust cap included on all models
- Plunger wiper reduces contamination, extending cylinder life

The Industry Standard General Purpose Cylinder

Saddles

All **RC** cylinders (except RC-50, 101) are equipped with hardened removable grooved saddles. For tilt and flat saddles, see the RC-Series accessory page.

Page: 10

Base Plates

To ensure the stability of cylinders for lifting applications, base plates are available for 10, 25 and 50 ton RC cylinders.

Page: 10

Specialty Attachments

For solving all kinds of application problems, specialty attachments are available for 5, 10 and 25 ton RC cylinders.

Page: 187

▼ To re-stabilize the foundation, the 308-ton silo needed to be lifted, levelled and structurally supported. Twenty-five ton RC-Series hydraulic cylinders were attached to a bracket on the top of each steel pier. Powered by a Z-Class pump, the hydraulic cylinders applied 20 tons of force at each placement to lift the silo two inches.

▼ RC cylinder mounting attachments greatly extend the application possibilities (available for 5, 10, 15 and 25 ton cylinders).

Single-Acting, General Purpose Cylinders

GR2 Bearing Technology

The exclusive GR2 is a unique bearing design on RC-Series DUO cylinders which absorbs eccentric load stresses to protect your cylinder against abrasion, over-extending or plunger blow-outs and jamming or top-end mushrooming. As a result, RC-Series DUO cylinders provide long, trouble-free operation.

* Available as a set. See note on this page.

** RC-50 cylinder has non-removable grooved saddle and no collar thread.

RC Series

Capacity:

5-100 tons

Stroke:

.63-14.25 inches

Maximum Operating Pressure:

10,000 psi

Think Safety

Manufacturer's rating of load and stroke are maximum safe limits.

Good practice encourages using only 80% of these ratings!

The Enerpac Lightweight Aluminum Cylinders

▼ Shown: RAC, RACL, RACH, and RAR

- Lightweight, easy to carry and position to allow a higher cylinder capacity-to-weight-ratio
- Non-corrosive by design, aluminum has always been a good material for use in many caustic environments
- Composite bearings on all moving surfaces guarantee NO metal-to-metal contact, to resist side loads and increase cylinder life

1. **Removable Hardened Saddle** protects plunger from being damaged by abrasive surface contact.
2. **Stop Ring** on all models absorbs eccentric loading and prevents plunger over-extension.
3. **Composite Bearing** material to prevent metal-to-metal contact, reducing side-load issues and increasing life.
4. **Hard-coated Plunger and Base** resist wear and prevent galling.
5. **7075-T6 Aluminum Alloy Components** for maximum strength and minimum weight.
6. **Plunger Return Spring** on all single-acting models for prompt cylinder return.
7. **Steel Base Plate** protects cylinder base from abrasive surfaces.

RA Series

Capacity:

10-150 tons

Stroke:

1.97-9.84 inches

Maximum Operating Pressure:

10,000 psi

Think Safety

Manufacturer's rating of load and stroke are maximum safe limits.

Good practice encourages using only 80% of these ratings!

Page: 274

Aluminum vs. Steel

Aluminum cylinders, while offering the most lightweight solution also have some unique limitations due to material properties. It differs from steel in that it has a lower finite fatigue life. Aluminum cylinders should NOT be used in high-cycle applications such as production.

These cylinders are designed to provide 5000 cycles at their recommended pressure. **This limit should not be exceeded.** In normal lifting and many maintenance applications, this should provide a lifetime of use.

▼ Shown from left to right: RAC-508, RAC-1506, RAC-304, and RAC-206

Lightweight for Maximum Portability

Saddles

All RAC cylinders are equipped with bolt-on removable saddles of hardened steel.

Lightweight Hand Pumps

Enerpac hand pumps **P-392** or **P-802** make the optimal lightweight set.

Page: 70

- Composite bearings prevent metal-to-metal contact, increasing cylinder life and resistance to side-loads of up to 10%
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models 30 tons and above
- For protection against load-induced damage, a saddle is standard on all models and a steel baseplate is standard on models 20-ton and above. The steel baseplate is optional only on 10- and 15-ton models
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High-strength return spring for rapid cylinder retraction
- CR-400 coupler and dust cap included on all models
- All cylinders meet ASME B-30.1 standards

* Custom strokes available.

◀ Enerpac lightweight aluminum RAC-506 cylinders are ideal for wet environments such as this tunnel under the river (Holland High-Speed Train Line).

Single-Acting, Spring Return Cylinders

Steel Base Plate

The steel base plate protects the cylinder base from damage, it should not be removed.

The base holes in these aluminum cylinders are designed for securing the steel base plate. **They will not withstand the capacity of the cylinder.**

Do not use the base holes in these aluminum cylinders to attach any device to the cylinder.

Capacity:

10-150 tons

Stroke:

- Aluminum Lock Nut provides mechanical load holding for extended periods
- Hardened steel stop ring increases cylinder life and resistance to side-loads of up to 5%
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Composite bearings increase cylinder life and side load resistance
- Handles included on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High-strength return spring for rapid cylinder retraction
- CR-400 coupler and dust cap included on all models
- All cylinders meet ASME B-30.1 and ISO 10100 standards

◀ The portable Lock Nut cylinder RACL-1506 used for extended load support during epoxy injection for bridge reinforcement.

To Secure Loads Mechanically

Saddles

All RACL cylinders are equipped with bolt-on removable saddles of hardened steel. For tilt saddles see next page.

The Lightweight Solution for Tensioning and Testing

Saddles

All RACH-cylinders are equipped with bolt-on removable hardened steel hollow saddles.

Lightweight Hand Pumps

Enerpac hand pumps **P-392** or **P-802** make the optimal lightweight set.

Page: 70

- Hollow plunger design allows for both pull and push forces
- Composite bearings increase cylinder life and side load resistance
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models
- Floating center tube increases seal life
- Steel baseplate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High-strength return spring for rapid cylinder retraction
- CR-400 coupler and dust cap included on all models
- All cylinders meet ASME B-30.1 and ISO 10100 standards

◀ An RACH-306, powered by a P-392 hand pump, is used to extract corroded carriage pins from refuse collection vehicles.

The Lightweight Solution for Double-Acting Applications

Saddles

All RAR-cylinders are equipped with bolt-on removable hardened steel saddles. For tilt saddles see next page.

Page: 19

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 132

- Double-acting for rapid retraction, regardless of hose lengths and system losses
- Composite bearings increase cylinder life and side load resistance
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- Built-in safety valve prevents accidental over-pressurization

◀ An RAR-506 was easy to position under a bulldozer for repair of frame member.

* Custom strokes available.

Double-Acting, Aluminum Cylinders

Steel Base Plate

The steel base plate protects the cylinder base from damage, it should not be removed.

The base holes in these aluminum cylinders are designed for securing the steel base plate. **They will not withstand the capacity of the cylinder.**

Do not use the base holes in these aluminum cylinders to attach any device to the cylinder.

Capacity:

20-150 tons

Stroke:

1.97-9.84 inches

Maximum Operating Pressure:

10,000 psi

▼ LPL-Series, Low-height Lock Nut Cylinders

- Lock nut provides mechanical load holding for a safe work environment
- Integrated tilt saddle allows for up to 5 degrees of misalignment
- Extreme low-height for use in confined areas
- Side-load resistance 5-10% of maximum capacity
- Overflow port as stroke limiter to prevent plunger blow-out
- Single-acting, gravity-return

▼ Only the extreme low-height LPL-cylinder fits in this confined area to lift the construction. The lock nut provides positive and safe mechanical load holding over a long period of time.

The Lowest Power Lifter

Integrated Tilt Saddles

All LPL-Series cylinders include integral tilt saddles with maximum tilt angles up to 5°.

The Summit Edition

Innovation is at the heart of the new Summit Edition cylinders, delivering the high-quality construction that you expect from Enerpac. Their durability ensures your job is done safely and reliably.

- Replaceable plunger support bearing adds support for eccentric loads *
- Nitrocarburization surface treatment for improved load and wear resistance and corrosion protection
- Replaceable composite bearing surrounds the seal, providing support for eccentric loads
- Low-wear, high-pressure seals provide longer service life.

* Eccentric load (or "side-load") is inevitable in heavy lifting. Enerpac's unique *Summit Edition* features provide the ultimate protection against side load. Increased bearing surface maintains stability, and nitrocarburization treatment prevents scoring on the inside of the cylinder. Side-load poses a real problem.... our new cylinder features are the solution!

Cylinder Capacity (ton)	Stroke (in)	Model Number	Maximum Cylinder Cap. at 10,150 psi (ton)	Side-load Resistance of Maximum Capacity	Cylinder Effective Area (in ²)
60	1.97	LPL-602	68	10%	13.42
100	1.97	LPL-1002	113	10%	22.19
150	1.77	LPL-1602	179	8%	35.18
200	1.77	LPL-2002	223	8%	43.95
250	1.77	LPL-2502	286	5%	56.27
400	1.77	LPL-4002	450	5%	88.75
500	1.77	LPL-5002	575	5%	113.25

Single Acting, Low Height Lock-Nut Cylinders

IMPORTANT!

All LPL-Series cylinders require a solid lifting surface for correct support. The use of these cylinders on surfaces such as sand, mud or dirt, may result in cylinder damage.

INCORRECT!

Rough soil

CORRECT!

Flat lifting surface

For more safety instructions see our 'Learning Center' on www.enerpac.com

LPL Series

Capacity:

60 - 500 ton

Stroke:

1.77 - 1.97 inch

Maximum Operating Pressure:

10,150 psi

Longer Stroke Lock-Nut Cylinders

For longer stroke applications HCL-Series Lock-Nut Cylinders are the perfect choice.

Maximum Power to Height Ratio

Saddles

All **RCS-Series** cylinders have plunger mounting holes for installation of tilt saddles. See table for selection and dimensional information.

Page: 23

Low Clearance Lifting

The **LW-16** Lifting Wedge and **SOH-Series** Machine Lifts are the perfect choices for lifting loads that have low clearance.

Page: 192

RSM-Series, Flat-Jac® Cylinders

- Compact, flat design for use where other cylinders will not fit
- RSM-750, 1000 and 1500 have handles for easy carrying
- Mounting holes permit easy fixturing
- Baked enamel finish for increased corrosion resistance
- CR-400 coupler and dust cap included on all models¹⁾
- Hard chrome plated high-quality steel plungers
- Grooved plunger ends require no saddle
- Single-acting spring return

RCS-Series, Low Height Cylinders

- Lightweight, low profile design for use in confined spaces
- Baked enamel finish for increased corrosion resistance
- Plunger wiper reduces contamination, extending cylinder life
- CR-400 coupler and dust cap included on all models
- Grooved plunger end with threaded holes for mounting tilt saddles
- Integral handle on RCS-1002 for easy carrying
- Plated steel plungers
- Single-acting spring return

▼ Only a couple of inches are needed for an RSM-cylinder to lift this large steel construction.

Single-Acting, Hollow Plunger Cylinders

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 132

Optional Threaded Hollow Saddles

Saddle Type	Cylinder Model No.	Saddle Model No.	Saddle Dimensions (in)		
			A	B	C
Threaded Hollow	RCH-202, 206	HP-2015	2.11	1"-8	.38
	RCH-302, 306	HP-3015	2.49	1¼"-7	.38
	RCH-603, 606	HP-5016	3.61	1½"-5½"	.50
	RCH-1003	HP-10016	4.97	2½"-8	.51

Smooth hollow saddles are standard on all RCH-models (12-ton models are not equipped with saddles).

RCH-121 and RCH-1211 have a 1.88" diameter boss that protrudes 0.25" from base.

RCH-120* to RCH-123 models

RCH-202 to RCH-1003 models

* 1/4" NPT for RCH-120 only

▼ Shown from left to right: RRH-3010, RRH-1001, RRH-6010

- Relief valves prevent damage in case of over-pressurization
- Baked enamel finish for increased corrosion resistance
- Collar threads enable easy fixturing (except RRH-1001 and RRH-1508)
- Double-acting operation for fast retraction
- Nickel-plated, floating center tube increases product life
- Hollow plunger allows for both pull and push forces
- CR-400 couplers and dust caps included on all models
- Plunger wiper reduces contamination, extending cylinder life

Versatility in Testing, Maintenance and Tensioning Applications

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: 123

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components section for a full range of gauges.

Page: 131

Saddles

All **RRH-Series** cylinders are equipped with smooth saddles. See table on next page for optional threaded saddles and all dimensional information.

Page: 29

▼ Double-acting hollow-plunger cylinders are applied for bridge launching systems.

High Precision and High Cycle Performance

Speed Chart

See the Enerpac Cylinder Speed Chart in our 'Yellow Pages' to determine your approximate cylinder speed.

Page: 283

- Designed for long life, the best choice for production applications
- Unique mounting configurations simplify fixturing
- Baked enamel finish for increased corrosion resistance
- Double-acting operation develops force in both directions, providing maximum versatility
- Plunger wiper reduces contamination, extending cylinder life

▼ Clamping application using Enerpac RD cylinders (with clevis eye attachments on both ends) for their high-pressure capability and mounting flexibility.

▼ Shown from left to right: RR-10013, RR-1502, RR-20013, RR-1010, RR-7513

- Collar threads, plunger threads and base mounting holes for easy fixturing (on most models)
- Baked enamel finish for increased corrosion resistance
- Removable hardened saddles protect plunger during lifting and pressing
- Built-in safety valve prevents accidental over-pressurization
- CR-400 couplers included on all models
- Plunger wiper reduces contamination, extending cylinder life

Most Versatile Performers

Rugged enough for the toughest job site uses and precision designed for high-cycle industrial uses.

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: 123

Saddles

RR-Series cylinders up to 75-ton have plunger thread for installation of CAT-Series tilt saddles.

Page: 33

Optimum Performance

Enerpac's range of Z-Class electric pumps, fitted with manual or solenoid operated 4-way valves, offer optimum combinations with RR cylinders.

Page: 90

▼ These long stroke RR-cylinders are attached to a sliding and guiding system pulling the arched roof assembly of Athen's Olympic Stadium step-by-step into the final position.

▼ RR-cylinders provide power and precision in a special hydraulic press.

Double-Acting Long Stroke Cylinders

RR Series

Capacity:

10-500 tons

Stroke:

2.25-48.00 inches

Maximum Operating Pressure:

10,000 psi

Enerpac HCR-Series

If you do not have a high-cycle application, Enerpac **HCR-Series** cylinders may be the right alternative.

Page: 44

Speed Chart

See the Enerpac Cylinder Speed Chart in our “Yellow Pages” to determine your approximate cylinder speed.

Page: 283

Optional Snap-in Saddles

Optional snap-in saddles for RR-Series double-acting cylinders:

Saddle Type	Cylinder Model Number	Saddle Model Number
Flat	RR-1010, 1012	A-102F
	RR-1010, 1012	CAT-10
Tilt	RR-308, 3014	CAT-50
	RR-506, 5013	CAT-100
	RR-5020, 756	
	RR-7513	

Standard Saddles

Grooved	RR-1010, 1012	A-102G
	RR-308, 3014	A-252G

For additional information on saddles:

Page: 10

RR-Series, Double-Acting Cylinders

ENERPAC 
POWERFUL SOLUTIONS. GLOBAL FORCE.

RR-1010 to RR-3014 models

* For RR-1010 and RR-1012:
N = 1.26 inch; for RR-308 and
RR-3014: N = 2.20 inch.

RR-506 to RR-50048 models

RR-1006 to RR-30048

No mounting holes:

RR-506, 5013
RR-756, 7513
RR-1502, 15032

Cylinder retract capacity for
certain RR cylinders may be
less than theoretical values,
as a result of reduced relief
valve pressure settings:

RR-308/3014: 4000 psi
RR-506/5013/5020: 6950 psi
RR-756/7513: 7200 psi

◀ For full features see page 32.

Double-Acting Long Stroke Cylinders

Couplers Included!

CR-400 couplers included on all models. Fits all HC-Series hoses.

Capacity:

10-500 tons

Stroke:

2.25-48.00 inches

Maximum Operating Pressure:

10,000 psi

▼ HCL-1006, HCG-2006, HCR-506

Reaching the Summit Edition:

Substrate bonded multi-layer treatment

- Hardened surface resists side-loading and cyclic wear
- Weather protected, inside and out
- Low-friction locking rings spin easy, save time and effort ¹⁾

Enclosed polymer bearing system

- Upper and lower bearings enclose the cylinder plunger for support and are able to be replaced along with seals and other soft parts
- State-of-the-art bearing material provides maximum conformity to reduce wear and avoid bore damage even in high side-load conditions

Low-wear, high-pressure seals

- Improved geometry and material selection increases seal performance even in harsh conditions
- Low friction improves retraction times

Versatile

- Over 200 models in four configurations ¹⁾
- Certified lifting eyes, base mounting holes and collar threads are included for secure handling and cylinder mounting ¹⁾

¹⁾ See specific model's technical data for more information.

Highest Level of Durability

The Summit Edition

Innovation is at the heart of the new *Summit Edition* of cylinders, delivering the high quality construction that you expect from Enerpac. The durability ensures your job gets done safely and reliably.

- Plunger support bearing adds support for eccentric loads ²⁾
- Nitrocarburization surface treatment for improved wear resistance and corrosion protection
- Replaceable composite bearings surround the seal providing support for eccentric loads
- Low-wear, high-pressure seals provide longer service life

²⁾ Eccentric load (or "side-load") is inevitable in heavy lifting. Our unique Summit Edition features provide the ultimate protection against side-load. Increased bearing surface maintains stability, and nitrocarburization treatment prevents scoring on the inside of the cylinder. Side-load poses a real problem.... our new cylinder features are the solution!

▼ Bridge lifting and launching system. The load is balanced on groups of lock nut cylinders. The hydraulic movements are synchronized using the Enerpac PLC-controlled synchronous lift systems.

High-Tonnage Cylinders

The Enerpac High-Tonnage Cylinders are particularly suitable for (multipoint) lifting applications.

In combination with our state-of-the-art power packs, you will have a world class hydraulic system to perform the most challenging lifting jobs in a safe and professional manner.

HCG, HCR, HCL-Series Cylinders

- 50 - 1000-ton lifting capacity
- 1.97 - 11.81 inch lifting stroke

HCG-Series - single-acting

- gravity-return
- stop-ring to prevent plunger blow-out
- designed to withstand up to 10% side-load of maximum capacity

HCR-Series - double-acting

- hydraulic advance and retract for controlled movement
- designed to withstand up to 10% side-load of maximum capacity

HCL-Series - lock nut, single-acting

- gravity-return
- lock nut for mechanical load holding
- overflow port to prevent plunger blow out
- designed to withstand 10% side-load up to 90% of maximum stroke

LPL-Series - lock nut, low height, single-acting

- 60 - 500-ton lifting capacity
- 1.77 - 1.97 inch lifting stroke
- integrated tilt saddle
- gravity-return
- lock nut for mechanical load holding
- 5-10% side-load of maximum capacity

Page: 5

HCG HCR HCL Series

Capacity:

50 - 1000 ton

Stroke:

1.77 - 11.81 inch.

Maximum Operating Pressure:

10,150 psi

Assisted-Return Pumps

Enerpac HCG, HCL and LPL-Series cylinders are hydraulic advance and gravity-return. To improve productivity and plunger retraction Enerpac offers assisted return on ZU4 and ZE-Series pumps featuring Enerpac Venturi valve technology, specifically to facilitate the faster return of single-acting, gravity-return cylinders. See enerpac.com for details.

Split-Flow Pumps

SFP-Series pumps with multiple outlets with equal oil flow. For lifting and lowering applications on multiple points, these pumps are a far better alternative than using separately operated pumps.

Page: 118

Synchronous Lifting Systems

Pumps for multiple lift-point capabilities. The economical **EVOB-Series** for basic applications and the multi-functional **EVO-Series** lifting system.

HCG-Series, Single-Acting, Gravity-Return Cylinders

- Hardened surface resists side-loading and cyclic wear
- Designed to withstand up to 10% side-load of maximum capacity ¹⁾
- Stop-ring to prevent plunger blow-out
- Weather protected, inside and out
- Upper and lower replaceable bearings enclose the cylinder plunger for support throughout the stroke
- Certified lifting eyes, base mounting holes and collar threads

6.30	2.51	CATG-300

HCG-Series, Single-Acting, Gravity-Return Cylinders

- Hardened surface resists side-loading and cyclic wear
- Designed to withstand up to 10% side-load of maximum capacity
- Stop-ring to prevent plunger blow-out
- Weather protected, inside and out
- Upper and lower replaceable bearings enclose the cylinder plunger for support throughout the stroke
- Certified lifting eyes, base mounting holes and collar threads

Collar Thread (in)		
Model / Capacity	Thread Size	Thread Length
(ton)	W	X
HCG-400	M350 x 3	3.27
HCG-500	M400 x 4	3.54
HCG-600	M430 x 4	3.94
HCG-800	M505 x 5	4.80
HCG-1000	M570 x 5	5.39

The collar thread length is designed for the full rated cylinder capacity.

Base Mounting Holes (in)					
Model / Capacity	Bolt Circle	Thread Size	Minimum Thread Depth	Number of Holes	Angle from Coupler
(ton)	U	V	Z

HCL-Series, Single-Acting, Gravity-Return Cylinders

- Lock nut provides positive and safe mechanical load holding
- Low-friction locking rings spin easy, save time and effort
- Designed to withstand 10% side-load up to 90% of maximum stroke
- Hardened surface resists side-loading and cyclic wear
- Overflow port as stroke limiter to prevent plunger blow-out
- Weather protected, inside and out
- Replaceable bearings enclose the plunger for support throughout the stroke
- Certified lifting eyes and base mounting holes

SELECTION CHART 50 – 300-TON HCL-MODELS

For 400 – 1000-ton models, see pages 50-51.

For full product features see pages 36-37.

The Quickest and Easiest Way to Start Working Right Away

LW-16 Lifting Wedge

Hydraulic cylinders, jacks and lifting wedges can also be used to assist in positioning and aligning.

The LW-16 only requires an access gap of .39 inch. See our "Specialty Tools" section on www.enerpac.com.

Page: 192

- Optimum match of individual components
- All sets are ready to use and include single-acting cylinder, two-speed pump, 6-foot safety hose, calibrated gauge with gauge adaptor
- RC-Series DUO, general purpose cylinders for maximum versatility
- RCS-Series, low-height cylinders for maximum versatility
- RCH-Series hollow cylinders for pushing and pulling

▼ Cylinder-Pump Sets - optimum match of components. The quickest and easiest way to start working right away.

Single-Acting, Cylinder Pump Sets

SELECTION EXAMPLE

Selected cylinder:

- RC-106, Single-acting cylinder with 6.13" stroke

Selected pump:

- P-392, Lightweight hand pump

Set model number:

- SCR-106H

Included:

- HC-7206 hose
- GF-10P gauge
- GA-2 adaptor

GA45GC Gauge Adaptor ³⁾

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 144

SC Series

Capacity:

5-100 tons

Stroke:

1.50-14.25 inches

Maximum Operating Pressure:

10,000 psi

SET SELECTION:

- 1 Select the cylinder
- 2 Select the pump
- 3 Find the set model number in the gray field of the matrix

2

Pump selection (See Pump Section of this catalog for full product descriptions)

RC, P, V Series

Cylinder Capacity:

5-25 tons

Stroke:

2-6 inches

Maximum Operating Pressure:

10,000 psi

Applications

Use Enerpac **Extreme Environment Products** in wet environments such as food processing, pulp and paper, mining, construction and applications in high temperature or in welding areas.

- Corrosion resistant, nickel-plated valves and cylinders
- Stainless steel pump inserts will not corrode
- Viton® Seals provide heat and chemical resistance
- Anodized aluminum pump reservoirs and plastic encapsulated pump bodies resist wet environments
- Two-speed operation reduces pump handle strokes 78% compared to single-speed pumps
- Pump handles lock for easy carrying

Multifluid Hand Pumps

MP-Series corrosion resistant hand pumps for low pressure filling and high pressure testing applications, suitable for a wide range of fluids.

JH, JHA Series

Capacity:
7-100 tons

Stroke:
3.00-6.13 inches

Maximum Operating Pressure:
10,000 psi

- All-directional operation on 7, 15 and 35-ton models (JHA- Series)
- Internal relief valve to prevent overloading
- Machined flat front and bottom surfaces permit flush alignment in tight corners
- All models include pumping handle
- Chrome-plated plungers
- Automatic by-pass port to prevent over-extension (JH-Series)

Lifting Wedge and Machine Lifts

Ideal to lift the load the first few inches. The **LW-16** Lifting Wedge requires a very small access gap of only .39 inch.

▼ Shown: GBJ010A, GBJ030A, GBJ003A

GBJ Series

Capacity:

2-110 tons

Stroke:

2.44-18.11 inches

Screw Feature

Heat treated, adjustable extension screw with cleated saddle on selected GBJ models helps adjusting and prevents slipping.

- Lower handle effort reduces operator fatigue
- Fully serviceable
- High-strength beam and pump linkage for long life
- Pumping handle included on all models
- Safety relief valve to prevent overload
- Automatic by-pass port to prevent over-extension
- Wiper seal for extended life
- Thick base material with large area for increased strength and stability during lifting

Pump and Cylinder Sets

As an alternative to Industrial Bottle Jacks where the operator is required to stand remote from the jacking point, see the range of pump and cylinder sets.

All GBJ Jacks meet or exceed: ANSI, PALD, CE

▼ Shown: PRASA10027L and Accessory Locking U-Rings

Safe, Efficient, Mobile Load Lifting

- 60, 100, 150 and 200-ton capacities with pneumatic or electric pumps for the toughest jobs
- 4-inch ground clearance for transport over rail and rough terrain
- Three-position handle provides easy tilt back and transport
- Complies with ASME/ANSI B30.1:2015 & CE specifications
- Easy-to-change external filter minimizes down time
- Rugged, fully enclosed 24-inch wide frame with no exposed fittings or hoses
- SUP-R-STACK™ Extension System allows lifting at all heights without blocking.

Pendant Cord

Standard 12' pendant cord for air driven units with pneumatic valves and 20' pendant cord for electric driven units keeps operator away from the load.

Efficient Lifting with Continuous, Automatic Load Locking

Pow'R-LOCK™ Self-Locking Lift System

Only the **Pow'R-LOCK™** Lift System provides continuous positive locking of the load through all stages of lifting and lowering. No operator intervention is required to activate or deactivate the automatic locking system.

Two different stroke lengths are available. Both models are powered by an external compressed air system (user-supplied). A convenient two-button pendant controls operation of the Lift System's air motor and directional control valve.

- Provides continuous locking protection during lift, lower and hold functions
- Patent-pending control technology synchronizes cylinder and lock nut for smooth and efficient lifting and lowering
- Unique double-acting cylinder offers a low collapsed height to accommodate more lifting applications
- Simple 2-button pendant allows operation of raise and lower functions from up to 20 feet away
- All exposed load-bearing steel cylinder components utilize a nitrocarburizing treatment to reduce wear and resist corrosion
- Ergonomic handle has six positions for comfortable handling and folds when not in use
- Meets ANSI /ASME B30.1-2015, AS/NZS-2538, AS/NZS-2693 certification criteria

Tilt Load Cap

All **Pow'R-LOCK™** Lift System models feature a Tilt Load Cap to reduce side-loading.

Enerpac declares that this product has been tested and conforms to applicable standards and is approved to carry the CE mark. An EU Declaration of Conformity is enclosed separately.

◀ The PL-Series Pow'R-LOCK Portable Lift System.

PL-Series, Pow'R-LOCK™ Portable Lift System

Accessories

Flat Load Cap – Non-tilt load cap has lower profile for tight lifting spaces.

Spacers – Minimize gap between load cap and lifting point to maximize hydraulic stroke of the jack.

Extensions – Stackable, with large alloy steel locating studs to resist effects of side-loading.

Extension Base Adapter – Extension Base Adapter design eliminates risk of improper stacking when using more than one extension.

PL Series

Rated Lifting Capacity:

200 tons

Stroke:

14 or 24.5 inches

Maximum Operating Pressure:

10,000 psi

▼ ACCESSORIES

	Model Number	Description	Height (in)	PL20014-ASA	PL20025-ASA
	PLC1	Flat Load Cap	1.3	x	x
	PLS1	Spacer	1.0	x	x
	PLS2	Spacer	2.0	x	x
	PLE5	Extension	5.0	x	x
	PLE7	Extension	7.0	x	x
	PLE9	Extension	9.0	x	x
	PLE11	Extension	11.0	x	—
	PLE14	Extension	14.0	x	—
	PLB12	Extension base adapter	12.0	x	—

WARNING!

PLE11 and **PLE14** Extensions and **PLB12** Extension Base Adapter are to be used with the "short" model **PL20014-ASA** only.

Use of these extensions on the "tall" model **PL20025-ASA** will result in an excessive maximum lifting height. Load could become unstable and drop, resulting in possible personal injury and/or property damage.

Model No.	Max. Additional Stack Height* (in)
PL20014-ASA	28.0
PL20025-ASA	9.0

* Using optional PLB and PLE-Series extensions and PLS-Series spacers. Load cap height is NOT included in the stack height.

Safety First

When lifting large, heavy vehicles certain precautions must be followed. Follow your published safety directions for lifting and cribbing your loads.

The **Pow'R-LOCK™** Lift System provides load/lock protection, but you must follow the safety directions for load cribbing operations.

Pow'R-RISER® Lifting Jack

When automatic load-locking is not required, the Enerpac **Pow'R-RISER®** jack provides a mobile lifting solution.

For more information go to:
www.enerpac.com

Page: 58

Capacity (ton)	Stroke (in)	Model Number	Cylinder Lifting Speed * in/min		Recommended Air Supply**		A *** (in)	B *** (in)	Wt. (lbs)
			Load	No Load	(CFM)	(psi)			
200	14.0	PL20014-ASA	2.0	2.4	130-150	55-100	48.0	34.0	1105
	24.5	PL20025-ASA	2.0	2.4					

* Depending on available airflow, regulator setting, pump speed and load weight.

** Minimum dynamic air pressure of 55-60 psi, 90-100 psi required to achieve 200-ton capacity.

*** Height of items A and B is with swivel load cap installed. Subtract 2-inches if flat load cap is used.

▼ Shown: **BLS-1006**

- Climbing Jacks include integral tilt saddles with maximum tilt angles up to 5°
- Large base with anti-rotation rod for stability and safety
- Built-in safety valve prevents accidental over-pressurization
- Baked enamel finish for increased corrosion resistance
- CR-400 couplers included on all cylinder models

A Simple Solution to Incremental Lifting

Lifting Height

Climbing Jacks overcome the usual limitation of lift height imposed by the jack's plunger stroke length. Large objects, such as oil tanks, can be lifted, held and lowered for maintenance without sending for a crane.

Split-Flow Pumps

SFP-Series Pumps with multiple outlets with equal oil flow. For lifting applications on multiple points Split-Flow

Pumps are a far better alternative than using independently operated pumps.

Page: 118

EVO-Series, Synchronous Lifting Systems

The EVO-system is the ideal system for stage lifting. The system has 9 work modes

including the stage lift work mode to easily step through each stage of the lifting cycle.

Page: 120

▼ Synchronous Stage Lifting: 48 double-acting jacks (25 and 50 ton) are networked into a 16 point synchronous system to lift this 164-feet, 1100-ton building up to a height of 8-feet to construct a new floor level.

Cylinder Capacity (tons)	Stroke (in)	Model Number	Max. Cylinder Capacity (tons)	
			Push	Pull
55	5.91	BLS-506	55	12
105	6.34	BLS-1006	105	48
154	5.94	BLS-1506	154	74
220	5.94	BLS-2006	220	113

Double-Acting Climbing Jacks

◀ Typical stage-lift application using a custom built Enerpac system to lift the 360 ton Akkerwinde wooden bridge in the Netherlands.

BLS Series

Capacity per Lifting Point:

55 - 220 tons

Stroke per Stage:

5.91 - 6.34 inches

Maximum Operating Pressure:

10,000 psi

▲ Stage Lifting Sequence

Step 1: The Climbing Jack is placed on a solid support under the load (retracted plunger).

Step 2: Plunger extends, lifting the load and giving clearance to insert two outer blocks under the spreading plate.

Step 3: Plunger retracts, giving clearance to position the central blocks which will support the plunger plate for the next extension.

Step 4: Plunger extends, lifting the load, giving clearance to insert two new blocks, placed crosswise under the spreading plate.

▼ SHS-Series 4-Point SyncHoist System

- High-precision load maneuvering using one crane
- Reduces the risk of damage from oscillations of wire rope due to crane jogging and sudden starts/stops
- Vastly improving worker safety, operating speed and control
- PLC-controlled hydraulics turn lifting into high-accuracy hoisting and load positioning system
- Double-acting push/pull cylinders with load-holding valves for added safety
- Increased efficiency compared to conventional load positioning methods

Options for system management and control:

- Manual control: system warning functions
- Automatic control: fully PLC-monitored system with programmable functions using touch screen and system warning functions
- Wireless control: self-contained hydraulics with hand-held control

Accurate Hoisting and Load Positioning Enhancing a Crane's Capability

Synchronous Hoisting

Enerpac SyncHoist is a unique crane product for below-the-hook positioning of heavy loads that require precision placement. The SyncHoist system may reduce the number of cranes needed and reduce the costs of multiple picks.

Functions

- High precision horizontal and vertical load positioning
- Pre-programmed positioning, tilting and aligning

Applications

- Positioning of rotor, stator and propeller blades of wind turbines
- Positioning of roof sections, concrete elements, steel structures
- Positioning of turbines, transformers, fuel rods
- Precise machinery loading, mill rod changes, bearing changes
- Precise positioning of pipe lines, blow out valves
- Positioning and aligning of ship segments prior to assembly

▼ Bridge segments are hoisted from the ground, being positioned with a 4-point SyncHoist system with fully monitored cylinders.

▼ SyncHoist Powerpack to operate the 4 lifting points.

▼ A SyncHoist system used to align steel blocks of the ship's control tower sections allowing gradual lifting and positioning of the load.

SyncHoist - High Precision Load Positioning

What is SyncHoist?

Enerpac SyncHoist is a hydraulically operated auxiliary attachment for high precision load positioning for cranes. The SyncHoist system can be used for pre-programmed positioning, tilting and aligning of loads.

- Complete system tested in compliance with European lifting directive and safety requirements
- BTH-1 - 2014 compliant design of below-the-hook lifting devices

SyncHoist improves safety, operating speed and control of load movement

Geometric positioning of heavy loads in a horizontal and vertical plane are frequently done using more than one crane. Synchronizing movements between cranes are difficult and risky. The lifting inaccuracy can result in damage to the load and support structures and puts workers at risks. The SyncHoist system can be used for controlled hydraulic horizontal and vertical material handling.

System management and control

Contact Enerpac for the following options, or other customized stroke, capacity and control configurations.

1. Manual control

- Valves with manual levers
- Warnings for thermal motor protection
- Visual check: oil level, filter indicator

2. Automatic control

- Load and stroke monitoring, and stroke control
- PLC-control and touch screen
- Solenoid valves with pendant
- Pre-programmable motions and data recording
- System warnings for:
 - maximum cylinder load control setting
 - stroke and position control
 - thermal motor protection
 - oil level and filter indicator

Autonomous (wireless) system

- Wireless remote control
- Only one electric power connection per lifting point
- Integrated hydraulics, PLC and controls
- No need for hydraulic hoses and cables
- No need for mid-hoist disconnection of hoses and movement of pump

SHS/SHAS Series

Capacity:

60 - 250 ton

Maximum Stroke:

19.69 - 59.06 inches

Accuracy Over Full Stroke:

± .040 inches

Maximum Operating Pressure:

10,000 psi

¹⁾ With 4 cylinders and one 460-480 VAC-3 phase-60 Hz power pack (suffix J). For 400 VAC-3 phase-50 Hz power pack change suffix J into W. Example: SHS 45560 MW.

²⁾ Pump and cylinders include 4x 82 feet hydraulic hoses with couplers. ³⁾ Weight per cylinder.

⁴⁾ WU = with US electrical wiring. Change into suffix "WE" for EU-market. Example: SHAS 411060 WE.

Custom Hydraulic Cylinders

There's no substitute for experience in customizing hydraulic cylinders and Enerpac meets the needs of the most demanding applications.

Cylinders are the primary workhorse in hydraulic systems required to push or pull. Although Enerpac offers a wide variety of cylinders to fit many application requirements there are many

applications which require customization. These may include special corrosion protection, ability to handle extreme side loads, or having special mounting needs.

◀ *Large capacity cylinders for extreme applications.*

◀ *Cylinders with special attachments.*

◀ *Custom private labeled cylinders for OEM applications.*

OVERVIEW

▲ *Custom 500-ton cylinders with 72-inches of stroke for lifting electric rope shovels.*

CUSTOMIZABLE FEATURES:

- Stroke
- Capacity
- Paint
- Pressure Rating
- Fitting
- Special Attachments
- Seals
- Imbedded Sensors
- Collapsed Height
- Rod Modifications
- Special Mounting
- Corrosion Resistance

INFRASTRUCTURE

◀ Custom cylinders used for incremental bridge launching systems.

BUILDING CONSTRUCTION

◀ Custom cylinders for jack and slide operations.

INFRASTRUCTURE

◀ Custom SyncHoist cylinders for placement of stadium roof trusses.

POWERGEN

◀ Custom double-acting lock-nut cylinders with internal stroke sensors and an integrated load holding valve for lifting nuclear components.

INFRASTRUCTURE

◀ Custom cylinders with embedded sensors for bridge construction.

POWERGEN

◀ One of three custom SyncHoist cylinders used to place a 1,140-ton nuclear plant module.

Enerpac hydraulic pumps are available in over 1,000 different configurations. Whatever your high pressure pump needs are... speed, control, intermittent or heavy-duty performance... you can be sure that Enerpac has the pump to suit the application.

Featuring Hand, Battery, Electric, Air and Gasoline powered models, with multiple reservoir and valve configurations, Enerpac offers the most comprehensive high pressure pump line available.

Pump Selection

For help in selecting the correct pump for your application, please review our **"Yellow Pages."**

If you require further assistance, contact the Enerpac office located near you.

Tank Kits

When a return-to-tank port is required, the Tank Kits provide a 7/16-20 port at the rear of the reservoir.

PC-20 Fits P-141, P-142

PC-25 Fits P-202, P-391, P-392

LX-101 Hand Pump Oil

A medium viscosity oil specially formulated for hand pumps. Performs well in low temperatures and requires less pumping effort than standard Enerpac HF blue oil.

Page: 136

- Lightweight and compact design
- Durable glass-filled nylon reservoir and nylon encapsulated aluminum pump base for maximum corrosion resistance
- Two-speed operation on most models reduces handle strokes by as much as 78% over single speed pumps
- Lower handle effort to minimize operator fatigue
- Integral 4-way valve on P-842 for operation of double-acting cylinders
- Handle lock and lightweight construction for easy carrying
- Large oil capacities to power a wide range of cylinders or tools
- Non-conductive fiberglass handle for operator safety
- Internal pressure relief valve for overload protection

- Reduced handle effort and ergonomic grip for less operator fatigue
- Two-speed operation for fast and easy operation (except P-39)
- Vent free reservoir eliminates spills
- Quick grip handle allows for easy transport
- Integral reservoir over-pressurization protection
- All steel construction, chrome plated plunger and wiper system for durable, long lasting performance
- 4-way valving on the P84 and P-464 for operation of double-acting cylinders

▼ In the absence of a power supply, the P-80 Hand Pump offers a powerful solution.

The Solution for Tough Jobs

Two Speed Pumps

Recommended for applications where cylinder plunger must advance rapidly to contact load, and applications where greater oil capacities are required, such as multiple cylinder hook-ups.

Foot Pump Conversion Kits

Convert your P39, P77, P80, or P801 to foot power with the PC-11 Kit. Includes instructions for easy conversion.

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 144

4-Way Control Valve

P-84 and P-464 feature a manual 4-way control valve, designed for use with one double-acting or two single-acting cylinders. For system set-up information:

Flow at Rated Pressure:

.12-1.28 in³/stroke

Maximum Operating Pressure:

1,500-14,500 psi

Optional Reservoir Kit

The two-gallon reservoir kit **MP-10T*** includes tank with skid frame, top plate with reservoir seal, suction pipe and mounting bolts. Useable oil capacity is 1.5 gal.

*For use with mineral oil applications only.

Also available is model number **11-400**.

Page: **78**

- Superior corrosion resistance
- Impregnated aluminum anodized pump housing with stainless steel internal pumping components
- Standard Nitrile seals – excellent for demineralized water, oil/water emulsions, water glycols, mineral oils, hydraulic fluids
- Custom EPDM seals available for use with Skydrol® or brake fluids
- Two-speed pumps up to 14,500 psi pressure
- Externally adjustable pressure-relief valve
- 1/4" NPTF gauge port

▼ MP-Series pumps are ideal for testing and filling applications.

MP-10T

MP-110, 350, 700, 1000

- ① Suction / Tank return port 3/8"-18 NPTF
- ② Pressure port 3/8"-18 NPTF
- ③ Gauge port 1/4"-18 NPTF

Pump Type	Usable Oil Capacity (in ³)	Model Number	Pressure Rating (psi)		Oil Displacement per Stroke (in ³)		Max. Handle Effort (lbs)	Piston Stroke (in)	Weight (lbs)
			1st stage	2nd stage	1st stage	2nd stage			
Two Speed	*	MP-110	500	1500	3.2	1.28	99	1.04	14.5
	*	MP-350	500	5000	3.2	.43	99	1.04	14.5
	*	MP-700	500	10,000	3.2	.18	99	1.04	14.5
	*	MP-1000	500	14,500	3.2	.12	99	1.04	14.5

Note: MP-Pump includes .060 in. thick gasket for reservoir mounting.

* MP-Series pumps require the use of an external reservoir.

▼ Shown from left to right: 11-100, P-2282

- Two-speed operation on the P-2282 allows for faster fill, reducing cycle times for many testing applications
- 303 Stainless steel construction on the 11-100 and 11-400 models enable use with many different fluids, such as distilled water, alcohol, diesters, silicones, soluble oils and petroleum
- Large release knob for improved control of pressure release
- Outlet ports are 3/4"-16 cone for 40,000 psi rating

Ultra-High Pressure up to 40,000 psi

2-Way Shut-Off Valve 72-750

For 40,000 psi applications requiring a shut-off valve or gauge snubber. Made of 318 Stainless Steel and utilizing .38-inch cone fittings, it is the perfect selection for use with your Ultra-High Pressure Hand Pump.

Test System Gauges

Ideal for monitoring pressure in your hydraulic circuit, Test System Gauges, such as the T-6010L, are available with cone threads or NPTF threads and in a variety of pressure ranges.

Page: 142

▲ Typical Test System

▲ Test System with Gauge and Snubber

Cone Seal

Stainless Steel High Pressure fittings seal on a "cone" surface and do not require pipe sealer. The Gland Nut holds the sleeve and tubing tight against the cone surface to provide a 40,000 psi seal.

Pump Type	Usable Oil Capacity (in ³)	Model Number	Pressure Rating* (psi)		Oil Displacement per Stroke (in ³)		Max. Handle Effort (lbs)
			1st stage	2nd stage	1st stage	2nd stage

◀ Power and simplicity for the toughest jobs.

Cordless Hydraulic Pump

XC-Series Cordless Hydraulic Pump

The XC-Series cordless pump is ideal for jobs that require a combination of portability, speed, and safety. These cordless pumps are perfect for remote locations without access to power, but also indoors where trip hazards, ergonomics or size is a concern. The XC-Series cordless pump is compatible with all Enerpac hydraulic tools and small to medium sized cylinders.

The Lithium-Ion battery provides superior run time, even under extreme job site conditions.*

- 279 cuts of 3/8 inch reinforcing bar using the WHC-750 Cutter
- 112 lifts with the WR-5 Spreader
- 44 splits on 1-inch, grade 8 nuts using the NC-3241 Nut Splitter
- 28 lifts of an RC-104

The XC-Series cordless pump is CSA and CE compliant.

*Actual number of cycles per charge will vary depending on condition of tool, battery and ambient conditions. Battery life with double-acting tools is approximately 75% of that for comparable, single-acting tools.

XC Series

Reservoir Capacity:
60-120 in³

About the Economy Pump

The Economy pump is best suited to power small to medium size cylinders or hydraulic tools. Its lightweight and compact design makes it ideal for applications which require easy transport of the pump.

The Universal motor works well on long extension cords or generator-driven electrical power supplies.

For further application assistance refer to the "Yellow Pages".

PUD-1100 Series

- Provides advance/auto-retract of single-acting cylinders
- Ideal for punching applications

- For applications not requiring load holding
- 10-ft pendant controls motor and valve operation

PUD-1300 Series

- Provides advance/hold/retract of single-acting cylinders
- 10-foot pendant controls motor and valve operation
- Ideal for applications requiring remote valve operation.

PUJ-Series

- Available with 3- and 4-way valves for single- or double-acting cylinders
- 10-ft cord controls the motor operation
- Manual valves provide advance/retract tool control

Best Performance for Mid-Range Cylinders and Tools

▼ SELECTION CHART

For more technical information see next page.

5 BASIC PUMP TYPES

Select the model that suits your application. For special requirements see **page 87** or contact your Enerpac office.

PED-Series: with Dump Valve

- Ideal for punching, crimping and cutting
- For use when load holding is not required
- Control pendant with 10 ft. cord controls valve and motor

PEM-Series: with Manual Valve

- Ideal choice for most applications
- Manual valve control, for both single-acting and double-acting applications
- Manual motor control

PER-Series: with Solenoid Valve

- Ideal for production and lifting
- All valves are 3-position for Advance/Hold/Retract
- Control pendant with 10 ft. cord for remote valve operation

PEJ-Series: with Remote Jog

- For light production and lifting applications
- Manual valve control for single-acting or double-acting cylinders
- Control pendant with 10 ft. cord for remote motor operation

PES-Series: with Pressure Switch

- Designed for maintaining pressure applications, such as clamping, workholding and testing
- All versions include manual valves for directional control

* Contact Enerpac for details on VM style valves.

- Two-speed operation reduces cycle times for improved productivity
- Powerful .5 hp induction motor is submerged in the oil reservoir to run cooler, protect the motor, simplify the pump interface, save space and reduce noise
- Large 1.5 gallon reservoir allows operation of a wide range of cylinders
- 24 VDC remote pendant control on certain models for safer operation
- Externally adjustable relief valve allows control of operating pressure without opening the pump
- 40-micron internal return line filter keeps oil clean, promoting longer pump life
- Full-length side tube for easy monitoring of oil level

◀ The Remote Jog model of the Submerged Pump simplifies maintenance on this machine.

Submerged Electric Pumps

Submerged Pump Application

The Submerged pump is best suited to power small to medium size cylinders or hydraulic tools, or whenever a quiet, intermittent duty cycle is needed. With its low sound level and the addition of the optional oil cooler, the Submerged pump is suited to light production work as well.

Its lightweight and compact design also make it ideal for applications which require some transport of the pump.

For further application assistance see the "Yellow Pages" or contact your local Enerpac office.

Introducing the **Z-Class** power pumps from Enerpac – pumps that run cooler, use less electricity and are easy to service.

Enerpac has used the latest metallurgical, bearing and seal technologies to produce a pump whose features and benefits far surpass the electric pumps that are available today. By reducing the number of moving parts, improving flow dynamics and decreasing friction, Z-Class pumps will stay on the job longer, require less energy to operate and when needed, have lower service costs.

Z-Class electric pumps from Enerpac – simply the best pump you will ever use.

Z Tough.
Dependable.
Innovative.
CLASS

Z-Class Pumping Element — The Heart of Your Hydraulic System

Highly efficient design provides increased flow rates, reduced heat generation and a decrease in power consumption. This means improved tool speed and increased service life — which results in higher productivity and lower operating costs.

Heavy-duty bearings extend pump life by reducing friction, reducing surface-loading and lowering bearing stresses.

Pump cavity oil bath extends pump life by reducing heat, improving lubrication and reducing wear.

Self-priming, high-flow 1st stage pump increases pump performance by super-charging the 2nd stage piston pump — improving oil flow in both hot and cold weather operation.

Balanced rotating components reduce vibration creating a smoother running pump — reducing wear, friction and sound levels.

Replaceable piston check-valves increase service life of major pump components.

Ergonomic low-voltage pendant features sealed switches and operates at 24 VDC for improved operator safety.

Back-lit LCD on select Z-Class pumps

- pump usage information, hour and cycle counts
- low-voltage warning and recording
- offers self-test and diagnostic capabilities
- information displayed in six languages
- pressure read-out (when used with the optional pressure transducer)
- adjustable trigger pressure setting (when used with the optional pressure transducer)

Back-lit LCD available on ZU and ZE-Series Electric Pumps ▶

Z-Class factory installed options & accessories

Extensive list of accessories including heat exchanger, roll-bars, skid bar, pressure transducer, return line filter and level and temperature switches, allow complete pump control over a wide range of industrial applications.

Z-Class electric pumps for your application

Available in one flow range for universal motor and four flow ranges for induction motor. Choose from single or two-stage models to provide the optimum cylinder and tool performance for almost any industrial application.

ZU4 Series Pump Applications

- **Mobile:** when frequent pump transport is required and/or on remote locations
- **Universal motor:** 1-phase, runs well under poor voltage supply, using generator power supply or using long extension cord
- **Duty-cycle:** for intermittent applications
- **Cylinders and tools:** for medium to large size single and double-acting applications and high speed.

ZE Series Pump Applications

- **Stationary:** when pump remains in one location
- **Induction motor:** 1 and 3-phase for high-cycle usage
- **Duty-cycle:** for heavy-duty, extended cycle application
- **Cylinders and tools:** for medium to large size single- and double-acting applications and high speed

200	ZG6	—	—	17	114

* ZE4T, ZU4T, ZA4T and ZE5T-Series are Torque Wrench Pumps.

**ZG5 is available in two 4-cycle engine sizes: 7.1 Ft.lbs Honda and 8.5 Ft.lbs Briggs & Stratton.

▼ Shown from left to right: ZU4304MB, ZU4420SB-H, ZU4304PB-K

Z Tough.
Dependable.
Innovative.
CLASS

- Features **Z-Class** high-efficiency pump design; higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Powerful 1.7 hp universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, molded composite shroud protects motor and electronics, while providing an ergonomic, non-conductive handle for easy transport
- Low-voltage pendant provides additional safety for the operator (remote control units)

Pro-Series pump only

- LCD readout provides pressure and a number of diagnostic and readout capabilities never before offered on a portable electric pump
 - pump usage information, hour and cycle counts
 - self-test, diagnostic and read-out capabilities
 - pressure readout and auto-mode pressure settings

◀ Designed to be tough, the ZU4-Series with steel reservoirs will take the abuse of today's construction sites.

▼ COMMON PUMP MODELS

For technical information and other options see next page.

BASIC PUMP TYPES

Select the model that suits your application. For special requirements contact your Enerpac office.

Manual Valve

- Ideal choice for most applications
- Manual valve control, for single-acting or double-acting applications
- Motor control on shroud

Manual Valve with Pendant

- For light production and lifting applications
- Manual valve control for single-acting or double-acting cylinders
- Low-voltage control pendant with 10-ft. cord for remote motor operation

Dump Valve

- Ideal for punching, crimping and cutting
- For use when load-holding is not required
- Low-voltage control pendant with 10-ft. cord controls valve and motor

Solenoid Valve

- Ideal for lifting applications and where remote control is required
- Motor runs continuously on pumps with VE33 and VE43 valves. With VE32 valve, motor only runs during the advance function, while holding and retracting, the motor is off
- Low-voltage control pendant with 10 ft. cord for remote motor and valve operation

Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides high

by-pass pressures for increased productivity—important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools.

Enerpac ZU4 Hydraulic Pumps are built to power small to large-sized cylinders or hydraulic tools, or wherever high-speed, intermittent duty, remote hydraulic power is needed.

Classic Electric Pump

- The *Classic* has traditional electro-mechanical components (transformers, relays and switches) in place of solid-state electronics. The *Classic* delivers durable, safe

and efficient hydraulic power for demanding markets like construction, post-tensioning and foundation repair.

Standard Electric Pump

- For applications that do not require digital display features of the Premium Pump. Available in all manual or jog versions.

Pro Electric Pump

- Digital (LCD) display features a built-in hour meter and shows self-diagnostic, cycle-count and low voltage warning information. Pressure can also be displayed when the pump is equipped with an optional pressure transducer.

ZU Series

Reservoir Capacity:

1.0-10.0 gal.

Flow at Rated Pressure:

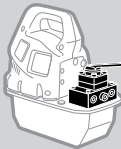

60 in³/min.

Motor Size:

1.7 hp

Maximum Operating Pressure:

10,000 psi

¹⁾ CE conformity marking only applies to pumps with an "E" suffix. "E" voltage versions also meet all requirements of the European EMC-Directive.

²⁾ See valves section for technical information on valve types.

³⁾ See custom order matrix for other voltage options.

⁴⁾ Subtract 3 lbs. for STD Electric models.

ZU Series, Specifications and Dimensions

ZU4 Performance							
Motor Size (hp)	Output Flow Rate (in ³ /min)				Motor Electrical Specification (volts-ph-Hz)	Sound Level (dBA)	Relief Valve Adjustment Range (psi)
	100 psi	700 psi	5000 psi	10,000 psi			
1.7	700	535	76	60	115-1-50/60 230-1-50/60	85-90	2,000-10,000

ZU-4 Series with 1 and 2 gallon reservoirs

ZU-4 Series with 2.5, 5.0 and 10.0 gallon reservoirs

(Left view shown without side handle)

- ① User adjustable relief valve
- ② Oil fill port, SAE#10
- ③ Oil level sight gauge
- ④ Oil Drain, 1/2" NPTF
- ⑤ M8 x 1.25
- ⑥ Handles on all 2.5, 5.0, and 10.0-gallon reservoirs

Factory installed features and options

- ⑦ Back-lit LCD Electric
- ⑧ Pressure transducer
- ⑨ Heat exchanger
- ⑩ Skid bar
- ⑪ Handle guard installed on all 2.5, 5, and 10-gallon reservoirs
- ⑫ Reservoir handles included on all 2.5, 5 and 10-gallon pumps

◀ Increased output flow and extended brush life increase productivity for post-tensioning applications.

Usable Reservoir Capacity (gal)	Pump Dimensions (in)					
	A	B	C	D	E	F

10.0	21.7	10.6	15.7	19.9	22.7	18.9

CUSTOM BUILD YOUR ZU4 SERIES PUMP

If the ZU4 Series pump that would best fit your application cannot be found in the chart on page 91, you can easily build your custom ZU4 Series pump here.

▼ This is how a ZU-Series pump model number is built up:

Z	U	4	4	08	L	B	-	H	K	T	
1	2	3	4	5	6	7				8	
Product Type	Motor Type	Flow Group	Valve Type	Reservoir Size	Valve Operation	Voltage				Options and Accessories	

1 Product Type

Z = Pump Series

2 Motor Type

U = Universal electric motor

3 Flow Group

4 = 60 in³/min @ 10,000 psi

4 Valve Type (see page 128 for more details)

- 1** Dump (VE32D)
- 2** 3 way/2 position manual or electric (VM32 or VE32)
- 3** 3 way/3 position manual or electric (VM33 or VE33)
- 4** 4 way/3 position manual or electric (VM43 or VE43)
- 6** 3 way/3 position locking manual w/po check (VM33-L)
- 7** 3 way/2 position manual (VM22)
- 8** 4 way/3 position locking manual w/po check (VM43-L)
- 9** 4 way/3 position manual w/power seating (VM43-LPS)
- 10** 3 way/3 position manual, Venturi-Valve (VM33VAC)
- 11** 3 way/3 position electric, Venturi-Valve (VE33VAC)

5 Reservoir Size (useable capacity)

- 04** = 1.0 gallon
- 08** = 2.0 gallon
- 10** = 2.5 gallon (includes side handles)
- 20** = 5.0 gallon (includes side handles)
- 40** = 10.0 gallon (includes side handles)

6 Valve Operation

- D** = Dump (solenoid valve w/pendant and LCD Electric)
- J** = Jog (manual valve w/pendant and Standard Electric (i.e. w/o LCD)
- K** = Jog (manual valve w/pendant and LCD Electric)
- L** = Manual valve w/LCD Electric (w/o pendant)
- P** = Manual valve w/pendant and classic electric (i.e. w/o LCD)
- R** = Manual valve w/Classic electric (i.e. w/o LCD) [w/o pendant]
- M** = Manual valve w/Standard Electric (i.e. w/o LCD) [w/o pendant]
- S** = Solenoid valve w/pendant and LCD Electric

7 Voltage

- B** = 115V, 1 ph, 50/60Hz
- E** = 208-240V, 1 ph, 50/60 Hz (w/European plug and CE EMC compliant)
- I** = 208-240V, 1 ph, 50/60 Hz (w/NEMA 6-15 plug)

8 Options and Accessories (see page 94 for possibilities)

- F** = Filter
- G** = 0-15,000 psi gauge (2½") ¹⁾
- H** = Heat exchanger
- K** = Skidbar (1 and 2 gallon reservoirs only)
- L** = Level/temp switch ^{2) 3)}
- N** = No reservoir handles (includes lifting eyes)
- R** = Roll cage
- T** = Pressure transducer ²⁾
- U** = Foot switch

¹⁾ Pressure gauge not available on pump models with pressure transducer

²⁾ These options require LCD electric

³⁾ Not available on 1 and 2 gallon reservoirs

ZU Series

Reservoir Capacity:

1.0-10.0 gal.

Flow at Rated Pressure:

60 in³/min.

Motor Size:

1.7 hp

Maximum Operating Pressure:

10,000 psi

Speed Chart

To determine how a "Z" pump will operate your cylinder, see the Pump/Cylinder Speed Chart in the "Yellow Pages".

Page: **283**

Ordering Example

Model Number:

ZU4408LB-HKT

ZU4408LB-HKT is a 60 in³/min at 10,000 psi pump with a 4-way, 3-position manual valve, a 2 gal. (8-liter) reservoir, operates on 115V, 1ph, 50/60 Hz and is specified with optional LCD electrical panel, heat exchanger, pressure transducer and skid bar.

Torque Wrench Pumps

System matched air and electric pumps provide control to operate Enerpac Torque Wrenches.

Page: **212**

Assisted-Return Pumps

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder retraction speeds. ZU4 and ZE-Series pumps feature Venturi valve technology to facilitate the faster return of single-acting gravity return cylinders. See details on www.enerpac.com

Pressure Transducer*

- More durable than analog gauges (against mechanical and hydraulic shock)
- More accurate than analog gauges (0.5% full scale of pump)
- Calibration can be fine-tuned for certification
- “Set pressure” feature turns off motor at user defined pressure (or shifts valve to neutral on models with VE33/VE43 valves)
- Display pressure in psi, bar, or MPa

* Requires LCD Electric

Accessory Kit Model Number	Adjustable Pressure Range (psi)	Switch-point repeatability	Dead-band (psi)
ZPT-U4 *	50-10,000	± 0.5%	50

* Add suffix **T** for factory installation.

Level/Temperature Switch

- Ensures feedback on pump oil level and temperature
- Drop-in design allows for easy installation to pump reservoir
- Plugs directly into pump electrical enclosure
- Built-in thermal sensing shuts off pump when unsafe operating temperature is reached
- Oil level switch shuts down pump before oil reaches an unsafe operating level

Model Number	Operating Temperature (° F)	Maximum Pressure (psi)	Weight (lbs)
ZLS-U4	40-230	150	.11

* Add suffix **L** for factory installation.

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 132

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components section for a full range of gauges.

Page: 131

Foot Switch

- Hands-free remote control on solenoid dump and 3-position valves
- With 10-foot cord

Accessory Kit No.	Can be used on ZU4 Pumps with
ZCF-2 *	Solenoid VE-Series valves

* Add suffix **U** for factory installation.

Roll Cage

- Protects pump
- Provides greater pump stability

Accessory Kit Number	Fits on Reservoir
ZRC-04 *	1 and 2 gallon ¹⁾
ZRC-04H *	1 and 2 gallon ²⁾
ZRB-10 *	2.5 gallon
ZRB-20 *	5 gallon
ZRB-40 *	10 gallon

* Add suffix **R** for factory installation.

¹⁾ Without heat exchanger ²⁾ With heat exchanger

Ordering Example:

Model No. ZU4208BB-QR

Skidbar*

- Provides easy two-hand lift
- Provides greater pump stability on soft or uneven surfaces
- Also available as an add-on kit (model number SBZ-4)

* 1 and 2-gallon reservoirs only

Accessory Kit No.	For ZU-Series Pumps with Reservoir	Wt. (lbs)
SBZ-4 *	1-2 gal. w/o heat exchanger	4.9
SBZ-4L *	1-2 gal. with heat exchanger	5.5

* Add suffix **K** for factory installation.

ZU-Series Factory Installed Options and Accessories

ZU4-Series Options

Accessory Kits can be installed by the customer.

See chart below for all possible options on ZU4-Series pumps:

- **Classic Electric,**
 - **Standard (STD) Electric (no LCD)**
 - **Pro Electric (with LCD).**
- Refer to page 93 for ordering matrix.

ZU4-Series Options	Factory Installed			Accessory Kits		
	Classic Electric	Standard Electric	Pro Electric	Classic Electric	Standard Electric	Pro Electric
Return Line Filter	F	F	F	ZPF	ZPF	ZPF
Skid Bar ¹⁾	K	K	K	SBZ	SBZ	SBZ
Roll Cage	R	R	R	ZRC	ZRC	ZRC
Heat Exchanger	H	H	H	ZHE	ZHE	ZHE
Pressure Gauge	G	G	G	G	G	G
Pressure Transducer	-	-	T	-	-	ZPT-U4
Level/Temperature Switch	-	-	L	-	-	ZLS-U4
Foot Switch	-	-	U	-	-	ZCF-2

¹⁾ Skid Bar not in combination with Roll Cage.

ZU Series

Reservoir Capacity:

1.0-10.0 gal.

Flow at Rated Pressure:

60 in³/min.

Motor Size:

1.7 hp

Maximum Operating Pressure:

10,000 psi

Return Line Filter

- 25 micron nominal filter removes contaminants from return oil flow before allowing it back into tank
- Internal by-pass valve prevents damage if filter is dirty
- With maintenance indicator

Accessory Kit Model Number	Maximum Pressure (psi)	Maximum Oil Flow (GPM)	By-pass Setting (psi)
ZPF *	200	12.0	25

* Add suffix **F** for factory installation.

Heat Exchanger

- Removes heat from the bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life, and reduces wear of pump and other hydraulic components

Accessory Kit No. *	Can be used on
ZHE-U115	115V pumps
ZHE-U230	230V pumps

* Add suffix **H** for factory installation.

Heat Exchanger

- Extends system life
- Stabilizes oil temperature at a maximum of 130° F at 70° F ambient temperature.

Do not exceed maximum oil flow and pressure ratings. Heat exchanger is not suitable for water-glycol or high water based fluids.

Thermal Transfer *	Maximum pressure (psi)	Maximum oil flow (GPM)	Voltage (VDC)
Btu/h			
900	900	7.0	12

* At GPM at 70 °F ambient temperature.

			—	●	●	●	●	VE43	10.0

* Models in this chart are 115 VAC, 1-phase at 50/60 Hz for ZE3-4 or 220 VAC, 3 phase at 50/60 Hz for ZE5-6. For other options, please refer to the ZE Pump ordering matrix. ** See Valve Section for technical information.

ZE-Series Electric Pumps

- Features **Z-Class** high-efficiency pump design; higher oil flow and by-pass pressure, cooler running and requires 18% less current draw than comparable pumps
- Totally enclosed, fan-cooled industrial electric motors supply extended life and stand up to harsh industrial environments
- Low-voltage pendant, on certain models, provides additional safety for the operator
- Multiple valve and reservoir configurations provide application specific models to match the most demanding industrial applications
- High-strength, molded electrical enclosure protects electronics, power supplies and LCD readout from harsh industrial environments
- LCD readout provides a number of diagnostic and readout capabilities never before offered on an industrial pump (included with electric valve models, optional on other models)
- IP54 Rating for superior dust and water protection

ZE Series

Reservoir Capacity:

1.0-10.0 gal.

Flow at Rated Pressure:

40-200 in³/min

Motor Size:

1.0-7.5 hp

Maximum Operating Pressure:

10,000 psi

User Adjustable Relief Valve

All VM and VE-Series have a user adjustable relief valve to allow the operator to easily set the optimum working pressure.

Locking Valves

For applications requiring positive load holding, VM-Series valves (except VM32) are available with a pilot-operated check valve. This provides hydraulic locking of the load until the valve is shifted into the retract position. To order this feature on your ZE-series pump see the valve type in the order matrix.

Page: 99

Single-Stage or Two-Stage

Choose single-stage pumps for applications that require constant flow regardless of pressure, such as testing or clamping.

Two-stage pumps have an increased output flow at low pressure to allow fast movement towards the load, for reduced cycle times and increased productivity. To specify a single-stage pump, place the letter "S" at the end of the model number.

For example: **ZE5320LG-S**

ZE3 Series (1.0 hp) Output Flow Rate at 10,000 psi: 40 in ³ /min		ZE4 Series (1.5 hp) Output Flow Rate at 10,000 psi: 60 in ³ /min		ZE5 Series (3.0 hp) Output Flow Rate at 10,000 psi: 120 in ³ /min		ZE6 Series (7.5 hp) Output Flow Rate at 10,000 psi: 200 in ³ /min

ZE5	Single-stage	128	126	123	120	2.5, 5, 10	3.0	1750	1000-10,000	75
	Two-stage	850	825	123	120					
ZE6	Single-stage	220	215	210	200	2.5, 5, 10	7.5	3450	1000-10,000	80
	Two-stage	900	890	210	200					

Output flow rate is listed at 60 Hz. Flow rate will be approximately $\frac{5}{6}$ of these values at 50 Hz.

ZE-Series Pumps with 1 and 2 gallon-reservoir

ZE-Series Pumps with 2.5, 5, 10-gallon reservoir

- ① User-adjustable relief valve on all manual and solenoid valves:
3/8" NPTF on A and B ports
1/4" NPTF on auxiliary ports
- ② Electric Box (Optional w/manual valve)
- ③ Heat Exchanger (Optional)
- ④ Roll Bar (Optional)
- ⑤ Return Line Filter (Optional)
- ⑥ Skid Bar (Optional)
- ⑦ Oil Drain
- ⑧ Oil Level/Temperature Switch (Optional)

Reservoir Size (useable oil) (gal)	ZE-Series Pump Dimensions (in)						
	A	B	C	D	D1	E	H
1.0	5.6	11.0	6.0	-	-	-	20.2

ZE Series Electric Pump Ordering Matrix

CUSTOM BUILD YOUR ZE SERIES PUMP

If the ZE Series pump that would best fit your application cannot be found in the chart on page 97, you can easily build your custom ZE Series pump here.

▼ This is how a ZE Series Pump model is built up:

1 Product Type

Z = Pump Class

2 Prime movers

E = Induction Electric Motor

3 Flow Group

- 3** = 40 in³/min @ 10,000 psi
- 4** = 60 in³/min @ 10,000 psi
- 5** = 120 in³/min @ 10,000 psi¹⁾
- 6** = 200 in³/min @ 10,000 psi¹⁾

4 Valve Types

- 0** = No valve w/cover plate
- 1** = Dump (VE32D)
- 2** = 3-way/2-position manual (VM32)
- 3** = 3-way/3-position manual or electric (VM33 or VE33)
- 4** = 4-way/3-position manual or electric (VM43 or VE43)
- 6*** = 3-way/3-position locking manual w/po check (VM33L*)
- 7** = 3-way/2-position manual (VM22)
- 8** = 4-way/3-position locking manual w/po check (VM43L)
- 9** = 4 way/3 position manual w/ power seating (VM43-LPS)
- 10** = 3-way/3-position manual, Venturi-Valve (VM33VAC)
- 11** = 3-way/3-position electric, Venturi-Valve (VE33VAC)

5 Useable Oil Capacity

- 04** = 1.0 gallon ²⁾
- 08** = 2.0 gallon ²⁾
- 10** = 2.5 gallon
- 20** = 5.0 gallon
- 40** = 10.0 gallon

6 Valve Operation

- D** = Dump valve (w/ pendant and LCD)
- L** = Manual valve (w/o pendant, w/ LCD)
- M** = Manual valve ⁶⁾ (w/o pendant or LCD)
- N** = No valve ⁶⁾ (no electrical box)
- S** = Solenoid valve (w/ pendant and LCD)
- W** = No valve (w/o pendant and LCD)

7 Voltages

Single Phase

- B** = 115V 1 ph 50-60Hz ³⁾
- E** = 115V 1 ph 50-60Hz ³⁾
- E** = 208-240V 1 ph 50-60 Hz European Plug
- I** = 208-240V 1 ph 50-60 Hz USA Plug

Three Phase ⁶⁾

- M** = 190-200V 3ph 50-60Hz
- G** = 208-240V 3ph 50-60Hz
- W** = 380-415V 3ph 50-60Hz
- K** = 440V 3ph 50-60Hz
- J** = 460-480V 3ph 50-60Hz
- R** = 575V 3ph 60Hz

8 Options and Accessories

(see page 100 for possibilities)

- F** = Filter
- G** = 0-15,000 psi gauge (2 1/2" ⁶⁾)
- H** = Heat exchanger
- K** = Skid bar (1 and 2 gal. reservoirs only)
- L** = Level/temp switch ⁴⁾
- N** = No reservoir handles (includes lifting eyes)
- R** = Roll cage
- S** = Single stage
- T** = Pressure transducer ^{4) 7)}
- U** = Foot switch ⁴⁾

1) ZE5 and ZE6 series pumps only available with 3-phase motors.

2) 1 and 2-gallon reservoirs only available on ZE3 and ZE4-series pumps.

3) 115-volt pumps are supplied with 15-amp plug for intermittent use. 20-amp circuit recommended for frequent full pressure use.

4) These options require LCD electrical package. Pressure switch option only available on manual valves without locking valve. The LCD electrical package can accept either a pressure switch or pressure transducer, but not both.

5) Not available with 1 and 2-gallon reservoirs.

6) Standard Electric models with 3-phase motors are shipped without cord, motor starter or overload protection.

7) Pressure gauge not available on pump models with pressure transducer. Pressure transducer provides digital pressure readout on LCD display.

* Not available on ZE5 or ZE6 Series Pumps

ZE Series

Reservoir Capacity:

1.0-10.0 gal.

Flow at Rated Pressure:

40-200 in³/min.

Motor Size:

1.0-7.5 hp

Maximum Operating Pressure:

10,000 psi

Ordering Example 1

Model Number: ZE4420MB

ZE4420MB is a 60 in³/min, 10,000 psi pump with a 4-way, 3-position manual valve, a 5-gallon reservoir, operates on a 115 VAC 1-ph 50/60 Hz motor and includes standard electrical package.

Ordering Example 2

Model Number: ZE6440SG-HNU

ZE6440SG-HNU is a 200 in³/min, 10,000 psi pump with a 4-way, 3-position electric valve, a 10-gallon reservoir, operates on a 230 VAC, 3-ph, 50/60 Hz motor. It includes LCD electrical package and foot switch on 10-ft cord, no reservoir handles and the optional heat exchanger.

Assisted-Return Pumps

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder retraction speeds. ZU4 and ZE-Series pumps feature Venturi valve technology to facilitate the faster return of single-acting gravity return cylinders. See details on www.enerpac.com

Electric Box ¹⁾

- Back-lit LCD
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Pressure read-out ²⁾
- Auto-mode pressure setting ²⁾
- Information can be displayed in six languages ³⁾

¹⁾ Included on pumps with solenoid valves. Can be factory installed on pumps with manual valve

²⁾ When used with optional pressure transducer

³⁾ English, French, German, Italian, Spanish and Portuguese

Level/Temperature Switch ⁴⁾

- Shuts down pump before oil level reaches an unsafe level, avoiding damage due to cavitation
- Shuts down pump when unsafe oil temperature is reached
- Ideal if pump is used in remote area without visual access to oil level

⁴⁾ 24 V, requires Electric Box. Available for 2.5, 5 and 10 gallon reservoirs

Accessory Kit Model Number	Fixed Temperature Signal (°F)	Operating Temperature (°F)	Max. Pressure (psi)
ZLS-U4 *	75	40 - 230	150

* Add suffix **L** for factory installation, see ordering matrix.

Return Line Filter

- 25 micron nominal filter removes contaminants from return oil flow before allowing it back into tank
- Internal by-pass valve prevents damage if filter is dirty
- With maintenance indicator
- Replaceable filter element PF25

Accessory Kit Model Number	Maximum Pressure (psi)	Maximum Oil Flow (GPM)	By-pass Setting (psi)
ZPF *	200	12.0	25

* Add suffix **F** for factory installation, see ordering matrix.

Roll Cage

- For easy portability and hoisting
- Protects pump and electric box
- Available for all reservoir sizes

Accessory Kit Number	Fits on Reservoir
ZRC-04 *	1 and 2 gallon ¹⁾
ZRC-04H *	1 and 2 gallon ²⁾
ZRB-10 *	2.5 gallon
ZRB-20 *	5 gallon
ZRB-40 *	10 gallon

* Add suffix **R** for factory installation, see ordering matrix.
¹⁾ Without heat exchanger ²⁾ With heat exchanger

Skid Bar

- Provides easy two-hand lift
- Provides greater pump stability on soft or uneven surfaces

Accessory Kit Number	For ZE-Series Pumps with Reservoir	Weight (lbs)
SBZ-4 *	1-2 gal. w/o heat exchanger	4.9
SBZ-4L *	1-2 gal. with heat exchanger	5.5

* 1 and 2 gallon reservoirs only. Add suffix **K** for factory installation, see ordering matrix.

Foot Switch ⁵⁾

- Hands-free remote control on solenoid dump and 3-position valves
- With 10-foot cord

⁵⁾ 15 V, requires Electric Box

Accessory Kit Number	Can be used on ZE-Series Pumps with
ZCF-2 *	Solenoid VE-Series valves

* Add suffix **U** for factory installation, see ordering matrix.

ZE-Series, Factory Installed Options & Accessories

Pressure Transducer ¹⁾

- Displays pressure on LCD in bar, MPa or psi
- More accurate than analog gauge
- Calibration can be fine-tuned for certification
- Easy-viewing variable rate display
- “Set pressure” feature turns off motor at user defined pressure (or shifts valve to neutral on models with VE33/ VE43 valves)

¹⁾ 24 V, requires Electric Box

Accessory Kit Model number	Adjustable Pressure Range (psi)	Switch-point Repeat-ability	Dead-band (psi)
ZPT-U4 *	50-10,000	± 0,5%	50

* Add suffix **T** for factory installation, see ordering matrix.

Pendants ⁴⁾

- For pump types with valve operation “W” (No Valve, with Electric Box, without pendant)

⁴⁾ When ordering Enerpac VE-Series solenoid valve, the pendant must be ordered separately. Pendant connection to be plugged into electric box

Pendant Model Number	To be used with Solenoid Valve:
ZCP-1	VE32D
ZCP-3	VE32, VE33, VE43

Pressure Switch ^{2) 3)}

- Controls pump, monitors system
- Adjustable pressure 500-10,000 psi
- Includes glycerin filled, 15,000 psi pressure gauge, G2536L
- Accuracy ± 1,5% of full scale

²⁾ 24 V, requires Electric Box. Not available in combination with pressure transducer.

³⁾ Not available on LCD electronics

Accessory Kit Model number	Switch-point Repeat-ability	Deadband (psi)	Oil Ports (NPT)
ZPS-E3 *	± 2%	115-550	3/8"

* Add suffix **P** for factory installation, see ordering matrix.

Heat Exchanger ⁵⁾

- Removes heat from bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life, and reduces wear of pump and other hydraulic components

⁵⁾ 24 VDC, requires electric box

Accessory Kit Model number	Fits on Reservoir	Weight (lbs)
ZHE-E04 *	1 and 2 gallon	9.0
ZHE-E10 *	2.5, 5, and 10 gallon	9.0

* Add suffix **H** for factory installation, see ordering matrix.

Options

Accessory Kits can be installed by customer. See chart below for options on Standard Electric (without electric box) or LCD Electric (with electric box). Refer to page 99 for ordering matrix.

ZE-Series Options	Factory Installed		Accessory Kits	
	Std. Electr.	LCD Electr.	Std. Electr.	LCD Electr.
Return Line Filter	F	F	ZPF	ZPF
Skid Bar ¹⁾	K	K	SBZ	SBZ
Roll Cage	R	R	ZRB	ZRB
Single-stage	S	S	–	–
Heat Exchanger	–	H	–	ZHE
Pressure Gauge ²⁾	G	G	–	–
Pressure Switch ³⁾	–	P	ZPS-E3	–
Pressure Transducer ⁴⁾	–	T	–	ZPT-U4
Level/Temp Switch ⁵⁾	–	L	–	ZLS-U4
Foot Switch ⁶⁾	–	U	–	ZCF-2

¹⁾ Available for 1 and 2 gallon reservoirs.

²⁾ Not available on pumps with pressure transducer.

³⁾ Includes 14,500 psi gauge. Only available on manual valves without locking feature.

⁴⁾ Electric box can accept either pressure switch or pressure transducer, but not both.

⁵⁾ Available for 2.5, 5, 10, gallon reservoirs.

⁶⁾ For control of solenoid dump and 3-position valves.

ZPT-U4 Pressure Transducer

More durable against mechanical and hydraulic shock than analog gauges.

- Digital pressure read-out provides accuracy of 5% of full scale.
- Easy-viewing variable rate display automatically varies increments between 44, 203, 508 and 2103 psi as rate of pressure change increases.
- “Set pressure” feature turns off motor at user defined pressure (or shifts valve to neutral on VE33 and VE43 valves).

ZHE-Series Heat Exchangers

Heat exchanger stabilizes oil temperature at 130° F at 70° F ambient temperature. Thermal transfer at 5 GPM and 70° F ambient temperature: 900 Btu/hour.

Do not exceed maximum oil flow of 7.0 GPM and maximum pressure of 300 psi. Not suitable for water-glycol or high water based fluids.

▼ Shown: **PEM-8418**

- Panel-mounted pressure gauge and adjustable relief valve for system pressure control
- Two-speed pump design, with high by-pass pressure, for rapid cylinder advance
- Dual-voltage motor (230/460 VAC, 3-phase, 60 Hz)
- Full length reservoir sight tube with integral thermometer for ease in monitoring oil level and temperature
- Low voltage controls to protect the pump operator

The Largest Pump for the Largest Jobs

Locking Valves

Pumps with VM-4 manual valves are available with VM-4L manual valves for positive load holding. Add suffix "L" to pump model number.

Page: 126

FS-34 Foot Control Switch

This 3-position switch allows hands-free control of the solenoid valve on the pump. Operates 24V and

115V valves that use the square electrical connector.

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 132

◀ With similar specifications, a gasoline-powered EGM-8000 Series is shown here performing a synchronized lift.

8000-Series Electric Pumps

About the 8000 Series

The 8000 Series is the largest pump in the Enerpac line and the best choice to power most large size cylinders, multiple cylinder circuits, and applications where the need for high speed requires high flow rates.

The 8000 Series, with its large reservoir capacity, is best suited for large jobs and may be the only solution because of the required oil capacity.

For further application assistance see our "Yellow Pages", or consult your local Enerpac office.

PE Series

Reservoir Capacity:

25 gal.

Flow at Rated Pressure:

2.0 gal/min.

Motor Size:

12.5 hp

Maximum Operating Pressure:

10,000 psi

Dimensions shown in inches.

Speed Chart

To determine how an 8000-Series pump will operate your cylinder, see the Pump/Cylinder Speed Chart in the "Yellow Pages".

Page: **283**

OIL FLOW vs. PRESSURE

▼ Shown from top to bottom: PA-1150, PA-133

PA Series

Reservoir Capacity:

36-80 in³

Flow at Rated Pressure:

8 in³/min.

Maximum Operating Pressure:

10,000 psi

PC-66 Reservoir Conversion Kit

Double the reservoir capacity of your existing PA-133 with this easy to install conversion kit.

- Rugged construction – built for long life and easy service
- Swivel coupling simplifies hydraulic connection and pump operation
- Three-position treadle provides cylinder advance, hold and retract operation
- PA-133 operates in all positions for increased versatility in use and mounting
- Base mounting slots provided on PA-133

OIL FLOW vs. PRESSURE

Dimensions shown in inches.

Used with Cylinder	Usable Oil Capacity (in ³)	Model Number	Pressure Rating (psi)	Output Flow Rate (in ³ /min)		Valve Function	Air Pressure Range* (psi)	Air Consumption (scfm)	Sound Level (dBA)	Weight (lbs)

* Recommended Regulator-Filter-Lubricator: RFL-102

▼ Shown left to right: PAMG-1402N, PATG-1102N, PARG-1102N, PATG-1105N

- High efficiency cast aluminum air motor for increased life and reduced air consumption
- Fully serviceable air motor assembly
- Reinforced heavy-duty reservoir for applications in tough environments
- New generation air-saver piston with rugged one-piece design reduces air consumption and operating costs
- Return-to-tank port for use in remote valve applications
- Quiet – only 76 dBA with low air consumption of 12 scfm
- Operating air pressure: 40-125 psi, enables pump to start at extremely low pressure
- Internal pressure-relief valve provides overload protection

Compact Air Over Hydraulic

RFL-102 Regulator-Filter-Lubricator

Recommended for use with all air pumps. Provides clean, lubricated air and allows

for air pressure adjustment. Steel bowl guards are standard.

Order model number ¹⁾

RFL102

Large Reservoir Models

The Turbo II Air Pump is also available with a larger reservoir: **PATG-1105N**, **PAMG-1405N**, and **PARG-1105N**.

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Turbo II Air Hydraulic Pumps

PATG PARG PAMG Series

Reservoir Capacity:
150-305 in³

Flow at Rated Pressure:
5-10 in³/min.

Maximum Operating Pressure:
10,000 psi

The PATG-models use a foot or hand-operated treadle to control air and valve functions.

The PAMG-models use a treadle with a locking feature and a 4-way manual valve.

The PARG-models use a 15-ft. pendant hose for convenient one-man operation.

PATG-1102N and PATG-1105N

PAMG-1402N and PAMG-1405N

Control and Ergonomics

- Higher oil flow for increased productivity
- Variable oil flow and fine metering for precise control
- Ergonomic design for less operator fatigue
- Closed hydraulic system prevents contamination and allows pump usage in any position
- Pedal lock function for retract position
- External adjustable pressure setting valve
- ATEX Certified.* Includes ground screw for explosion protection

* See explanation of ATEX Certification in "Yellow Pages."

▼ Easily operated by foot. No need to fully lift up foot - rest body weight on heel, resulting in a hands-free and stable working position.

Optional Pressure Gauge

Integrated gauge with calibrated scale reading in psi, bar and MPa for actual pressure reading.

Optional 4-Way 3-Position Valve

For powering double-acting hydraulic cylinders and tools.

Optional 1/2 Gallon Reservoir

Double oil capacity for powering larger hydraulic cylinders and tools.

"Joy-stick" Lever Kit

Customer installed set of handles for manual operation of both pedals.

Order model number ¹⁾

XLK1

Hydraulic Swivel Connector

Customer installed swivel connector for optimal orientation of the hydraulic hose.

Order model number ¹⁾

XSC1

¹⁾ Accessories must be ordered separately.

Air Driven Hydraulic Pumps

PRODUCTION APPLICATION

XA11 pump is used with a 13-ton hollow cylinder to compress and position diesel engine valve springs.

The operator benefits from the fine metering capabilities to apply the mandatory precise stroke and force.

XA Series

Reservoir Capacity:

61-122 in³

Flow at Rated Pressure:

15 in³/min.

Air Consumption:

10-35 scfm

Maximum Operating Pressure:

10,000 psi

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system,

specify only genuine Enerpac hydraulic hoses.

Page: **118**

- Features Z-Class high efficiency pump design, higher oil flow and bypass pressure
- Two-speed operation and high by-pass pressure reduces cycle time for improved productivity
- Internal relief valves. One is factory set for overload protection while the second is user adjustable for pre-setting maximum system pressure
- Sight gauge on 1 and 2-gallon and level gauge on 2.5, 5 and 10-gallon reservoirs allow quick and easy oil level monitoring
- Optional heat exchanger warms exhaust air to prevent freezing and cools the oil

▼ Shown: **Level Lift System**

The Safe, Easy Solution for Multi-Point Lifts

Level Lift System

Enerpac's **Level Lift** is offered as a fully configured system including pump, hoses, gauges, and cart. *Excludes hydraulic cylinders.*

- Lifts and lowers uneven loads*
- Robust solution for demanding field use conditions—eliminates the need for electronics or sensors at each lift point
- Controls up to four lift points
- Single point of control reduces risk of operator miscommunication
- Simple, intuitive, easy-to-operate design

Patents pending

**Requires cylinders with matching effective areas*

Pendant

The **Level Lift System** features an easy-to-use 3-button pendant control.

Gauges

Gauges are conveniently located on the cart for easy monitoring by the operator.

◀ *Level Lift System provided a safe, fast lifting solution during the rebuild of an off-highway vehicle.*

Level Lift System

How Level Lift Works

When the Level Lift System is operated, uneven loads are moved evenly, during both

lifting and lowering operations.

The output flow from the pump is directed to the Level Lift Valve via the Lift/Lower valve. The Level Lift valve contains small pistons, which on each cycle, send a fixed volume of oil to each cylinder as it is lifting or lowering.

This allows each cylinder to be raised or lowered by the same amount regardless of the distribution of the weight, or the resulting pressure on each cylinder — **each cylinder must have the same effective area.**

LL Series

Number of Lift Points:

4 points

Maximum Operating Pressure:

10,000 psi

Level Lifting and Lowering of Uneven Loads

Fixed volume of oil to each cylinder (0.8 in³/cycle) regardless of pressure or load size at each lift point.

Dimensions are in inches.

Cart Features

- Field proven, preprogrammed ZE4 semi-automated pump with 5-gallon reservoir

- Pendant control
- Simple Lift/Lower Valve (for lifting and lowering)
- Stores four, 50-foot long x 3/8" internal diameter hoses (included)
- Built-in forklift runners for easy transportation
- Large diameter pneumatic tires for easy maneuverability and positioning
- Cart-locking mechanism to prevent unintended movement

Cylinder Compatibility

The **Level Lift System** is compatible with a wide range of Enerpac single-acting cylinders.

Not recommended for use with cylinders lower than 10-ton capacity or LPL, RSM and RCS-Series Cylinders.

Contact Enerpac for further details.

Model Number	Voltage	Oil Displacement (Per cycle of Level Lift Valve)	Wt.
		(in ³)	(lbs)
LL4CE	208-240V, 1 ph, 50 Hz	0.80	651
LL4CB	115V, 1 ph, 60 Hz	0.80	651

▼ SFP421SJ and SFP404SJ (Gauges and retract valves not shown)

- 2, 4, 6 or 8 split-flow outlets
- Individual or simultaneous operation of valves, with advance/hold/retract function
- Joystick (manual) controlled or pendant (solenoid) controlled valves
- Flow per outlet ranging from 20 to 305 in³/min at 10,000 psi
- For double- and single-acting cylinders
- Adjustable pressure relief valve per circuit
- Reservoir: 5, 10 or 40 gallons
- All models include pressure gauges

Multiple Outlets with Equal Flow for Lifting and Lowering

Typical Split-Flow Pump Applications

For lifting and lowering applications on multiple points, Split-Flow Pumps are a far better alternative than using independently operated pumps. Where synchronization of maximum 4% is acceptable, Split-Flow Pumps are a safe and economical solution.

The SFP-Series pumps feature both single and synchronized multiple outlet control either through joystick or pendant operation.

Application examples:

- Bridge deck lifting for bearing maintenance
- Stage lifting in construction and shipbuilding
- Skidding to move structures and buildings
- Levelling of constructions like wind turbines

▼ Step-by-step stage lifting an old windmill using double-acting RR-506 cylinders powered by a Split-Flow Pump.

Remote Control Pendant

Split-Flow Pumps with solenoid valves include a remote pendant with selector switches for each individual outlet, allowing single or multiple cylinder operation.

Hoses and Couplers

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac System Components.

Enerpac offers a wide variety of hydraulic pumps for all your custom needs.

Hydraulic pumps are at the heart of any hydraulic system. Different systems require different flow, pressure and control. Enerpac offers a wide variety of hydraulic pumps from small hand-operated pumps to large gasoline powered pumps. Still many applications require a customized pump to operate

the system. These may include larger reservoir capacity, custom valve configurations or added electrical controls.

Enerpac also specializes in power units and controls used for synchronous lifting/lowering of multiple jacking points.

CUSTOMIZABLE FEATURES:

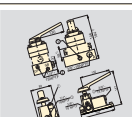

- Reservoir and Frame
- Valve Configurations
- Controls
- Oil Types
- Seals
- Pressure and Flow
- Coolers and Heaters
- Paint
- Motor Type
- Human Machine Interface (HMI)

Directional Control Valves Section Overview

Energpac hydraulic valves are available in a wide variety of models and configurations.

Whatever your requirements... directional control, flow control, or pressure control... you can be sure that Energpac has the correct valve to match your application exactly.

Designed and manufactured for safe operation up to 10,000 psi, the range of Energpac valves allows for direct pump mounting, remote mounting, manual or solenoid actuation, and in-line installation, giving you flexible solutions to control your hydraulic system.

For remote valve applications, see page 126.

Pump Mounted Directional Control Valves

All valves feature several gauge ports for “system”, A port and B port pressure monitoring. User-adjustable relief valves are included on all models to allow the operator to easily set the optimum working pressure for each application. VM33 and VE43 valves include “System Check” feature, for more precise pressure holding and improved system control. The VM33 has improved porting which provides faster cylinder retraction while motor is running.

VM, VE Series

Flow Capacity:

4.5 gal/min.

Maximum Operating Pressure:

10,000 psi

Model Number	Hydraulic Symbol	Schematic Flowpath			Weight (lbs)
		Advance	Neutral	Retract

See page 127 for product dimensions.

Assisted Return Pumps

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder retraction speeds. ZU4

and ZE-Series pumps feature Venturi valve technology to facilitate the faster return of single-acting gravity return cylinders. See details on www.enerpac.com

Locking Valves

For applications that require positive load holding, VM Series valves (except the VM22 and VM32 valve)

are available with a pilot-operated check valve. This option provides hydraulic locking of the load until the valve is shifted into the retract position.

To order this feature, place an “L” at the end of the model number.

Pendants for VE-Series Solenoid Valves

When ordering Enerpac VE-Series solenoid valves, the pendant must be ordered separately for Z-Class

pumps. Pendant connection to be plugged into electric box of pump.

To be used with solenoid valves:	Pendant
VE32D	ZCP-1
VE32, VE33, VE43	ZCP-3

▼ Shown from left to right: **VC-20, VC-4L**

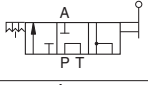

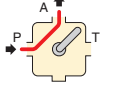

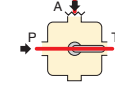

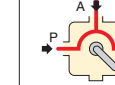

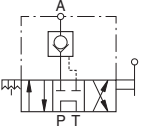

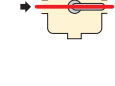

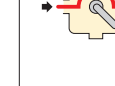

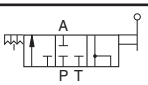

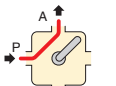

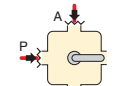

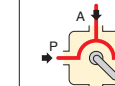

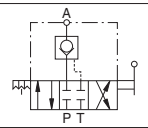

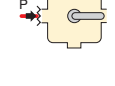

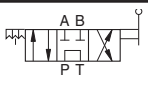

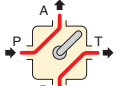

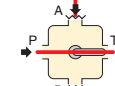

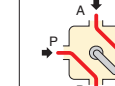

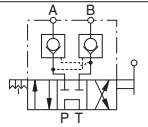

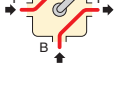

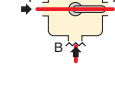

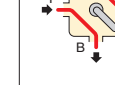

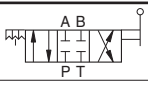

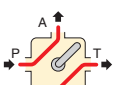

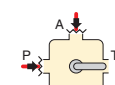

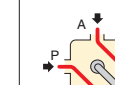

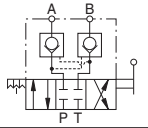

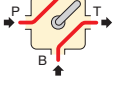

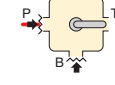

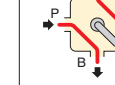

Reliable Remote Control

Locking Valves

For applications that require positive load holding, VC and VM Series valves are available with a pilot-operated check valve. This option provides hydraulic locking of the load until the valve is shifted into the retract position.

- **Advance/Hold/Retract operation for use with single-acting or double-acting cylinders**

* Requires use of tank port for dump or unloading.

Unmatched Combinations and Possibilities

3-Way Check Valve

Use a **VS-51** 3-way pilot operated check valve assembly to convert your 3-way modular valve into a load-holding valve.

4-Way Check Valve

Use a **VS-61** 4-way pilot operated check valve assembly to convert your 4-way modular valve into a load-holding valve.

System Pressure Control

To add system pressure control to your modular valve, order **VS-11 Relief Valve** assembly.

Bolt Kits for Accessory Valves With No Manifold

Order Bolt Kit **BK-2** when adding one of the accessory valves. Order Bolt Kit **BK-3**

when adding any combination of two accessory valves.

How to order one of the 1,300 possible model numbers?

With over 1,300 possible model numbers, Enerpac has the perfect valve for you. Use the "chart" to build your own valve for the specific application you require. This is the complete guide to all the Modular valves that are available.

Solenoid Operated Modular Valves

CUSTOM BUILD YOUR MODULAR VALVES

▼ This is how a Modular Valve Model Number is built up:

1	2	3	4	5	6
Solenoid Operated Valve	Valve Flow Path	Flow Capacity	Voltage	Accessory Valves	Manifold

1 Product Type

VE = Solenoid Operated Valve

2 Valve Code

A = 4/3 Open Center
B = 4/3 Closed Center
C = 4/3 Tandem Center
D = 4/3 Float Center
E = 4/2 Crossover Offset
F = 3/3 Tandem Center
G = 3/3 Closed Center
H = 2/2 Normally Closed
K = 2/2 Normally Open
M = 4/2 Float Offset
P = 3/2 Normally Open

3 Flow Capacity

1 = 4 gallons per minute

4 Voltage

1 = 24 VDC
2 = 220/240 V, 1 ph, 50 Hz
5 = 115 V, 1 ph, 60 Hz
6 = 230 V, 1 ph, 60 Hz

5 Accessory Valves

000 = No accessory valves
100 = Relief Valve only
150 = Relief Valve and 3-way pilot operated check valve
Only for VEF/VEG
160 = Relief Valve and 4-way pilot operated check valve
Only for VEA/VEB/VEC/VED
500 = 3-way pilot operated check valve
Only for VEF/VEG
600 = 4-way pilot operated check valve
Only for VEA/VEB/VEC/VED

6 Manifold

A = No manifold**
B = Remote Mounted
D = Pump Mounted*

* Only for valve code: **VEA/VEC/VEF**

** Must order Bolt Kit separately.

Example: VEA-15600-D

VEA-15600-D is a Modular Valve with a 4-way, 3-position open center flowpath, 115 VAC, and an integral pilot-operated check valve, for mounting on an Enerpac pump.

VE Series

Flow Capacity:

4 gal/min.

Maximum Operating Pressure:

10,000 psi

Pressure Drop versus Oil Flow

Modular Valve Pump Mounted ¹⁾ add 1.85 inch for each Accessory Valve

Modular Valve Remote Mount Manifold

Enerpac System Components —

All the additional components you need to complete your high pressure hydraulic system. Engineered to work with your Enerpac cylinders, pumps and tools. All Enerpac components are designed and manufactured to the most exacting standards.

With this complete line of hydraulic hoses, couplers, fittings, manifolds, oil and gauges Enerpac has the accessories to compliment your system and ensure the efficient operation, long life, and safety of your hydraulic equipment.

Yellow Pages

For sample system set-ups and how to correctly specify your system components, please view the Enerpac **Yellow Pages**.

Page: 273

Maintain System Integrity

Use Enerpac System Components, designed to interface with Enerpac Cylinders, Pumps and Tools to ensure your system operates at peak performance.

Emphasize Safety and Quality

To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

WARNING !

- Do not exceed 10,000 psi maximum pressure.
- Do not handle hoses while under pressure.

More safety instructions in our “Yellow Pages”.

Page: 274

Crimped-on rubber strain relief for improved life and durability on all models.

Thermo-plastic Hoses (700-Series)

- For demanding applications, featuring a 4:1 design factor
- Maximum working pressure of 10,000 psi
- Two layers of steel wire braids
- Outside jacket is polyurethane, to provide maximum abrasion resistance
- Exhibits low volumetric expansion under pressure to enhance overall system efficiency

Heavy-duty Rubber Hoses (900-Series)

- The most complete offering: 35 models up to 50 feet in length
- Rubber coated with two layers of steel wire braids
- Designed to comply with Material Handling Institute IJ-100 hose specification
- Flexible, with little “memory”, is the best choice for long hose runs

◀ To prevent back pressure and to increase cylinder retraction speed, when using long hoses, the Enerpac HC-7300 range of hoses with increased internal diameter is the best choice.

High Pressure Hydraulic Hoses

Hose Oil Capacity

When using long hose lengths, it is sometimes necessary to fill the pump reservoir after filling the hoses. To determine the hose oil capacity, use the following:

For .25" internal diameter hoses: Capacity (in³) = .5892 x Length (ft)

For .38" internal diameter hoses: Capacity (in³) = 1.3608 x Length (ft)

H700 H900 Series

Inside Diameter:

.25 and .38 inch

Length:

2-50 feet

Maximum Operating Pressure:

10,000 psi

3/8" High Flow Couplers

- Standard equipment on most Enerpac cylinders
- Recommended for use on all Enerpac pumps and cylinders where space and porting permits
- Include "2-in-1" dust cap for use on male and female coupler halves

3/8" High Flow "Flush-face" Couplers

- Featuring "Push-to-connect" operation, to guarantee good connection every time
- Flush-face, zero-leak operation for minimal spillage
- HTMA* recognized for safety and performance

3/8" Regular Spee-D-Coupler®

- For medium-duty applications; for use with hand pumps
- Includes female steel dust cap

1/4" Regular Coupler

- For use with small cylinders and hand pumps
- Includes female steel dust cap

1/4" Spin-on Torque Wrench Couplers

- For use with 10,000 psi S- and W-Series torque wrenches, THQ-Series hoses and 10,000 psi torque wrench pumps

* Hydraulic Tool Manufacturers Association

Quick Connection of Hydraulic Lines

Thread Sealer

To seal NPTF threads use one of the new anaerobic thread sealers or Teflon® paste. When using Teflon® tape, apply the tape one thread back from the end of a fitting to prevent it from entering the hydraulic system.

WARNING!

Couplers should be pressurized only when completely connected, and should not be coupled or uncoupled when pressurized.

More safety instructions in our "Yellow Pages".

Page: 274

S- and W-Series Torque Wrench Couplers

S- and W-Series Torque Wrenches require 1/4" spin-on couplers and THQ hoses.

Page: 206

▼ With the use of Enerpac High Flow Couplers, hoses are easily installed for multiple hydraulic line connections in this 34 points PLC-controlled lifting system.

Hydraulic Couplers

F-Series

Flush-faced couplers provide reduced pressure drop versus other types and are preferred in dirty, grimy construction and mining environments due to easy clean, non-dirt trapping faces.

Metal Dust Caps

Steel dust caps are available for the C-604 series couplers. Order model number: **CD-411M** for female half **CD-415M** for male half

Visual References for System Pressure and Force

Auto-Damper Valve V-10

For automatic control of gauge fluctuations, the **V-10** Auto-Damper Valve controls the movement of the gauge needle by restricting oil flow in and out of the gauge. No adjustments needed.

Page: 147

Snubber Valve V-91

Infinitely adjustable for metering oil out of a gauge. The **V-91** Snubber Valve is also suitable as a shut-off valve to protect the gauge during high cycle applications.

Page: 147

- GF-Series gauges are calibrated with dual scale reading for pressure and force
- Excellent readability; 4 inch diameter gauge face
- Fast, easy installation
- GF-Series gauges are glycerin filled
- Stainless steel gauge cases for corrosion resistance
- GP-Series gauges are calibrated with dual scale reading for psi and bar

▼ A GP-10S gauge is used on this press to check the hydraulic pressure required to bend a steel plate.

Hydraulic Force and Pressure Gauges

Load Gauges

To measure external load supported by a cylinder or jack. For pressing parts together under pre-determined loads, weighing, testing, etc.

Pressure Gauges

To measure the input pressure into cylinders, jacks or high pressure systems. Also for all testing applications.

GP-Series gauges are dry gauges.

GF-Series gauges are glycerin filled.

GF GP Series

Pressure Range:

0-15,000 psi

Face Diameter:

4 inch

Accuracy, % of full scale:

± 1%

All Models

Maximum Indicator Pointer

Indicator retains peak readings of pressure or force generated by the system.

Order model number:

H-4000G.

Can easily be installed on GP-Series dry gauges.

GA45GC Gauge Adaptor Assembly

45° angled gauge adaptor improves safety.

Page: 144

Gauge Adaptor

For easy gauge installation into almost any system, Enerpac offers a complete line of gauge adaptors.

Page: 145

Snubber Valve

Infinitely adjustable for metering oil out of a gauge. The V-91 Snubber Valve is also suitable as a shut-off valve to protect the gauge during high-cycle applications.

Page: 147

Glycerin Filled (G-Series)

- Calibrated in dual scale reading in psi and bar
- All pressure sensing parts sealed and dampened by glycerin for long life
- Includes safety blow-out disk and pressure equalizing membrane
- Gauge snubbers or needle valves recommended for high-cycle applications

High-Cycle Dry Gauges (H-Series)

- Calibrated in dual scale reading in psi and bar
- Ideal for use in many applications, specifically for high cycle and harsh environments
- Gauge snubbers or needle valves recommended to shut off gauge when not in use

◀ When lifting or pressing, always use a gauge. A gauge is your "window" to the system—it lets you see what's going on.

Cone Mount Gauge Adaptor

Contains fittings to connect .25" cone fitting gauge to .38" cone system.

Kit includes 43-301 tee, 43-704 gauge adaptor and 45-116 tubing.

Order model number: **83-011**.

Page: 79

Cone Mount Gauge Connector

For connecting gauges with .25" cone fitting directly to model number 11-100 or 11-400 pump. May be used with other .25" cone systems.

Order model number: **43-704**

Page: 79

- Calibrated for dual scale reading in psi and bar
- All gauges have spring-loaded backs with rubber blow-out plugs to protect case assembly in case of over-pressurization
- 40,000 and 50,000 psi models include flange mounting
- 1/2" NPTF versions are made of high-strength alloy steel
- .25" cone models are made of 316 stainless steel, with 403 stainless steel on 40,000 and 50,000 psi models
- Integral maximum indicator pointer standard on all gauges

▼ An Enerpac P-2282 hand pump equipped with a T-6011L test system gauge is used for proof pressure testing of hydraulic valves.

Your Hydraulic Control Solution

Valve Applications

To see these valves used in typical hydraulic circuits, please see our “Yellow Pages”.

Page: 264

▼ The V-152 Pressure Relief Valve limits the pressure or force developed in the hydraulic system.

- All valves are rated for 10,000 psi operating pressure
- All valves feature NPTF porting to insure against leakage at rated pressure
- All valves are painted, coated, or plated for corrosion resistance

Valve Dimensions in inches.

Flow and Pressure Control Valves

Premounted Manifold

For two or four port manifold with integral flow control valves, see the manifold page of the System Components section.

Page: 136

Fittings

For additional fittings see the fitting page of the System Components section.

Page: 137

V Series

Maximum Operating Pressure:

10,000 psi

Valve Type and Model Number		Description		Hydraulic Symbol
Needle Valve V-82 V-182F V-8F		V-82: To control cylinder speed. Can also be used as shut-off valve for temporary load holding. $\frac{3}{8}$ " NPTF female ports. V-182: Same as V-82, but with	$\frac{1}{4}$ " NPTF female ports. Also suitable for gauge snubbing. V-8F: Similar to V-82, but with very fine metering for precise flow control. Not recommended as shut-off valve.	
Snubber Valve V-91		V-91: Adjustable for metering oil out of a gauge to prevent snapping of gauge pointer when load or pressure is suddenly released. Also suitable as shut-off valve to protect	the gauge during high cycling applications. $\frac{1}{2}$ " NPTF male and female threads for use with GA-1, GA-2 or GA-4 gauge adaptors.	
Auto Damper® Valve V-10		V-10: To be used when gauge pressure must be monitored during high cycle applications. Creates a flow resistance when load is released suddenly.	No adjustments are necessary. $\frac{1}{2}$ " NPTF male and female threads for use with GA-1, GA-2 or GA-4 gauge adaptors.	
Check Valve V-17		V-17: Ruggedly built to resist shock and operate with low pressure drop. Closes smoothly without pounding. $\frac{3}{8}$ " NPTF female ports.		
Pilot Operated Check Valve V-42		V-42: Can be mounted at the cylinder to hold the load in case of system pressure loss. Normally used with double-acting cylinders where pilot port receives pressure	from a Tee-fitting in the cylinder retract line. $\frac{3}{8}$ " NPTF female ports. Pilot pressure ratio 14% (6.5:1).	
Manually Operated Check Valve V66, V66NV* V-66F		V-66, V66NV: For load holding applications with single- and double-acting cylinders. Valves allow oil to flow back to tank when cylinder retracts. V66NV with Viton seals, nickel-plated.	V-66F: Similar to V-66, but with very fine metering capability for precise flow control. V-66F not designed for load holding applications.	
Pressure Relief Valve V-152 V-152NV*		V-152: Limits pressure developed by the pump in hydraulic circuit, thus limiting the force created by other components. Valve opens whenever preset pressure is reached.	To increase pressure setting, turn handle clockwise. Includes: • 3 ft return line hose kit • $\pm 3\%$ repeatability • 800-10,000 psi adjustment range.	
Sequence Valve V-161		V-161: To control oil flow to a secondary circuit. Flow is blocked until system pressure rises to the V-161 setting. When this pressure level is reached, the V-161 opens to	allow flow to the secondary circuit. A pressure differential is always maintained between the primary and secondary circuit. Min. operating pressure: 2000 psi.	

* See page 54 for more information about products for use in high temperature and extreme environment applications.

Enerpac Hydraulic Presses are available in a wide variety of standard capacities and configurations, or you can “build your own” with the easy-to-use matrix.

The press frames are a welded construction for maximum strength and durability, and when combined with the power of high-pressure hydraulics, will provide years of safe and dependable service in your workshop.

Enerpac press capacities range from 10-ton to 200-ton and are available in Bench, C-Frame, Arbor, H-Frame and Roll-Frame models.

These press features increase productivity and broaden the range of applications:

Standard on many Enerpac IP Presses, the exclusive Hydra-Lift™ offers effortless adjustment to the press daylight by use of a hydraulic lift.

Easy horizontal cylinder position is achieved with the unique “roller-head” cylinder mounting block, standard on most Enerpac IP Presses.

Optional “V-blocks” for positioning of complex parts are designed with high-strength steel for long life.

Press Section Overview

Capacity (tons)	Press Type and Functions	Series		Page

▼ Press shown: IPE-5060

- Quality welded frame for maximum strength and long life
- Exclusive “Hydra-Lift™” bed for effortless adjustment of the vertical daylight (10-ton models are manual)
- Roller head design is standard to allow movement and locking of the cylinder from side to side (10-ton, 25-ton and 30-ton are manual)
- All models in the Quick Selection Chart have been matched to a pump, cylinder, hoses and gauge, offering the complete package

◀ An Enerpac H-Frame press quickly removes the shaft from this assembly.

Setting the Industry Standard

Cylinder Mounting Block

Allows cylinder mounting into a press frame, while also allowing side to side adjustment of cylinder position.

Page: 158

Hydra-Lift™

Allows easy, effortless daylight adjustment. Standard on most H-Frame presses.

Page: 158

Pump Mounting Bracket

Heavy-duty steel brackets allow mounting of one of the Enerpac Power Sources to power your press.

Page: 158

Gauge Included

All standard press models include a gauge and gauge adaptor, matching the press capacity.

Page: 153

V-Blocks

These optional V-Blocks are designed for easy fixturing of round stock and other non-uniform materials. Featuring precise fit into the press bolster.

Page: 158

Ordering Variations

Any variations to a listed part number must be ordered as two separate items. For example, if you need a different voltage electric pump, please order from the modular matrix on page 159 and the electric pump from the modular matrix on page 99 (electric) or page 111 (air).

Any questions should be directed to our Technical Service Department.

IP Series

Capacity:

10-200 tons

Maximum Daylight and Width:

54.50 & 48.00 inches

Maximum Operating Pressure:

10,000 psi

H-Frame Press Gauges

All standard press models include a gauge and gauge adaptor, matching the press capacity:

Press Capacity	Gauge Model Number	Adaptor Model Number
(tons)		
10	GF-10P	GA-2
25	GF-20P	GA-2
30	GF-835P	GA-3
50	GF-50P	GA-2
100	GF-871P	GA-3
150	GF-200P	GA-3
200	GF-200P	GA-3

For more information on gauges, please refer to the System Components section.

Page: 131

Ordering Variations

Any variations to a listed part number must be ordered as two separate items. For example, if you need a different voltage electric pump, please order from the modular matrix on page 159 and the electric pump from the modular matrix on page 99 (electric) or page 111 (air).

Any questions should be directed to our Technical Service Department.

The One and Only

Cylinder Mounting Block

Allows cylinder mounting into a press frame, while also allowing side to side adjustment of cylinder position.

Page: 158

Pump Mounting Bracket

Heavy duty steel brackets to allow conversion to one of the Enerpac Power Sources to power your press.

Page: 158

Hydra-Lift™

Allows easy, effortless daylight adjustment.

Page: 158

Optional V-Blocks

These V-Blocks, 200 ton only, are designed for easy fixturing of round stock and other non-uniform materials. Featuring precise fit into the press bolster.

Page: 158

- Quality welded frame for maximum strength and long life
- Frame rolls easily on four steel roller bearings
- Hydraulic clamp cylinders lock frame into position
- Exclusive “Hydra-Lift™” bolster for effortless adjustment of the vertical daylight
- Standard roller head design allows movement of the cylinder from side to side
- All models in the Quick Selection Chart have been matched to a pump, cylinder, hoses and gauge, offering the complete package
- Roll Frame design features a stationary bed with the ability to support heavy loads

▼ Shown from left to right: A-220, A-330 and A-258

The Standard In Workshop Tools

Push Pin A-183

For applications requiring precision pressing, such as shaft removal and insertion. This attachment fits 10 ton cylinders and requires the use of a threaded adaptor saddle (A-13).

Smooth Saddle A-185

For pressing applications of delicate parts, such as aluminum castings, this saddle decreases surface marks during the pressing application. Requires 10-ton cylinder and threaded adaptor saddle (A-13).

C-Clamp Press

- 5, 10 and 20 ton capacity
- Operational in all positions

Arbor Press

- Foot mounting holes for horizontal or vertical positioning
- Machined work surfaces for easier fixturing
- Slotted back to simplify loading and unloading of longer parts

Bench Frame Press

- Cylinder mounting adaptor allows lateral positioning along rails
- Mounting holes for easy mounting to fixed surface

	10	15.38	15.00	RC-1010	IPH-1040***	135

* Requires RC cylinder listed, see page 7 for specifications.

** Requires RC-25 ton cylinder, limited to 20 tons.

*** Complete set includes cylinder and pump.

C-Clamp, Arbor and Bench Frame Presses

▼ A perfect example of the force and versatility of the Enerpac A-220 C-Clamp press.

A IP Series

Capacity:

5-30 ton

Maximum Daylight and Width:

15.38 and 15.00 inches

Mounting Capabilities:

Fixed or Portable

Maximum Operating Pressure:

10,000 psi

For high-cycle production applications, C-Clamp and Arbor presses should be limited in their capacity.

Consult Enerpac Technical Services for specific application details.

Cylinder Speed

This chart will help you calculate the time required for an Enerpac cylinder to extend when powered by a 10,000 psi Enerpac hydraulic pump. The Cylinder Speed Chart can also be used to determine the pump type and model best suited for an application when you know the plunger speed required.

Cylinder and Pump Selection Chart

Note: Values are approximate. Cylinder speed may vary in actual application.

CUSTOM BUILD YOUR OWN PRESS

If the press that would best fit your application cannot be found in the charts, you can easily build your custom press here. All presses must be ordered with cylinders. The pump is ordered separately.

▼ This is how a press model number is built up:

1 Product Type

IP= Industrial Press

2 Frame Type

H = H-Frame
R = Roll Frame ¹⁾

3 Press Capacity

010 = 10 ton
025 = 25 ton
030 = 30 ton
050 = 50 ton
100 = 100 ton
150 = 150 ton
200 = 200 ton

4 Cylinder Type

S = Single-Acting
(RC-Series)
D = Double-Acting
(RR-Series)

5 Cylinder Stroke (in)

- 10 ton S/A: 06, 08, 10, 12, 14
10 ton D/A: 10, 12
- 25 ton S/A: 06, 10, 12, 14
- 30 ton S/A: 08
30 ton D/A: 08, 14
- 50 ton S/A: 06, 13
50 ton D/A: 06, 13, 20
- 100 ton S/A: 06, 10
100 ton D/A: 06, 13, 18
- 150 ton D/A: 06, 13, 32
- 200 ton D/A: 13, 18, 24

6 Pump Mounting Kit ²⁾

0 = No mounting kit
1 = Hand operated and small air pumps:
P-80, P-84, P-141, P-142, P-202,
P-391, P-392, PA-133
and all Turbo II Air pumps
2 = Electric, large hand operated and
modular air pumps:
PUJ-12, PEM-12, ZE3-6 Series
P-462, P-464
PAM-10 and -90 Series

¹⁾ Roll Frame Press: 50-, 100- and 200-ton press capacity only. (Assembly required)

²⁾ Includes hoses for press, except for option 0.

Ordering Example

Model number: IPH-050S06-2

IPH-050S06-2 is a 50-ton H-Frame press with a single-acting, 6 inch stroke cylinder (RC-506). It has a pump mounting kit (for an electric Pump or a Modular Air Pump).

See the cylinder and pump selection chart on previous page for selecting the proper pump.

IP Series

Capacity:

10-200 tons

Maximum Daylight and Width:

54.50 & 48.00 inches

Maximum Operating Pressure:

10,000 psi

“No Load” indicates the plunger speed as it extends toward the load (1st stage).

“Load” indicates the plunger speed as the load is applied at a system pressure of 10,000 psi (2nd stage).

Formula $V = A \div Q$

V (sec/in) = A (in²) \div Q (in³/min)

V = Cylinder plunger speed in seconds per inch

A = Cylinder effective area in square inches (in²)

Q = Pump oil flow in cubic inches (in³)

Cylinder Plunger Speed (sec/in)	=	Cylinder Effective Area (in ²) Pump Flow Rate (in ³ /min)	x	$\frac{60 \text{ sec}}{1}$
---------------------------------	---	---	---	----------------------------

▼ Shown: LH-102 and TM-5 (in middle)

TM, LH Series

Capacity:
2,000 to 200,000 lbs.

Accuracy, % of full scale:
± 2%

TM and LH models are 100% tested to verify accuracy within a $\pm 2\%$ range.

If your application requires a calibrated tool, it must be submitted for certification testing.

Certification is NOT available from Enerpac.

Tension Meter TM-5

- Accuracy, $\pm 2\%$ of full scale
- Zinc and bronze plated to resist rust and corrosion
- Dual-range readout in kilograms and pounds
- Cushioned metal case provides safe storage and transport
- Maximum indicating pointer reading for pre-selected forces or to maintain maximum force readings

Load Cells LH Series

- Accuracy, $\pm 2\%$ of full scale
- Swivel loading pad reduces eccentric loading for improved accuracy
- Maximum indicating pointer reading for pre-selected forces or to maintain maximum force readings
- Dual-range readout in kilograms and pounds

TM-5

LH-Series

With decades of experience and in-house capabilities look to Enerpac to help find solutions to your customization needs.

Next to our large range of standard workshop presses, Enerpac offers the possibility of customization. Because many customers have specific requirements, we offer turn-key project management, including design, engineering and manufacturing. As the market leader, we listen to our customers and with our world

wide experience we offer the best solutions, especially when safety is not negotiable. Whether a longer stroke, wider frame or complete new design is required, our custom product group has many years of experience in multiple industries to deliver a solution that meets or exceeds expectations.

◀ *Fully Automated PLC-Controlled 1800-Ton, High-Accuracy Press*

◀ *50-Ton Workshop Press for Maintenance Jobs*

◀ *100-Ton Press for Assembly of Spring-Loaded Cylinders*

OVERVIEW

▲ *Enerpac's hydraulic presses can be configured to fulfill a broad range of applications. Each press is designed and manufactured according to customer specifications and in cooperation with our engineering team.*

CUSTOMIZABLE FEATURES:

- Capacity
- Cylinder Stroke
- Pump Type
- Controls
- Guarding
- Daylight Dimensions

CONFIGURATIONS

- Vertical and horizontal press
- Cylinders mounted in upper and lower bolsters
- Height built to customer specifications
- Daylight (vertical and horizontal) built to customer specifications

Enerpac offers a complete line of pullers with the widest range of sizes, capacities and styles. Whether your application requires mechanical, hydraulic or the patented Posi Lock® system, Enerpac can satisfy your requirements.

Made of high strength steel alloys, you can depend on Enerpac pullers to provide years of trouble-free operation, even in the harshest environments.

Hydraulic Pullers

These hydraulic pullers eliminate time-consuming and unsafe hammering, heating or prying. Damage to parts is minimized through the use of controlled hydraulic power.

Posi Lock® Pullers

The puller that meets the safety challenge. A control cage holds the pulling jaws securely in working position. This patented feature reduces the possibility of the puller jaws slipping off the work surface thereby increasing productivity and tool life while reducing dangerous situations for the user. The Posi Lock® feature is available in mechanical or hydraulic versions.

WARNING

Do not exceed 50% of the rated puller capacity when using a double crosshead (2 jaws) or when using puller legs in combination with bearing puller attachment.

CAUTION!

Not all puller components and configurations are rated at the set capacity. Please contact Enerpac for specific details.

Always wear Safety Goggles and Gloves while using pullers.

When selecting a puller it is important to consider three basic specifications:

1. Capacity:

The amount of force the puller is capable of producing.

Typically, the capacity required for a job can be determined by using the shaft diameter of the part being pulled.

For manual pullers, the center bolt diameter of the puller should be at least half the diameter of the shaft being pulled from.

For hydraulic pullers, the capacity in tons should be 7 to 10 times the shaft diameter. Use the following chart:

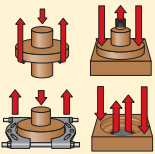

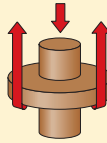

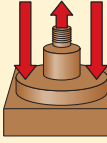

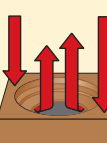

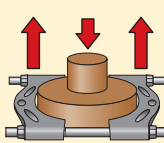

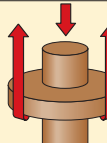

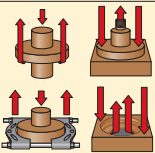

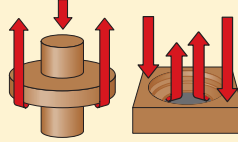

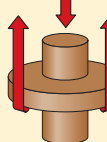

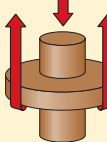

Shaft Diameter	Puller Capacity
0" to 1"	14 ton
1" to 2"	24 ton
2" to 3.5"	36 ton
3.5" to 5.5"	50 ton

2. Reach:

The distance between the bottom of the base and the jaw flats. The puller's reach must equal or exceed the same distance of the part being pulled.

3. Spread:

The distance between the jaws. The puller's spread needs to be greater than the width of the part being pulled.

Puller Function	Capacity (tons)	Puller Type	Series		Page
	14-50	Master Puller Sets Max. Reach: 27.56 in. Spread Range: 43.30 in.	BHP		164 ►

Multi-Purpose Puller Set

WARNING

Not all puller components and configurations are rated at the set capacity. Please contact Enerpac for specific details.

- Supplied with a full hydraulic set including pump, hose, cylinder, gauge and gauge adaptor in a storage case
- High quality, forged steel components provide superior reliability and service
- Sets include speed crank and adjusting screw for fast contact to work before hydraulics are applied
- All Master Puller Sets include a Grip Puller, a Cross Bearing Puller, a Bearing Cup Puller and a Bearing Separator which can be ordered separately. See items 10, 20, 30 and 40

▼ Maintenance engineers throughout the industry greatly appreciate Enerpac Master Puller sets.

* Bearing separator rated at 50% of puller capacity.

Bearing Separator

Bearing Separator has wedge shaped edges for placing puller behind hard to reach bearings, gears, etc., where clearance prevents direct application of grip puller arms.

The Bearing Separator should be used with the Cross Bearing Puller.

OVERVIEW

The Enerpac Sync Grip multi-purpose puller range is designed to make your jobs easier and safer to accomplish.

Remove bearings, bushings, gears, sleeves, wheels and flywheels, sprockets and other shaft mounted items simply and effectively.

Mechanical and hydraulic configurations are available with a variety of optional accessories that expand application range and increase utility.

Hydraulic models are available in standard sets which include detachable hydraulic cylinders and a choice of pump options, along with a gauge assembly and hose for safe monitoring of applied pulling forces.

Always wear safety goggles and gloves while using pullers.

WARNING!
Do not exceed 50% of the rated puller capacity when using two jaw configurations.

▼ DIMENSIONAL DATA

* Puller can be set up as a 2 or 3 jaw configuration.

** Puller capacity at 7,850 psi, maximum cylinder capacity @ 10,000 psi is 64.6 tons.

*** With standard legs and cylinder for hydraulic models

Sync Grip Pullers: available in both mechanical or hydraulic versions. Some models can be configured as a two jaw puller, however, three jaws are recommended for most even distribution of pulling forces.

Cross Puller: hydraulically powered via detachable cylinder and choice of pump. The Cross Puller can be used individually as a 'push' puller or in conjunction with the Bearing Separator or Bearing Cup Puller.

Bearing Separator: use where access is restricted. The Bearing Separator is used in conjunction with the Cross Puller.

Bearing Cup Puller: specifically designed for cup style bearing and other applications requiring an internal style puller.

Detachable Hollow Cylinder: provided with all hydraulic puller models including both the standard Sync Grip and Cross Puller.

In Sync Grip, Cross Bearing and Master Puller Sets a hose and gauge are provided as standard along with your choice of pump including manual hand operated, cordless battery powered, electric or air powered. In each case the pump selection has been optimized for compatibility with the pullers.

Easy To Use

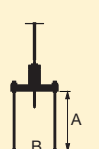

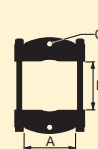

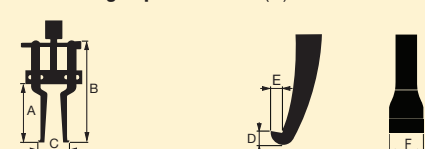

Simple, Safe, Productive

All three jaws close simultaneously making the puller easier and safer to operate.

The synchronous feature of the SGM and SGH-Series Pullers makes positioning the puller simple and helps prevent misalignment.

** With cylinder and standard legs

▼ Shown: **SGM10** with three jaws

SGM Series

Puller Capacity:

1-20 tons

Maximum Reach:

4.1-23.6 inches

Maximum Spread:

4.3-26.8 inches

- Sync Grip mechanism synchronizes movement of all jaws for simultaneous engagement, helping to prevent misalignment for safe and easy use
- Threaded spindle and jaw indexes provide adjustable reach
- Three-jaw configuration for even load distribution
- Two-jaw configuration for confined access applications available on all pullers 10 ton and below (not available on SGM20)
- High-strength forged jaws for superior reliability
- Suitable for a variety of applications including bearings, bushings, wheels, gears and pulleys

Dimensions

Dimensional information for all puller models is included in the dimensional overview table:

Page: 168

WARNING!

Do not exceed 50% of the rated puller capacity when using two jaw configurations.

▼ SGM10 with two jaws.

Hydraulic Sync Grip Master Puller Sets

▼ Shown: **MPS14H**

MPS Series

Puller Capacity:

14-50 tons

Maximum Reach:

12.6-27.6 inches

Maximum Spread:

13.8-38.6 inches

Maximum Operating Pressure:

10,000 psi

- Sync Grip mechanism synchronizes movement of all jaws for simultaneous engagement
- Hydraulically applied pulling force increases pulling capacity reducing operator fatigue
- Standard jaws adjust to accommodate different reach requirements. Optional long jaw sets available for additional reach requirements
- Designed for applications including pulling, pushing and dismounting gears, bearings, bushings, etc.

Dimensions

Dimensional information for all puller models is included in the dimensional overview table:

Page: 168

Sets Include:¹⁾

For Safer and Faster Pulling

- Patented “Safety Cage” jaw retention system
- Roll threaded shafts for less effort when applying high torque
- Slim tapered jaws for improved gripping in tight spots
- Available in 2 and 3 jaw design and inside and outside pulling configuration
- More efficient pulling, as one man can do the job where manual pullers often require two operators

Long Jaws

Long Jaws are used to increase the reach and spread of manual pullers. They maintain the same pulling capacity as the standard jaws, but reduces clamping force by 25%.

Page: 177

Shaft Attachments

Shaft protectors and extenders are live centers that fit over the standard puller shaft for tip protection and additional reach.

Page: 177

Application Tip

Because of the unique Safety Cage design, Posi Lock® pullers will grip on surfaces where normal pullers would slip off; e.g. tapered bearings.

◀ Positioning an EP-104, 3-jaw puller on the drive pulley of an electric motor.

Posi Lock® Mechanical Grip Pullers

External Puller

- 1 Patented "Safety Cage" guides jaws, holding them securely onto the part.
- 2 Durable forged jaws provide positive grip.
- 3 Jaw head provides pivot and reaction point for jaws.
- 4 Pin, for easy jaw removal and replacement.
- 5 T-handle provides control of the puller jaws.
- 6 Drive bolt with rolled threads for increased force with reduced input torque.
- 7 Snap-ring retains cage to drive bolt and provides quick removal for easy service.

EP EPP Series

Capacity:
2-40 tons

Maximum Reach:
4.00-14.00 inches

Spread Range:
0.50-25.00 inches

▼ QUICK SELECTION CHART EXTERNAL PULLERS

For full technical information see next page.

Number of Jaws	Maximum Reach (in)	Spread Range (in)	Capacity (tons)	Model Number	Center Bolt Diameter (in)	Weight (lbs)
2	4.00	.5-5	2	EP-204	.56	3
3	4.00	.5-5	5	EP-104	.56	4
2	6.00	.5-7.0	6	EP-206	.66	7
3	6.00	.5-7.0	10	EP-106	.66	8
2	8.00	.75-12	12	EP-208	.79	12
3	8.00	.75-12	17	EP-108	.79	14

3	14.00	3.0-25	40	EP-116	1.23	68

Always wear Safety Goggles and Gloves while using pullers.

Application Tip

In determining the correct manual puller capacity for your application, use the following rule:

The center bolt diameter of the puller should be at least 1/2 the diameter of the shaft being pulled on.

Example:

A part being pulled from a shaft with a diameter of 1.5" would require a puller with a center bolt diameter of at least .75".

For full details on puller accessories see page 170.

* Long Jaws are available as optional accessories.

EPH Series

Capacity:

10-50 tons

Maximum Reach:

9.7-20.0 inches

Spread Range:

1.5-30.0 inches

IMPORTANT!

Always wear Safety Goggles and Gloves while using pullers.

◀ EPH-11054L

Long Jaws are used to increase the reach and spread of hydraulic pullers. They maintain the same pulling capacity as the standard jaws, but reduces clamping force by 25%.

Posi Lock® 100-Ton Hydraulic Grip Pullers

▼ EPH-1003

- Roller cart with power lift
- Adjustable jaw tips
- Puller easily detaches from cart
- Self-contained unit
- Puller height range 26.5" to 66.5"

EPH Series

Capacity:

100 tons

Maximum Reach:

48 inches

Spread Range:

7.5 - 70 inches

Maximum Operating Pressure:

10,000 psi

Pushing Adaptors

All Posi Lock 100 Ton Hydraulic Pullers include (3) pushing adaptors.

Enerpac offers an extensive range of dedicated tools for a variety of specific and flexible applications. Whatever your requirement... cutting, punching, spreading or bending... you can be sure that Enerpac has the correct tool to do your job safely and efficiently.

Featuring maintenance sets, machine lifts and load skates, as well as hole punches, pipe benders and cable cutters, Enerpac has the tools to ensure that even your most demanding applications can be undertaken with the highest degree of safety and accuracy.

Pump and Tool Sets

Selected hydraulic tools in this section are available in sets, for a perfect tool-pump match.

Hydraulic System Set-up

Check out our “Yellow Pages” section for help on system set-ups and valving configurations.

The Universal Hydraulic Tool Box

Maintenance Sets

Enerpac Maintenance sets are a complete assortment of accessories matched to hydraulic powered tools. Using these sets allows you to quickly configure a unique tool to meet your most difficult jobs.

Built around the Enerpac lightweight hand pump, hose and cylinder, these sets enable you to push, pull, lift, press, straighten, spread and clamp with forces up to 12.5 tons.

- All sets include Enerpac pump, hose, cylinder and gauge
- Lock-on or threaded connectors
- Complete set for almost every maintenance application

More Information

For detailed information on all included attachments, see the following pages.

Page: 186

Clamping a workpiece is just one of the many applications for the Enerpac maintenance sets. ►

▼ QUICK SELECTION CHART ►

Capacity using attachments* (tons)	Set Model Number						Number of Attachment Components	Weight (lbs)
2.5	MS2-4	P-142	HC-7206	RC-55	GP-10S	GA-4	33	59
2.5	MSFP-5**	P-142	HC-7206	RC-55	G2535L	GA-3	24	44
5	MSFP-10	P-392	HC-7206	RC-106	G2535L	GA-3	23	105

* If no attachments are being used, capacity is double these values. Maximum operating pressure is then 10,000 psi.

** This set also includes the FZ-1055 Adaptor.

MS-Series, Maintenance Sets

CAUTION!

When cylinders are used with maintenance set attachments or components, the maximum system pressure must be limited to half the rated pressure (5,000 psi).

WARNING!

Only use attachments provided with set. Non-Enerpac attachments and longer extension tubes will reduce column strength, potentially creating unsafe conditions.

MS Series

Capacity (using attachments):

2.5-12.5 tons

Max. Operating Pressure (using attachments):

5,000 psi

▼ APPLICATION EXAMPLES

MS-Series, Maintenance Sets

CAUTION! When cylinders are used with maintenance set attachments or components, the maximum system pressure must be limited to half the rated pressure (5,000 psi).

- .50" thick mild steel maximum capacity
- Round, oblong and square punches and dies are available to solve your punching applications
- Long life Enerpac single-acting, spring return design
- Durable case keeps tools and dies together and provides for easy carrying and storage
- CR-400 female coupler included

Much Faster than Drilling...

Tool Kit SPK-10

Included with all 35 ton punches, this tool kit is used to remove and install the punch into the head.

Can be ordered as a replacement under model number **SPK-10**.

Ordering Information

The 35-ton hydraulic punch may be ordered by itself or as a set, including an electric, air or hand pump.

Please refer to the Quick Selection Chart information on next page.

A punch and die may also be ordered as a matched set.

▼ Shown: **SP-50100**

- Available as a complete set including electric pump and hoses
- Double-acting cylinder design for fast cycle times
- Punch and die changeover tools included
- Lifting handle for easy carrying
- Adjustable power stripper prevents movement of the metal during stripping
- CR-400 female couplers included

Cuts the Time Spent Forming Holes

Depth Stop

For simplified repetitive punching applications an adjustable Depth Stop is available.

Order model number: **SP-110.**

Foot Mounting Kit

A foot mounting kit for easy mounting of the 50 ton punch to workbench or fixture is available.

Please order: **SP-120.**

Ordering Information

The 50-ton Hydraulic Punch may be ordered by itself or as a set with an electric pump. A punch and die may be ordered as a matched set. Please refer to the selection chart information.

◀ Save time using this 50-ton Enerpac Punch.

▼ Shown below is the 50-ton punch with SP-120 and SP-110 assembled.

LW-Series, Vertical Lifting Wedge

ENERPAC 
POWERFUL SOLUTIONS. GLOBAL FORCE.

▼ Shown: LWC16, LW16 with SB2 and optional LWB1

- Minimized access gap for greater accessibility on applications with limited insertion space
- Secure, stable lifting and lowering motion with no slippage
- Single-acting spring return cylinder allows for automatic, mechanical retraction
- Integrated hand pump offers greater maneuverability (LWC16 only)
- Includes safety block SB2

LW Series

Minimum Clearance:

0.39 inches

Maximum Lift Height:

2.02*-2.72* inches

Maximum Force:

16 tons

Maximum Operating Pressure:

10,000 psi

* Using LWB1

Best Match Manual Pump

To power your Enerpac **LW16** Lifting Wedge, the Enerpac **P-392** Hand Pump or **P-392FP** Foot Pump is an ideal choice.

Page: 192

Split-Flow Manifolds

Split Flow Valves to control two or four lifting wedges simultaneously (**LW16** only).

AM-21 with 3 ports 3/8" NPTF.

AM-41 with 5 ports 3/8" NPTF.

ER-Series Load Skates

In combination with the Enerpac Lifting Wedge we recommend Load Skates for moving heavy loads.

Page: 194

RSM Flat-Jac®

Low height, single acting spring-return cylinders are ideal for space restricted applications.

Page: 22

- For lifting heavy equipment with minimum available access
- Remote operation of hydraulic pump enhances safety
- Low-height lifting toe
- Precision guided to reduce friction and isolate cylinder from side-loads
- Two extendable support feet provide extra stability
- Includes RC-Series cylinder with CR-400 coupler

▼ Heavy transport using Load Skates. The machine is first lifted, using SOH-Series Enerpac Machine Lifts.

Capacity (ton)	Toe Clearance with Cylinder Retracted (in)			Stroke (in)	Model Number	Oil Capacity (in³)	Dimensions (in)						Weight (lbs)

Move Heavy Loads Easily and Safely

Sets (see table) include all components necessary to handle a variety of applications. Two **ELB-1** link-up bars, two **ERH-1** handles (34.4" long) and one **EMB-1** metal box are included. Optional long handle **ERH-2** (46.4") also available.

- Rugged and sturdy construction for long life
- Low profile construction for increased stability
- Low rolling-resistance allows for easy load movement
- Attachable load leveling plates and swivel turntables for turning corners

Lifting Wedge and Machine Lifts

To place the Load Skates, the load must first be lifted. This can be done easily and safely using Enerpac Lifting Wedge or Machine Lifts.

Page: 194

▼ Heavy transport using Load Skates. The machine is first lifted, using SOH-Series Enerpac Machine Lifts.

▼ Chemical tank transportation: The first inch(s) the load was lifted with an RCS-Series Low Height Cylinder and then moved onto load skates for transportation.

Heavy-Duty Caterroller™ Load Skates

Protect your Equipment

Maintenance Sets

Enerpac Maintenance sets are a complete assortment of accessories matched to hydraulic powered tools. Using these sets allows you to quickly configure a unique tool to meet your most difficult jobs.

Built around the Enerpac lightweight hand pump, hose and cylinder, these sets enable you to push, pull, lift, press, straighten, spread and clamp with forces up to 12.5 tons.

Hydraulic Pullers

These hydraulic pullers eliminate time-consuming and unsafe hammering, heating or prying.

Damage to parts is minimized through the use of controlled hydraulic power.

- **Protect your equipment from dust, water, grease and dirt**
- **Reduce losses on the jobsite, maintenance area or shop**
- **Durable steel, painted with rust-resistant primer and finished in durable enamel**
- **Heavy-duty hinges and lifting handles**
- **Lockable**

▼ When not storing the lifting system, this heavy-duty storage case doubles as a work station.

Quick, Safe and Wrinkle-free Bending

'One Shot' and 'Sweep'

One shot shoes give up to a 90° bend without resetting.

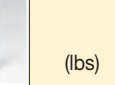

Sweep shoes are used where increased radii are required for multiple parallel pipe installations.

- Makes smooth, wrinkle-free bends
- Sets include cylinder, hose and manual, air or electric pump
- Sets are also available without hydraulics
- Bending shoes and bending frame are lightweight, heat-treated aluminum
- All sets include sturdy steel storage case
- All sets include BZ-12091 angle indicator for accurate bending
- BZ-12377 Shoe Lock Pin included in every set
- Eject-O-Matic™ benders (STB-202 models) use a double-acting cylinder to eject pipe from the bending shoe

▲ Typical one shot bending operation.

Enerpac's Bolting Solutions caters to the complete bolting work-flow, ensuring joint integrity in a variety of applications throughout industry:

Joint Assembly

From simple pipe alignment to complex joint positioning of large structural assemblies, our comprehensive line of joint assembly products range from hydraulic and mechanical alignment tools to PLC-controlled multi-point positioning systems.

Controlled Tightening

Enerpac offers a variety of controlled tightening options to best meet the requirements of your application, ranging from manual torque multipliers, to pneumatic torque wrenches, as well as a comprehensive range of hydraulic torque wrenches and inter-connectable bolt tensioning tools.

Joint Separation

Enerpac also provides hydraulic nut splitters and a variety of mechanical and hydraulic spreading tools for joint separation during inspection, maintenance and decommissioning operations.

High-quality bolting solutions from the brand you can trust. See how Enerpac can make your bolting work-flow more accurate, safer and efficient.

Bolting Integrity Software

Visit www.enerpac.com to access our free on-line bolting software application and obtain information on tool selection, bolt load calculations and tool pressure settings. A combined application data sheet and joint completion report is also available.

Torque Tightening

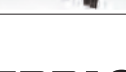

See our "Yellow Pages" for information on torque tightening.

Accurate, Efficient Torque Multiplication

When accurate make-up or break-out of stubborn fasteners requires high torque

- High-efficiency planetary gear sets achieve high output torque from low input torque
- Most models operator protected by anti-backlash device
- Multiplier output accuracy $\pm 5\%$ of input torque
- Reversible, tighten or loosen bolts
- Reaction bar or reaction plate type
- Angle-of-turn protractor standard on E300 series models
- Reaction plate models offer increased versatility with reaction point locations
- E300 and E400 series replaceable shear drives provide overload protection of internal power train (one replacement shear drive is included)

Typical Torque Multiplier Applications

- Locomotives
- Power plants
- Pulp and paper mills
- Refineries
- Chemical plants
- Mining and construction
- Off-road equipment
- Shipyards
- Cranes

▼ SELECTION CHART

Torque Multiplier Type	Nominal Output Torque Capacity		Model Number
	(Ft.lbs)	(Nm)	
Reaction Bar Multiplier	750	1015	E290PLUS
	1000	1355	E291
	1200	1625	E391
	2200	2980	E392
	3200	4340	E393
Reaction Plate Multiplier	2200	2980	E492
	3200	4340	E493
	5000	6780	E494
	8000	10845	E495

◀ Enerpac Reaction Bar Torque Multiplier E393 used to manually torque bolts up to 3,200 ft-lbs.

Manual Torque Multipliers

Enerpac manual torque multipliers provide efficient torque multiplication in wide clearance applications and when external power sources are not available.

Manual torque multipliers are used in most industrial, construction, and equipment maintenance applications. Hydraulic torque wrenches are better suited for tight tolerance, flange and repetitious bolting applications.

Use Reaction Bar Models:

- where space is limited
- where multiple reaction points are available
- when portability is desirable

Use Reaction Plate Models:

- above 3200 Ft.-lbs. output torque
- on flanges and applications where neighboring bolt or nut is available to react against
- when extreme reaction forces are generated

Selector Pawl

Models with anti-backlash protection have directional selector pawls. Set the pawl for clockwise or counter-clockwise rotation.

Shearable Square Drive

Designed to provide overload protection on E300- and E400-series multiplier power train by shearing when excess input torque is applied. Internal shear pin prevents tool from falling off bolt.

Angle-of-Turn Protractor

E391, E392 and E393 models include an angle-of-turn protractor (scale) to tighten fasteners using a "torque turn" method. Allows accurate measuring a specific number of degrees of rotation.

Reaction Bar Type ¹⁾

Reaction Plate Type ¹⁾

E Series

Nominal Output Torque:

750-8000 Ft.lbs

Torque Ratio:

3:1-52:1

Multiplier Output Ratio Accuracy:

± 5 %

CAUTION!

Never use impact type air tools for power driving torque multipliers. Torque multiplier drive train damage will occur.

Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Setting New Standards in Safety, Simplicity and Performance

Two Handle Styles

Robust angled positioning handles come standard with every S-Series (X-Edition) tool. Straight positioning handles are available as accessories.

Compatible S-Series (X-Edition) wrenches	Angled positioning handles (standard)	Straight positioning handles (optional)
S1500X, S3000X	SWH6A	SWH6S
S6000X, S11000X	SWH10A	SWH10S
S25000X	Supplied with an eyebolt handle (SWH10EA)	

Safety and Performance

- Compact, high-strength uni-body construction provides a small operating radius without sacrificing endurance
- 35° rotation angle and rapid return stroke for fast operation
- Tough manifold design with added safety feature for enhanced operator safety

Simplicity

- 360° click-on reaction arm with quick release lever provides easier handling, even when wearing gloves
- Includes robust handle which mounts on both sides of tool for extra maneuverability
- Push button square drive release for quickly reversing the square drive for tightening or loosening

Versatility

- Available with optional enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability*

Accuracy

- Constant torque output provides accuracy of +/-3% across full stroke
- Optional Angle-of-Turn Indicator provides measurement of rotation

* TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

TSP - Pro Series Swivel

The optional **TSP300** tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and 160° Y-axis rotation.

How to Order*

Factory fitted to S-Series (X-Edition) wrenches: Insert a "P" prior to the "X" in the tool designation, e.g.: **S1500PX**.

Order as an accessory using the part number: **TSP300**, which can be fitted to existing S-Series (X-Edition) wrenches.

*Includes male and female couplers.

Page: 209

Calibration Certificate

All X-Edition tools are CE-ATEX declared, factory calibrated and are shipped complete with a calibration certificate.

CE  II 2 GD ck T4
CSA/SIRA 15XT072

S-Series, X-Edition, Square Drive Torque Wrenches

- ① Drive Unit
- ② Angled Positioning Handle
- ③ Straight Positioning Handle (optional)
- ④ Pro Series Swivel (optional)
- ⑤ Reaction Tube Extension (optional)
- ⑥ Standard Reaction Arm
- ⑦ Allen Drive (optional)
- ⑧ Square Drive
- ⑨ Short Reaction Arm (optional)
- ⑩ Extended Reaction Arm (optional)

Select the Right Torque
Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

S Series (X-Edition)

Nominal Torque at 10,000 psi:

26,150 Ft.lbs

Square Drive Range:

3/4-2 1/2 inch

Nose Radius:

.98-2.52 inch

Maximum Operating Pressure:

10,000 psi

Accessory Options

A full list of optional accessories can be found on: page 209.

Page: **209**

*TORQUE WRENCH SELECTION (based on socket size range)

See page 210 for BSH-Sockets.

Pin and Ring

All sockets are supplied with a "Pin and Ring" to hold the socket in place on the square drive of the tool.

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

ENERPAC professional series steel torque wrenches provide reliable controlled tightening solutions across many industries.

S3000X Square Drive Torque Wrench on Wind Turbine Assembly and Maintenance

S3000X used to connect wind turbine segments during assembly and maintenance. A robust but compact solution is required for bolt tightening on wind tower sections. Large numbers of fasteners require precise application of torque to ensure joint integrity is achieved and maintained.

The Enerpac S-Series wrench offers simple and reliable operation while providing accurate and repeatable results.

W4000X Low Profile Torque Wrench on an API Pipe Flange

Throughout the Oil and Gas, Petrochemical and Processing Industries, pipeline joints, valves, pumps and machinery present challenges for controlled bolting.

The restricted access on this flange was easily overcome with an Enerpac W-Series Torque Wrench. The W Wrenches offer reliability and control, ensuring even and consistent torque is applied to all bolts.

S3000X on an Oil and Gas Flange

During maintenance, quick turnaround times are essential; S-Series wrenches provide a large angle of nut rotation per stroke, offering speed and accuracy in a compact ergonomic tool.

(Rear model shows optional straight handle)

Setting New Standards in Safety, Simplicity and Performance

Two Handle Styles

Robust angled positioning handles come standard with every W-Series (X-Edition) tool. Straight positioning handles designed for

extreme limited access applications are available as accessories.

Compatible W-Series (X-Edition) wrenches	Angled positioning handles (standard)	Straight positioning handles (optional)
W2000X, W4000X	SWH6A	SWH6S
W8000X, W15000X	SWH10A	SWH10S
W22000X, W35000X	Supplied with an eyebolt handle (SWH10EA)	

TSP - Pro Series Swivel

The optional TSP300 tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and 160° Y-axis rotation.

How to Order

Factory fitted to new W-Series (X-Edition) wrenches: Insert a "P" prior to the "X" in the tool designation, e.g.: **W2000PX**.

Order as an accessory using the part number: **TSP300**, which can be fitted to existing W-Series (X-Edition) wrenches.

Page: 225

Calibration Certificate

All X-Edition tools are CE-ATEX declared, factory calibrated and are shipped complete with a calibration certificate.

CE  II 2 GD ck T4
CSA/SIRA 15XT072

Safety and Performance

- Superior strength to size ratio provides easy access to difficult to reach applications without sacrificing endurance
- 30° rotation angle and rapid return stroke provide fast operation
- Tough manifold design with added safety feature for enhanced operator safety

Simplicity

- Fast release drive unit enables rapid exchange of cassettes, no tools required and no pins to lose
- Includes robust handles which mount on both sides, and the tops of cassettes to allow for extra maneuverability
- Quick and easy disassembly for maintenance without special tools

Versatility

- Available with optional enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability*
- X-Edition drive units, cassettes and most accessories are compatible with standard edition tools*
- Drive unit compatible with UltraSlim and WCR-Series cassettes

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across full stroke

* TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

W-Series, X-Edition Hexagon Wrenches

- ① Hexagon Cassette
- ② Drive Unit
- ③ Angled Positioning Handle
- ④ Straight Positioning Handle (optional)
- ⑤ Pro Series Swivel (optional)
- ⑥ Extended Reaction Arm (optional)
- ⑦ Reducer Insert (optional)
- ⑧ Reaction Paddle (optional)

Hexagon Cassettes and Reducer Inserts

Full range of interchangeable hexagon cassettes and reducing inserts provides maximum versatility. Details available at www.enerpac.com

W Series (X-Edition)

Nominal Torque at 10,000 psi:

35,000 Ft.lbs

Hexagon Range:

1¹/₁₆ - 6¹/₈ inch

Nose Radius:

1.22-4.52 inch

Maximum Operating Pressure:

10,000 psi

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench and pump matrix.

▼ Shown: W4206SL stepped-width cassette with W4000X drive unit

Your easy and long lasting solution to difficult access bolting applications

Designed for Tight Spots

Stepped width design provides easy access in confined areas. UltraSlim cassettes fit where standard solutions won't.

Built to Outperform

High endurance components keep working when others fail.

Top Mounted Handles

Standard top mounted handles provide safety and versatility; optional angled handles are also available.

Replacement handle (straight)	SWH6S
Angled handle (optional)	SWH6A

Calibration Certificate

All UltraSlim Series cassettes are CE - ATEX declared, factory calibrated and are shipped complete with a calibration certificate.

CE  II 2 GD ck T4
CSA/SIRA 15XT072

Versatility

- Lean, stepped width design allows tool to be mounted over bolts where other tools won't fit
- Bi-Hexagonal cassette allows twice as many positioning points on nut or bolt
- Uses same drive unit as standard W-series hexagon cassettes
- Robust top mounted handle stays out of the way, providing safe fastening in hard to reach areas

Performance

- Premium components provide best-in-class endurance

Ease of Use

- Few moving parts are easily accessible for quick field maintenance
- Fast release drive unit enables rapid exchange of cassettes, no tools required and no pins to lose
- Uses same drive unit as standard and X-Edition cassettes

Accuracy

- Constant torque output provides accuracy of +/- 3% across the full stroke

Slim enough to fit and tough enough to last. This UltraSlim wrench is the perfect controlled bolting solution for this oil and gas flange. ➤

UltraSlim Stepped-Width Cassettes

UltraSlim Stepped-Width Cassettes

Accessing narrow spaces normally requires significantly reducing the width of the torque wrench. For the tool operator, this has always meant vastly reduced tool durability, and/or reduced torque output.

By using the highest grade materials, perfecting the geometry, and placing the positioning handle on top of the tool, Enerpac UltraSlim cassettes are able to provide greater torque, get into tighter spaces, and vastly outperform the competition in product durability.*

Durability of Key Components*

*Average test results, whereby three Enerpac 1¹³/₁₆" UltraSlim cassettes and three competitor 1¹³/₁₆" cassettes were tested at 4000 ft-lbs for 50,000 cycles. The Enerpac sideplates never broke for the full duration of the test.

W Series Ultra-Slim

Nominal Torque at 10,000 psi:

4360 Ft.lbs.

Hexagon Range:

1¹³/₁₆ - 2¹⁵/₁₆ inches

Maximum Operating Pressure:

10,000 psi

Torque Wrench Pumps

Visit enerpac.com for system matched air and electric torque wrench pumps that are ideal for use with hydraulic torque wrenches.

Page: 232

Torque Wrench Hoses

Use Enerpac THQ-700 Series hoses with W-Series torque wrenches to ensure the integrity of your hydraulic system.

19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T

WCR Series

Bi-Hexagonal Spanner Size:

1⁷/₁₆-3¹/₈ inch

Spanner Nose Radius:

1.22-2.18 inch

Nominal Torque:

4250 Ft-lbs

Maximum Operating Pressure:

10,000 psi

WCR4000 Torque Wrench

The **WCR4000** combines power and durability with a slim spanner design to provide bolting professionals with one of the most versatile and high performing limited access tools on the market today.

The tool was designed for use in narrow access applications, particularly in the height above the nut, and between the bolt center, and the inside of the joint.

Ideal for bolting API flanges, the **WCR4000** is available with a wide range of ring type spanners, and is powered by the standard W4000X drive unit.

- Spanners available to fit most commonly used API flanges
- Small nose radius – resolves bolt to pipe restrictions
- Slim spanner design – reduces bolt height restrictions
- Wide range of spanners ranging from 1⁷/₁₆ - 3¹/₈ inches (36 - 80 mm)
- Includes handle to improve tool handling and safety
- Rigid solid steel body for maximum endurance and minimum downtime

3 ¹ / ₈	80	W4302CS	2.18	4.9		

*For total weight add 13.89 lbs for WCR4000, 4.40 lbs. for W4000X and weight of the spanner.

** The WCR4000 cassettes, spanners and drive units are all sold separately.

Accessories for W-Series, X-Edition Torque Wrenches

- ① Hexagon Cassette
- ② Drive Unit
- ③ Angled Positioning Handle
- ④ Straight Positioning Handle (optional)
- ⑤ Pro Series Swivel (optional)
- ⑥ Extended Reaction Arm (optional)
- ⑦ Reducer Insert (optional)
- ⑧ Reaction Paddle (optional)

TSP WTE WRP Series

TSP-Series, Pro Series Swivels

- Robust interlocking design
- 360° X-axis and 160° Y-axis rotation
- Increases tool fit in restricted access areas
- Simplifies hose placement
- Includes male and female couplers

Torque Wrench Model Number	Model Number	Maximum Pressure (psi)	Wt. (lbs)
W2000X, W4000X, W8000X, W15000X, W22000X, W35000X	TSP300*	10,000	.44

Note: To order a W-series (X-Edition) wrench fitted with the TSP swivel, insert a "P" prior to the "X" in the tool designation, e.g., W2000PX.

* TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

WTE-Series, Extended Reaction Arm

WTE-Series

- Full torque rated
- Increases tool fit in restricted access areas

Torque Wrench Model Number	Model Number	Dimensions (in)			Wt.* (lbs)
		A	B	C	
W2000X	WTE20	2.20	15.67	2.66	5.73
W4000X	WTE40	2.60	17.17	2.91	10.14
W8000X	WTE80	3.35	17.68	2.15	16.76
W15000X	WTE150	4.02	19.61	2.83	26.46
W22000X	WTE220	4.49	20.51	3.03	38.14

Continuous Rotation Controlled Torque

Typical Pneumatic Torque Wrench Applications

Mining

- Track maintenance
- Undercarriage maintenance
- Wheel maintenance
- Shovel maintenance

Power Generation

- Turbine bolts
- Tower segments
- Turbine casings

Oil and Gas

- Pipe flanges
- Valves
- Manway covers
- Pressure vessels

Calibration Certificate

All PTW tools are CE declared and are shipped complete with a calibration certificate.

Productivity

- High speed continuous rotation for constant torque output
- Low friction planetary gearbox design minimizes wear and extends uptime

Safety

- Ergonomic, low vibration design reduces fatigue and the risk of vibration related injuries for the operator
- Low noise air motor provides quiet, consistent performance for indoor and outdoor applications

Convenience

- Provided with standard reaction arm; wide assortment of custom arms and accessories are available
- Available with or without Filter-Regulator-Lubricator (FRL)
- Unique calibration certificate provided with each tool

◀ The PTW1000 makes quick work of this flange maintenance job.

▼ PTW-Series Pneumatic Torque Wrenches are ideal for applications where speed and precision are critical, such as track maintenance.

Pneumatic Torque Wrenches

PTW-Series Pneumatic Torque Wrenches

Enerpac PTW-Series Pneumatic Torque

Wrenches are designed for applications that require speed and control. The standard package includes a Torque Wrench with a calibration certificate, an FRL (Filter/Regulator/Lubricator), and a 10 ft. (3 m) long, 1/2" (13 mm) diameter air hose, which connects the FRL to the wrench.

Once the air hoses are connected, the operator simply adjusts the air pressure on the FRL to achieve the desired torque using the calibration certificate. After this, the tool is ready to go to work!*

The air source used with the PTW system must be regulated and/or limited to 120 psi (8.3 bar), and must be capable of providing a volume of at least 50 CFM (85 CMH) at 100 psi (6.9 bar). A separate 1/2" (13 mm) hose (not included) must be used to connect the FRL to the air supply.

*See instruction manual for comprehensive instructions

- ① PTW Torque Wrench
- ② Hose
- ③ Filter-Regulator-Lubricator
- ④ Reaction Arm

All tools are shipped complete with standard reaction arm and FRL*.

▼ SELECTION CHART

Minimum Torque		Nominal Torque		Square Drive (in)	Model Number*	RPM	Dimensions (in)				Weight** (lbs)
(Ft.lbs)	(Nm)	(Ft.lbs)	(Nm)				A	B	C	D	
300	407	1000	1356	1	PTW1000C	12.6	10.70	3.27	2.83	5.12	18
500	678	2000	2712	1	PTW2000C	8.0	11.26	3.27	3.11	5.24	19.5
900	1220	3000	4067	1	PTW3000C	3.1	13.50	3.27	3.74	5.24	23
1300	1763	6000	8135	1 1/2	PTW6000C	2.5	14.40	4.49	5.00	7.00	39

* To order without FRL and hose, remove "C" Suffix (e.g. PTW3000).

** Weight of wrench only without reaction arm. Reaction arm weight for PTW1000, PTW2000, PTW3000 is 2.9 lbs. and for the PTW6000 is 7.75 lbs.

PTW Series

Nominal Output Torque:

6000 Ft.lbs

Square Drive Range:

1 - 1 1/2 inch

Pneumatic Torque Wrench Accessories

Enerpac offers a full line of accessories including a range of reaction arms and drives.

Page: 230

Filter-Regulator-Lubricator

Recommended for use with all PTW pneumatic torque wrenches.

Provides clean, lubricated air and allows for air pressure adjustment.

▼ Shown: TW3000B (torque wrench shown without servo motor cord)*

Your Simple Solution for Smart Bolting

Touchscreen Control Box

ETW tools feature an easy to use, interactive touch-screen control box, which helps make even the most complex jobs simple to complete.

A single control box may be used to operate multiple wrench models.

Firmware upgrades may be uploaded online and easily transferred to the tool via a USB connection.

Easy Access to Controls

Controls on back of wrench with LED display allow user to directly input desired torque, change direction of rotation, and monitor the fastening process.

Certifications, Declarations

All ETW tools:

- Are shipped complete with a calibration certificate
- Are certified for North American Electrical Safety by CSA International
- Carry a CSA US and Canada mark
- Are CE declared

▼ ETW-Series Electric Torque Wrenches are ideal for high volume fastening applications that require precision and traceability, such as this wind tower job.

Versatility

- Patented firmware design provides accurate fastening on soft, hard, or pre-tightened joints
- Single control box may be used to operate multiple wrench models
- Wrenches and control boxes may be purchased separately or as a set

Performance

- High speed continuous rotation gets the job done faster
- Torque and angle functionality allows input of nominal torque value followed by a specific angle of rotation
- Pass/Fail LED indicator on back of tool verifies fastening has been completed according to specified input

Simplicity

- Control box with large 7-inch touchscreen simplifies tool operation
- Controls on back of wrench enable operator to monitor and manage the fastening process without returning to the control box
- Brightly lit three line LED display on wrench is easy to read in any environment

Traceability

- Fastening record can be viewed on-screen and transferred to a computer
- Each tool is performance tested and shipped complete with a factory calibration certificate

Safety

- Lift points on wrench enable use with positioning handle or lifting device for greater handling safety
- Ground fault detector protects operator in the event of insufficient grounding

* NOTE: Wrench cannot be used without control box.

ETW-Series Electric Torque Wrenches

Enerpac ETW-Series Electric Torque Wrenches are particularly well suited to complex jobs which demand precision and traceability. The tools feature an automatic mode, which helps simplify and automate complex jobs, including those with torque and angle specifications, through the creation of presets.

Using the touchscreen, simply input the number of fasteners and desired torque value for each fastening step, followed by the required angle of turn. This sequence may then be saved as an automatic preset for future use.

Once the input torque is achieved, the tool stalls, and a pass/fail indicator verifies that it is ready to move on to the next fastener.

When the job is completed, the fastening record can be viewed on the touch screen, or exported to a computer via a USB connection on the control box.

ETW Set

- ① ETW Torque Wrench (with 20 ft. servo cord)
- ② Control Box (with 6 ft. power cord)
- ③ Reaction Arm

* Time to reposition arm when repeatedly moving from tightening to loosening.

** WARNING: Blank reaction arms must be heat treated to HRc 38-42 prior to use.

Custom Hydraulic Torque Wrenches

Looking for customized components to help solve your torquing problems? Enerpac has the experience and capabilities to help find solutions to your problems.

Enerpac hydraulic torque wrenches are designed to accommodate most bolting applications. However, due to space constraints, location of reaction points

or need for special sockets and adapters, there is often a need for customized components.

◀ *Custom hydraulic torque wrench for a fracking pump.*

◀ *Custom S6000X hydraulic torque wrench fitted with a custom reaction arm/socket.*

◀ *Custom hydraulic torque wrenches with reaction paddles for use with a flexible flowline.*

OVERVIEW

▲ *Custom S11000X torque wrench with a custom torque link and reaction roller*

CUSTOMIZABLE FEATURES:

- Reaction Arms
- Torque Links (split or layered for extremely space restricted applications)
- Reaction Roller Assemblies
- Sockets (direct drive, castellated, peg drive, stacked)
- Drives (direct Allen, spline, square drive size)
- Hex Reducing and Square Drive Inserts

Optimum Torque Wrench and Pump Combinations

ZU4 Electric Torque Wrench Pump

Utilizing a universal motor, the ZU4-Series has excellent low voltage characteristics. It works well with long extension cords or generator driven electrical power supplies. A field proven, efficient design ensures this pump is dependable and will draw less current — lowering your operating cost. The pumps are available in Pro and Classic formats.

ZU4 Pro pumps have an LCD feature to display torque or pressure, selectable torque wrench, and self-diagnostics — premium features not available on any other pump.

ZU4 Classic pumps feature an analogue gauge and a basic electrical package to deliver durable, safe and efficient hydraulic power.

ZE-Series Electric Torque Wrench Pump

The ZE-Series features premium options, such as the LCD to display torque or pressure values, and self-diagnostics. These pumps utilize an induction motor, making the ZE-Series the coolest and quietest pumps in their class.

ZA-Series Air Driven Torque Wrench Pump

Utilizing the highly efficient design of the Z-Class pumping element, this air driven pump is best suited to power medium to large size torque wrenches

TQ-700 Series Electric Torque Wrench Pump

Designed for both portability and production, the TQ-700 features optimized flow technology to deliver superior bolting speed.

Twin Torque Wrench Hoses

Use Enerpac THQ-700 series twin hoses with 10,000 psi pumps, or use THC-700 series twin hoses with 11,600 psi pumps.

For S & W (10,000 psi)

19.5' long, 2 hoses	THQ-706T
39' long, 2 hoses	THQ-712T

For SQD & HXD (11,600 psi)

19.5' long, 2 hoses	THC-7062
39' long, 2 hoses	THC-7122

Torque Wrench Couplers

For torque wrench couplers see our "System Components" section in this catalog.

Portable Electric Torque Wrench Pumps

▼ Shown: **PMU-10427**

- Powerful two-speed pump is lightweight and easy to carry
- Standard heat exchanger package keeps pump cool under extreme use
- Glycerin filled gauge with scales reading in psi and bar
- Transparent overlays in Ft.lbs and Nm for all Enerpac torque wrenches provide a quick torque reference
- Universal motor for a high power-to-weight ratio; generates full pressure on as little as 50% of the rated line voltage
- Adjustable pressure relief valve for accurate torque adjustments and precise repeatability

PMU/PME Series

Reservoir Capacity:

0.5-1 gal.

Flow at 10,000 psi:

20 in³/min.

Motor Size:

0.5 hp

Maximum Operating Pressure:

10,000 and 11,600 psi

Pump Ratings

-Q suffix pumps are for 10,000 psi torque wrenches, and include spin-on couplers.

-E suffix pumps are for use with 11,600 psi rated torque wrenches, and include polarized lock-ring safety couplers.

Twin Torque Wrench Hoses

Use Enerpac THQ-700 series twin hoses with 10,000 psi pumps, or use THC-700 series twin hoses with 11,600 psi pumps.

10,000 psi	
19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T
11,600 psi	
19.5 feet long, 2 hoses	THC-7062
39 feet long, 2 hoses	THC-7122

▼ SELECTION CHART

		700	11,600	200	20	PMU-10442	1.0	230V- 1 ph -50/60Hz	17 x 13 x 15	53

* For pump without heat exchanger change PMU into PME. Example: PME-10442-Q.

PME-Series pump size 10 x 10 x 14 inches. Weight 37.5 lbs. (.50 gallon) and 44 lbs (1 gallon).

▼ Shown: TQ-700E

- Three stage pump design delivers optimized flow rates and enables up to 50% faster bolting than competing pumps
- Compact and lightweight design fits through tight openings and provides easy handling
- Built-in protection for controls, gauge, and pendant for job-site durability
- IP55 rating for superior dust and water protection
- Advanced brushless motor provides for quiet, continuous operation, high voltage tolerance, and low maintenance
- Heat exchanger prevents breakdown of oil during heavy usage in hot environments
- Simple pressure setting and convenient pendant control for hassle-free operation

▼ The TQ-700E and the W-Series wrenches are a productive combination in wind applications.

Lightweight Electric Torque Wrench Pump

Optimized for S- and W-series Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Page: 203

Pendant Control

The TQ-700 comes equipped with a 20-foot pendant cord which allows the user to pressurize the pump from a distance increasing productivity and speed of setup.

Four Port Manifold

The TQ-700 Classic offers an optional four wrench manifold as an accessory (TQM) factory installed. (Add suffix "M" at the end of the model number. For example: TQ700EM)

Twin Torque Wrench Hoses

Use Enerpac THQ-700 series twin hoses with 10,000 psi pumps.

10,000 psi

19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T

Gauge Overlay Kit

Gauge overlay kits are also available separately.

GT-4015-Q includes overlays for all S- and W-Series

Torque Wrenches.

GT-4015 includes overlays for all SQD and HXD torque wrenches.

Electric Torque Wrench Pump

TQ-700 Series Pump Applications

The TQ-700 Series pump is ideal for powering hydraulic wrenches for the Power Generation and Wind Markets.

The TQ-700 has been engineered with **Optimized Flow Technology** to deliver up to 50% faster bolt tightening than competing pumps.

Bolting speed is more complex than how much flow per minute the pump produces. The key is optimizing the flow rate across the entire bolting cycle. With more oil flowing at the right time and at the right volume, you achieve the optimized flow for a hydraulic bolting system.

The result of this optimized flow is more bolts tightened faster and a more productive work team.

Internal laboratory testing based on standard torquing procedure on a pipe flange with 14, 1 1/2" bolts.

TQ Series

Reservoir Capacity:
1 gallon

Motor Size:
1.0 hp

Maximum Operating Pressure:
10,000 psi

IP55 Rating for Superior Dust and Water Protection

The IP Code (or Ingress Protection Rating) classifies and rates the degrees of protection provided against the intrusion of solid objects and water in mechanical casings and electrical enclosures.

An IP55 rating means the TQ-700 offers complete protection against contact with mechanical and electrical components, and that dust will not enter in a sufficient quantity to interfere with the operation of the equipment.

The IP55 rating also means water jets sprayed against the TQ-700 from any direction will not have any harmful effects.

Dimensions shown in inches.

Performance	For Use with Torque Wrenches		Pressure Rating	Model Number ¹⁾	Usable Oil Capacity	Motor Electrical Specification	Sound Level	Weight (no oil)
			(psi)		(gal)		(dBA)	(lbs)
Optimal	S1500X	W2000X	10,000	TQ-700B	1	115V-1 ph, 50 / 60 Hz	82-85	68
	S3000X	W4000X			1	230V-1 ph, 50 Hz	82-85	66

CLASSIC

Classic Electrical

Basic electrical package includes mechanical contactor, ON/OFF toggle switch, pendant with

electro-mechanical pushbuttons, 24V transformer timer and operator accessible circuit breaker.

- Features **Z-Class** high-efficiency pump design; higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Powerful 1.7 hp universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, molded composite shroud protects motor and electrical components, while providing an ergonomic, non-conductive handle for easy transport
- Low-voltage pendant provides additional safety for the operator

Pro-Series

- LCD readout provides pressure and torque display and a number of diagnostic and readout capabilities never before offered on a portable electric pump
- Auto cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed. (Pump can be used with or without auto cycle feature)

◀ Any brand of hydraulic torque wrench can be powered by the portable ZU4-Series torque wrench pump.

FIRMWARE for Pro-Series

- Display torque in Ft.lbs. or Nm
- Display pressure in bar, MPa or psi

- Torque wrench model is selectable
- "Auto cycle" setting easily programmable

www.enerpac.com

Back-lit LCD Display for Pro Series

- Digital pressure or torque read-out
- Programmable "Auto-Cycle" setting

- "Auto-Cycle" setting easily programmable
- Torque wrench model is selectable
- Display torque in Nm or Ft.lbs
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges

ZU4T Torque Wrench Pumps

Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides

high by-pass pressures for increased productivity—important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools.

Enerpac ZU4 Hydraulic Pumps are built to power small to large torque wrenches. Choosing the right ZU4 torque wrench pump for your application is easy.

Classic Electric Torque Wrench Pump

- The Classic has an analog gauge and traditional electro-mechanical components (transformers, relays and switches) in place of solid-state electronics. The Classic

delivers durable, safe and efficient hydraulic power.

Pro Series Electric Torque Wrench Pump

- Digital (LCD) display features a built-in hour meter, pressure and torque display, and shows self-diagnostic, cycle-count and low voltage warning information. These premium features are not available on any other pump—anywhere!
- AutoCycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed. (Pump can be used with or without AutoCycle feature).

ZU4T Series

Reservoir Capacity:

1 and 1.75 gal.

Flow at 10,000 psi:

60 in³/min.

Motor Size:

1.7 hp

Maximum Operating Pressure:

10,000 psi

OIL FLOW AND CURRENT vs PRESSURE

How to order your ZU4T-Series torque wrench pump

Ordering Example 1

Model No. ZU4208TB-QMHK

10,000 psi pump for use with Enerpac S- and W-Series and other 10,000 psi torque wrenches, 115V motor, 1.75 gallon reservoir, 4-wrench manifold, heat exchanger and skidbar.

Refer to the torque wrench pump selection matrix for optimum wrench, pump and hose combinations.

Twin Torque Wrench Hoses

Use Enerpac **THQ-700** series twin hoses with 10,000 psi pumps, or use **THC-700** series twin hoses with 11,600 psi pumps.

10,000 psi	
19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T
11,600 psi	
19.5 feet long, 2 hoses	THC-7062
39 feet long, 2 hoses	THC-7122

▼ Most hydraulic torque wrenches can be powered by the Enerpac ZU4-Series torque wrench pump.

ZU4T Torque Wrench Pump Options

Heat Exchanger

- Removes heat from the bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components

Skidbar

- Provides greater pump stability on soft or uneven surfaces
- Provides easy two-handed lift

ZU4T Series

Reservoir Capacity:

1 and 1.75 gal.

Flow at 10,000 psi:

60 in³/min.

Motor Size:

1.7 hp

Maximum Operating Pressure:

10,000 psi

Accessory Kit No. *	Can be used with:
ZHE-U115	115V pumps
ZHE-U230	230V pumps

* Add suffix **H** to pump model number for factory installation.
Heat Exchanger adds 9.1 lbs. to pump weight.

Ordering Example:

Model No. **ZU4208TB-H**

Accessory Kit No. *	Can be used on ZU4-Series torque wrench pumps
SBZ-4	1 and 1.75 gallon ¹⁾
SBZ-4L	1 and 1.75 gallon ²⁾

* Add suffix **K** to pump model number for factory installation.

¹⁾ Without heat exchanger 4.9 lbs.

²⁾ With heat exchanger 7.0 lbs.

Ordering Example:

Model No. **ZU4208TB-QK**

Roll Cage

- Protects pump
- Provides greater pump stability

4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches
- Can be factory installed or ordered separately

Accessory Kit No. *	Can be used on ZU4-Series torque wrench pumps
ZRC-04	1 and 1.75 gallon reservoir ¹⁾
ZRC-04H	1 and 1.75 gallon reservoir ²⁾

* Add suffix **R** for factory installation.

¹⁾ For use with pumps without a heat exchanger fitted

²⁾ For use with pumps with a heat exchanger fitted

Ordering Example:

Model No. **ZU4208BB-QR**

Accessory Kit No. *	Can be used on ZU4-Series torque wrench pumps
ZTM-E	for 11,600 psi torque wrenches
ZTM-Q	for 10,000 psi torque wrenches

* Add suffix **M** to pump model number for factory installation.

Ordering Example:

Model No. **ZU4208TB-QM**

GT-4015 includes overlays for all SQD and HXD torque wrenches.

◀ Most hydraulic torque wrenches can be powered by the Enerpac ZA4-Series torque wrench pump.

ZA4T Air Driven Torque Wrench Pumps

ZA4-Series Pump Applications

The ZA4-Series pump is best suited to power medium to large size torque wrenches.

Patent-pending *Z-Class* technology provides high by-pass pressures for increased productivity. Its high power-to-weight ratio and compact design make it ideal for applications which require easy transport of the pump.

For further application assistance contact your local Enerpac office.

ATEX Certified

The ZA-series pumps are tested and certified according to the **Equipment Directive 94 / 9 / EC "ATEX Directive"**.

The explosion protection is for equipment group II, equipment category 2 (hazardous area zone 1), in gas and/or dust atmospheres. The ZA-series pumps are marked with: Ex II 2 GD ck T4.

GT Series

Bolt Range:
 $\frac{5}{8}$ " - $3\frac{3}{4}$ " | M16-M95

Load:
0-319.8 tons

Maximum Operating Pressure
21,750 psi

How to Order

To provide maximum flexibility Load Cell and Bridges are ordered separately from Adaptor Kits.

Example, to order a complete tensioner for a 1" threaded bolt order:

1 x Load Cell and Bridge: **GT1-LCB**

1 x Adaptor Kit: **GT1P-NRS1000U08**

Bolting Integrity Software

A comprehensive on-line software solution for Bolted Joint integrity.

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants
- Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

www.enerpac.com

▼ Shown: **HPT-1500**

- Lightweight and portable high-pressure hand pump
- Two-speed operation displaces a larger volume of oil per stroke, reducing cycle times for many testing applications
- Includes a gauge and coupler for direct connection to GT-Series bolting tools
- Integrated relief valve set at 21,750 psi

HPT Series

Reservoir Capacity:

155 in³

Flow at 10,000 psi:

.037-.99 in³/stroke

Maximum Operating Pressure:

21,750 psi (1500 bar)

Applications

The Enerpac HPT high-pressure Hand Pump is ideally suited for use with hydraulic bolt tensioning tools and hydraulic nuts.

Page: 246

Ultra High Pressure

These products operate at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

Page: 250

ZUTP-Series, Electric Tensioning Pump

▼ Shown: ZUTP-1500B

ZUTP Series

Reservoir Capacity:

1 gallon

Flow at Rated Pressure:

20.0 in³/min.

Maximum Operating Pressure:

21,750 psi

Ultra High Pressure

These products operate at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

Page: 250

- High efficiency Universal Motor draws lower amps for superior performance in remote locations with low power quality
- Two-stage pump design provides high flow at low pressure for fast system fills and controlled flow at high pressure for safe and accurate operation
- Compact and lightweight design fits through tight openings and provides easy handling
- Panel mounted 6" pressure gauge, with polycarbonate cover, is set into the protective metal shroud for improved visibility and safety
- Panel mounted user adjustable valve for safe and precise pressure control
- Safety relief valve limits output pressure

- ① Release Valve
- ② Sight Glass
- ③ 1/4" BSPM Outlet Port
- ④ User Adjustable Pressure Control Valve
- ⑤ Breather

21,750 PSI HIGH PRESSURE PUMP

Pump Type	Useable Oil Capacity (gal)	Valve Type	Model Number ¹⁾	Output Flow Rate at 0 psi (in ³ /min)	Output Flow Rate at 21,750 psi (in ³ /min)	Motor Electrical Specification	Sound Level (dBA)	Weight with oil (lbs)
High pressure	1.0	Manual	ZUTP-1500B	230	20	115 VAC, 1-ph	89	65
			ZUTP-1500E ²⁾			230 VAC, 1-ph		
			ZUTP-1500I ³⁾			230 VAC, 1-ph		

¹⁾ All models meet CE safety requirements and all TÜV requirements.

²⁾ European plug and CE EMC directive compliant.

³⁾ With NEMA 6-15 plug.

⁴⁾ Add suffix "H" for factory installation of Heat Exchanger.

ATP-Series Ultra High Pressure Air Pump

ENERPAC 
POWERFUL SOLUTIONS. GLOBAL FORCE.

▼ Shown: **ATP-1500**

**ATP
Series**

IBExU 070/10

Reservoir Capacity:

1.0 gallon

Flow at Rated Pressure:

4 in³/min.

Maximum Operating Pressure:

21,750 psi

These products operate at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

- General purpose, high pressure air driven pump unit for products requiring up to 21,750 psi hydraulic pressure
- Compact, lightweight, rugged steel frame for protection and easy handling
- Prelubricated pump element, does not require an airline lubricator
- Easily adjustable output pressure control
- Integrated and protected easy to read glycerin filled gauge
- Safety relief valve limits output pressure
- ATEX Certified

The ATP-series pump was tested and certified according to the Equipment Directive 94 / 9 / EC "ATEX Directive". The explosion protection is for equipment group II, equipment category 2 (hazardous area zone 1), in gas and/or dust atmospheres. The ATP-series pump is marked with: Ex II 2 GD ck T4.

Hydraulic Nut Cutters

▼ Shown from left to right: NC-3241, NC-1319, NC-1924

NC, STN Series

Capacity:

5-90 tons

Hexagon Nut Range:

0.5-2.88 inches

Maximum Operating Pressure:

10,000 psi

Enerpac Nut Cutters

Nut Cutters include a spare chisel, a spare set screw and the wrench used to secure the chisel. A CR-400 coupler is standard.

- Compact and ergonomic design, easy to use
- Unique angled head allows flush access
- Single-acting, spring return cylinder
- Heavy-duty chisels can be reground
- Applications include servicing trucks, piping industry, tank cleaning, petrochemical, steel construction and mining

Nut Cutter Sets

Hydraulic Nut Cutters are available as sets (pump, tool, gauge, adaptor and hose).

Set Model Number	Splitter Model Number	Pump Model Number
STN-1924H	NC-1924	P-392
STN-2432H	NC-2432	P-392
STN-3241H	NC-3241	P-392

◀ Easily removing rusty nuts during railroad construction is just one of many application examples for the Enerpac Nut Cutters.

Ordering Notes: Maximum allowable hardness to split is HRc-44. Not to be used on square nuts. Larger sizes available upon request.

* Available as Tool-Pump set, see note on this page.

▼ Shown: NS-7080, NS-70105

Power and Precision

High Performance Nut Splitter

- Specially designed to suit standard ANSI B16.5 / BS1560 flanges
- Single-acting, spring return cylinder
- Tri-blade technology provides three cutting surfaces on a single blade
- Interchangeable heads provide maximum nut range flexibility
- Preset scale allows controlled blade extension, which avoids damage to bolt threads
- Grip tape and handle included for more secure maneuverability
- Nickel-plated cylinder body for excellent corrosion protection and improved durability in harsh environments
- Internal Pressure Relief Valve for overload protection

Blade Cutting Depth Scale

Adjustable cutting depth scale for controlled blade extension, which avoids damage to bolt threads.

The scale indicates the bolt range in metric and imperial values on each cutting head.

Hydraulic Nut Cutters

The NC-Series models are available featuring an angle-head design for 0.50"-2.88" hexagon nuts.

Page: 251

FS-Series Spreaders

FS-Series Flange Spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 254

ATM Flange Alignment Tools

The ATM series provides safe high-precision flange alignment tools that fit most commonly used ANSI, API, BS, and DIN flanges.

Page: 256

◀ Heavily corroded and weathered nuts are quickly split and removed using an NS-Series Nut Splitter.

Hydraulic Nut Splitters

Nut Splitter Sets

To provide maximum flexibility, NS-Series Nut Splitters can also be ordered in sets (NS-xxxSx). Select Nut Splitter size and pump style from the chart below.

To order additional Cutting Heads (NSH-xxxxxx), Cylinders (NSC-xxx) or Replacement Blades (NSB-xxx), see Selection Chart below.

SET SELECTION:

- 1 Select your Nut Splitter
- 2 Select your pump type

NS Series

Capacity:

103.2-192.5 tons

Hexagon Nut Range:

2.75-5.38 inches

Maximum Operating Pressure:

10,000 psi

Hydraulic and Mechanical Industrial Spreaders

▼ Shown: FSH-14 and FSM-8 with safety blocks SB1

- Integrated wedge concept: friction-free, smooth, parallel wedge movement eliminates flange damage and spreading arm failure
- Unique interlocking wedge design: no first step bending and risk of slipping out of joint
- Requires very small access gap of only .24 inch (6 mm)
- Stepped spreader arm design: each step can spread under full load
- Few moving parts means durability and low maintenance
- Safety block SB-1 and ratchet spanner SW-22 included with FSM-8
- Safety block and Enerpac RC-102 cylinder included with FSH-14

FSM/FSH/STF Series

Tip Clearance / Maximum Spread*:

0.24/3.16 inches

Maximum Spread Force:

8-14 tons

Maximum Operating Pressure:

10,000 psi (FSH-14)

Stepped Blocks FSB-1

Use this pair of stepped blocks to increase wedge opening up to 3.16 in. (81 mm). Fits both FSH-14 and FSM-8.

Flange Spreader Sets

The hydraulic flange spreader, **FSH-14**, is available as a **set** (pump, tool, gauge, gauge adaptor, couplers and hose) for your ordering convenience

Spreader Model No.	Handpump Model No.	Set Model Number
FSH-14	P-392	STF-14H

Max. Spreading Force (ton)	Model Number	Tip Clearance (in)	Max. Spread ¹⁾ (in)	Type	Oil Capacity (in³)	Weight (lbs)
8	FSM-8	.24	3.16	Mechanical	-	14.3
14	FSH-14*	.24	3.16	Hydraulic	4.76	15.7

¹⁾ Using stepped blocks FSB-1.

* Available as Tool-Pump Set, see note on this page.

▼ Two FSH-14 spreaders used simultaneously with Enerpac handpump, hoses and AM-21 split-flow manifold.

▼ From left to right: **ATM-4**, **ATM-9**, **ATM-2**

The faster, simpler and safer way to align flanges

- Enerpac ATM-Series tools rectify twist and rotational misalignment quickly, safely, and without the need for an external power source
- Appropriate for use on most ANSI, API, BS and DIN flanges
- No slings, hooks or lifting gear required
- Can be installed and used in any position (horizontally or vertically)
- Portable, lightweight design enables easy transport and use, even in remote locations

Adjustable Reach

The highly adjustable reach of the wing and drop leg on the **ATM-4** and **ATM-9** allows precise alignment.

Gauge and Adaptor

The **ATM-9** includes P-142 hand pump and HC-7206C 6 ft. long hose. Enerpac recommend the use of the pressure gauge **GP-10S** and gauge adaptor **GA-4** for easy mounting of the gauge onto your system.

Page: 131

▼ The compact **ATM-2** is actuated by simply hand turning the crank.

▼ The **ATM-9** is shown here with optional pressure gauge and gauge adaptor.

ATM-Series, Flange Alignment Tools

Applications

Enerpac ATM-Series Tools help correct flange misalignment, and allow bolts to be placed into joints. This alignment takes place during pipework construction, or maintenance.

These tools provide pipe installers and maintenance personnel with some of the simplest, safest and most productive solutions available for flange alignment in the market today.

- ① Extendable wing provides usage on wide variety of flanges.
- ② Portable, light weight design enables easy transport and use.
- ③ Hand-adjustable base for easy positioning by a single operator.
- ④ Safety strap helps provide secure operation from a horizontal or vertical position.

ATM-2

ATM-4

ATM-9

Maximum Lifting Force (ton)* (kN)*	Model Number	Minimum Bolt Size**		Flange Wall Thickness (max)		Wt. (lbs)
		(in)	(mm)	(in)	(mm)	
1	10	ATM-2	.63	16	.55 - 3.29 14 - 82	3.5
4	40	ATM-4	.95	24	1.18 - 5.23 30 - 133	19
10	90	ATM-9**	1.24	31.5	3.66 - 9.00 93 - 228	32

* At 10,000 psi maximum operating pressure.

** ATM-9 includes an Enerpac hand pump and hydraulic hose (gauge and adaptor sold separately). ATM-9 weight includes tool only.

ATM Series

Minimum Bolt Size:

.63-1.24 inches

Flange Wall Thickness:

.55-9.00 inches

Maximum Lifting Force:

1-10 tons

Cylinder-Pump Sets

Hydraulic cylinders, jacks and lifting wedges can also be used to assist in pipe line positioning and aligning.

Page: 52

Pipe Flange Face Tool

The portable, hand powered tool FF-120 makes even the hardest to reach pipe flanges resurfaceable in a safe and convenient way.

Page: 258

▼ The ATM-Series – the faster, simpler and safer way to align flanges.

▼ Shown: FF-120

Safe, efficient and accurate refacing of flat pipe flange surfaces

Complete In-Wheeled Carrying Case

The **FF-120** comes as portable set (15 kg). Can be transported, easy set-up and operated by a single technician.

Set includes:

- **FFL-kit** with locators, O-Rings and extensions
- **FSS-kit** with feed screw and nut 1/2"-20 UN for surface roughness Ra 64 - 96 µin.
- **FSF-kit** with feed screw and nut 1/2"-11 UNF for surface roughness Ra 125 - 250 µin.

- Refacing made easy — hand-operated machine tool can be set up anywhere without the need for air, electric or hydraulic power support
- Lightweight and portable — easily transported to remote locations for increased productivity
- Adjustable cutting range for flange diameters between 1-12 inches [25,4-304,8 mm]
- Interchangeable collets for ID mounting range from 1-6 inches allowing the user to work on many different flanges with minimal time between set-ups
- Interchangeable lead screws suitable for refacing damaged raised-face (RF), flat-face (FF) or lens-ring joint flanges
- Tool body with expanding collets centers itself providing real concentric operation

Joint Separation Tools

FS and FSH-Series

parallel wedge spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 254

Joint Assembly Tools

Rectify twist and rotational alignment without additional stress in pipe lines using the **ATM-Series** flange alignment tools.

Page: 256

▼ The Enerpac FF-120 used to face a pipe flange.

Quick Face, Mechanical Flange Face Tool

QuickFace, Mechanical Flange Face Tool

Portable, hand powered tool makes even the hardest to reach pipe flanges resurfaceable in a safe and convenient way.

Makes refacing easy

A simple and cost effective solution – the FF-120 turns a two man operation with heavy equipment, compressors and portable generators into a one man job.

The FF-120 has interchangeable lead screws that make it suitable for resurfacing damaged flat-faced, raised-face or lens-ring joint flanges to the high safety standards required. After selecting the correct lead screw for the operation, the tool body is inserted in the pipe end and centers itself with adjustable locators to provide real concentric operation.

The tool arm is then rotated by hand using a worm-gear mechanism to provide a perfect spiral “gramophone” finish.

The tool can be adjusted with a calibrated slide to define cut depth and the correct finish.

Surface finish and accuracy

A serrated finish with 30-55 grooves per inch and a resultant roughness of between Ra 125-250 micro inches (3,18-6,35 µm).

The FF-120 has the same precision and quality of finish as a lathe.

Cost effective solution

Small and portable enough to be a permanent addition to your equipment range, Enerpac’s FF-120 is the perfect solution to all of your small diameter facing problems.

FF Series

Pipe Flange Cutting Diameter Range:

1-12 in (25-305 mm)

Internal Pipe Mounting Diameter Range:

1-6 in (25-152 mm)

Average Roughness:

125-250 µin (3,18-6,35) µm

- 1 Hand-operated cold work tool – no need for external power and hot work permits.
- 2 Calibrated cross slide for accurate cutting control.
- 3 Adjustable cutting head for reface of flat flange surfaces of pipes with flange OD facing range \varnothing 1-12 inch [25,4-304,8 mm].
- 4 Interchangeable lead screws enable selection of surface finish between Ra 125-250 µin.
- 5 Utilizes standard 3/8 inch or 10 mm tool steel.
- 6 Range of interchangeable collets allow the tool to accommodate \varnothing 1 - 6 inch [25,4 - 152,4 mm] pipe ID.
- 7 Tool body with expanding collets centers in the bore ensuring concentric and accurate set-up.

- | | |
|--|------------------------|
| 1 Feed Knob | 6 Tool Block |
| 2 Gear Box | 7 Swivel Slide |

Enerpac's Heavy Lifting Technology provides customers with tailored solutions, combining hydraulics, steel fabrication and electronic controls for safe, precise movement of heavy loads.

With more than 50 years supporting industrial markets, Enerpac has gained the unique and in-depth expertise that is respected by industrial professionals around the world.

Enerpac's complete line of standard and customized products and a unique systems approach offers the benefits of safety and efficiency to applications where high forces are required.

Whether constructing a signature bridge, performing a heavy load out, fabricating a new ship or positioning a large transformer, Enerpac will supply the hydraulic solutions to get the job done safely and efficiently.

EXPERIENCE and EXPERTISE

HYDRAULICS

Moving heavy loads with hydraulic systems is our core expertise. Enerpac designs, manufactures, integrates and tests complete hydraulic systems in house.

ELECTRONICS

Our in-house team of electrical engineers combine their knowledge of heavy lifting equipment to tailor system controls to match unique project requirements.

STEEL FABRICATION

Enerpac has a dedicated facility for steel fabrication and welding. We design and manufacture custom structures used in demanding heavy-lifting applications.

Jacking with high capacity precision control

Synchronous superlift and launch

Precision lift and position of heavy loads

Synchronous hoisting and load positioning

▼ Shown: HSK1250 Skidding System

Ideal Jack and Slide Solution

Skidding Systems

The skidding system is comprised of a series of skid beams moved by hydraulic push-pull cylinders, travelling over a pre-constructed track.

A series of special PTFE coated pads are placed on the skid tracks to reduce friction. The PTFE surface is matched with a sliding plate under the Enerpac skid beams, designed to achieve minimum friction coefficients. The skid beams are connected by hoses to a hydraulic electric or diesel driven powerpack.

In addition to our standard skidding systems, Enerpac can create customized skidding systems to meet your specific requirements.

HSK-Series Skidding Systems

- PTFE skid pads with dimpled surface for low friction and long lifetime
- Easy to replace skid pads, no tools necessary
- Bi-directional operation using push-pull cylinders avoid the need to reposition cylinders for switching direction
- Large load support surface on the skid beams for distributing load
- Bottom of skid shoes equipped with stainless steel sliding plates

LH-Series, Low-Height Skidding System

- 2-in-1 track design for added support
- Intuitive pump controls (SFP-Series Split-Flow Pump)
- Easily reversible to change skidding direction
- Portable design for quick setup

▼ A custom hydraulic Low-Height Skidding System will provide the maintenance team with the ability to maneuver and transport transformers with physical access limitations.

Controls

Enerpac offers several options for controlling our skidding systems.

Wireless Controls allows the operator the freedom to view the skidding operation from multiple locations while providing complete control of all system functions.

Manual controls offer a cost-effective solution by utilizing manual hydraulic valves mounted directly on the skidding system power unit.

▼ HSKJ-1250 Skid Shoe Jack.

Skidding Systems

Enerpac Skidding Systems are available in several versions:

- **B-Series (Skid Beam)** utilizes a tall skid beam with built-in push-pull cylinders. Skidding direction can be easily switch by flipping a lever on the attached gripper box.
- **J-Series (Skid Jack)** provides the same functionality as the B-Series with the added benefit of having a built-in cylinder for lifting or leveling the load.

- **LH-Series (Low Height)** includes low-height skid beams that can fit in tight spaces while still offering high capacity. We also offer a track support for added rigidity when the surface is not fully supported.

HSK LH Series

Capacity:

100-280 tons

Stroke Push/Pull:

23.62 inches

Lifting Stroke*:

6.89 inches

* Skid shoe jack version only.

Skid Tracks

Include specially constructed and easily replaceable PTFE coated pads. Skid track is sold separately.

Hydraulic Power Packs

Enerpac offers a comprehensive range of hydraulic power packs that are optimized for use with Skidding Systems.

LH-Series Skidding System Requirements

- 1 Skid Track (required)
- 2 Skid Beam (required)
- 3 Push-Pull Cylinder Unit (required)
- 4 Hydraulic Hoses (required)
- 5 Split-Flow Electric Pump (required)
- 6 Track Support (optional, not shown)
- 7 Storage/Transport Frame (optional, not shown)
- 8 Pump Cart (optional, not shown)

HSK-Series Skidding System Requirements

- 1 Skid Track
- 2 Skid Beam
- 3 Hydraulic Power Pack
- 4 Hydraulic Push-Pull Unit

▼ Shown: HSL50006 Strand Jack

- Precision control of synchronous lifting and lowering
- Can be controlled by a single operator from a central location for increased safety
- Automated locking - unlocking operation
- Two strand sizes: 0.62 in (15.7 mm) and 0.71 in (18 mm)
- Telescopic strand guide pipes prevent bird caging
- Internal components are coated with Lunac, an anti-corrosion coating, making it suitable for marine environments
- Lifting anchor included with all strand jacks
- Lloyds witness tested to 125% of maximum working load

Heavy Lifting Strand Jacks

High Capacity -
Precision Control

Strand Jacks

Enerpac strand jacks are the strand jacks of choice for customers seeking precise synchronous control with heavy lifting capacity in an economical, compact, and reliable foot print.

Enerpac strand jacks are powered by electrical or diesel driven hydraulic power packs and controlled by Enerpac's proprietary SCC-Smart Cylinder Control System to ensure full control of lifting and lowering operations.

Enerpac continually improves reliability, durability, and safety of their strand jacks, making them an industry standard for heavy lifting.

▼ Shown: HSL85007 Strand Jack System used on Enerpac custom Self-Erecting Tower.

▼ Enerpac's SCC-Smart Cylinder Control System simplifies synchronous operation with intuitive controls and a user-friendly graphical interface.

Heavy Lifting Strand Jacks

Strand Jacks

A strand jack can be considered a linear winch.

In a strand jack, a bundle of steel strands are guided through a main "lifting" jack. Above and below the cylinder are anchor systems with wedges that grip the strand bundle simultaneously. Lifting and lowering a load is achieved by hydraulically controlling the main jack and both mini jacks alternately.

In the case of system pressure loss, the wedges are mechanically closed automatically, holding the suspended load in place.

Today, strand jacks are widely recognized as the most sophisticated heavy lifting solution. They are used all over the world to erect bridges, load out offshore structures, and lift/lower heavy loads where the use of conventional cranes is neither economical nor practical.

Shown: HSL20006 Strand Jack

Strand Diameter inch (mm)	Capacity (tons)	Model Number	No. of Strands	Stroke (in)	A (in)	B (in)	C (in)	D (in)	Wt. (lbs)

SLPP-Series Hydraulic Power Packs

Enerpac offers a comprehensive range of hydraulic power packs that are optimized for use with their industry leading strand jacks.

SG-Series Strand Guide

Provides a guide for the strand as a strand jack lifts the load.

SR-Series Strand Recoiler

Passively pays in or pays out strands while jacking and lowering.

SD1 Strand Dispenser

Essential to safely unbundle a new strand coil.

Lifting Anchor

Each Strand Jack includes a lifting anchor for attaching strand to the load.

▼ Shown: SBL1100 with STSBL Skid Tracks, Header Beams and Side Shifts

- Self-contained hydraulics and electronics
- Intelli-Lift wireless control system
- Self-propelled wheels or tank rollers
- Foldable boom on SBL900, SBL1100, MBL500 and MBL600
- Full range of supplementary equipment: header beams, lifting lugs, side shift, skid tracks
- Designed and tested to meet ASME B30.1-2015 safety standards
- Lloyds witness tested to 120% of maximum working load

Precision Lift and Position of Heavy Loads

The Ultimate in Safety and Control

INTELLI-LIFT

The Intelli-Lift wireless control system is included with all Enerpac hydraulic gantries. The Intelli-Lift controller offers superior safety and control and includes the following features:

- Encrypted bi-directional communication that eliminates interference from other devices
- Remote operation using multi-channel wireless (2.4 GHz) or wired (RS-485) control
- High and low speed settings
- Automatic synchronization of lifting with an accuracy of 0.95 inch (24 mm)
- Automatic synchronization of travelling with an accuracy of 0.60 inch (15 mm)
- Overload and stroke alarms
- Remote side shift control
- Emergency stop switch

SL, SBL, MBL Series, Hydraulic Gantry

Hydraulic Gantries

Hydraulic Gantries are a safe, efficient way to lift and position heavy loads in applications where traditional cranes will not fit and permanent overhead structures for job cranes are not an option.

Hydraulic Gantries are placed on skid tracks to provide a means for moving and placing heavy loads, many times with only one pick.

Enerpac offers three series of Hydraulic Gantry systems:

• SL-Series Super Lift

The cost-effective SL-Series Super Lift offer control and stability for everyday lifting applications below 450 ton up to 25 feet.

• SBL-Series Super Boom Lift

The heavy-duty SBL-Series Super Boom Lift boom style gantries offer increased lifting capacity of over 450 ton to heights of almost 40 feet.

• MBL-Series Mega Boom Lift

The massive **MBL-Series Mega Boom Lift** offers capacities and lifting heights of over 600 ton at almost 47.7 feet extreme lifting conditions.

All Enerpac gantries are delivered with specific properties and control systems to ensure optimum stability and safety.

Drawing shows SBL-series, SL-series without boom.

▼ Additional Accessories –

Contact Enerpac for assistance at enerpac.com/contact-us

Skid Tracks

Skid tracks used for leveling and load distribution. Available in two standard lengths, 10 feet and 20 feet.

Header Beams

Sold in pairs and includes lifting points and fork pockets for easy positioning on gantry towers.

Available in 26.24 ft., 32.80 ft. and 39.36 ft. lengths.

Powered Side Shift

Electric propulsion controlled by standard gantry controls. Each set consists of 4 units.

Lifting Anchors

Designed to transfer the load to the top of the header beam. Can accommodate a 250 ton shackle or attach directly to the lifted load.

▼ Shown: JS-250-Series Jack-Up System (one lifting tower shown)

Incremental Lifting System – Synchronously Lift and Mechanically Hold

Typical Applications

- Bridge construction and demolition
- Port crane lifting
- Shovel undecking
- Top side lifting
- Ship hull block installation

Computer Controls

Enerpac Jack-Up Systems provide precision control suitable for many demanding lifting and lowering applications. The comprehensive self-contained design features simple to use software.

- Computer control for operating the Jack-Up system with automatic and manual lifting settings
- Automatic synchronization of multiple networked lift points
- Center of Gravity calculation
- Overload and stroke alarms
- Emergency stop switch at jack-up units and controls

- Self-contained hydraulics in each jack-up unit for uncluttered work area
- Synchronously lift loads with multiple jack-up units. The most common system set-up includes four jack-up units but can be expanded to include more
- Lifting barrels are stacked together to mechanically hold the load
- Up to 5% side load capacity depending on capacity and lift height
- Computer controls for operating the Jack-Up System with automatic and manual lifting settings

▼ Lifting an oil and gas pipe module

▼ A load is lifted in increments as barrels are slid into the system, lifted, and stacked; forming 'lifting towers'.

▼ The steel barrels are stacked together to mechanically hold the load.

JS-Series, Jack-Up Systems

Enerpac Jack-Up Systems

The Jack-Up System is a custom developed multi-point lifting system. A typical system setup includes four jack-up units, one positioned under each corner of a load.

Example: A four unit setup with JS250 has a lifting capacity of 1000 ton (250 ton per unit). The lifting frame of a jack up unit contains four hydraulic lifting cylinders, one in each corner, which lift the load using the stacked steel barrels.

A load is lifted in increments as barrels are slid into the system, lifted, and stacked; forming 'lifting towers'. A jack up system is operated and controlled by a computer control unit.

Each unit's lifting and lowering operations occur simultaneously; the computer control unit's synchronous technology maintains the balance of the load.

JS Series

Capacity per Lifting Tower:

140-840 tons

Lifting Height:

Up to 20-66 feet

Handle for manual barrel insertion on JS125, JS250 and JS500.
Automatic barrel insertion on JS750

SPMT Series

Capacity (per transporter):

67 tons

Transport Speed (unloaded-loaded):

1.9 - 1.0 mph

Motor Size:

75 hp

Self-Propelled Modular Transporter

The Enerpac Self-Propelled Modular Transporter (SPMT) features a minimized height and slim design, which makes it very easy to operate in confined spaces. Each wheel unit has a steering function as well as a lifting cylinder at its disposal. Wheel propulsion is established by wheel drives.

The SPMT is operated by the Intelli-Drive Remote Controller. This remote controller can be used both hard wired and wireless (based on radio frequency).

The SPMT is a modular system comprised of trailers with 3 axle lines each and diesel hydraulic power units (HPU). Depending on the model number, the trailers and HPUs can be configured to a maximum of 4 trailers in 2 rows (4x2) or 6 trailers in 2 rows (6x2).

This is the maximum setup of units that can work together on just one Intelli-Drive Remote Controller.

- **Modular design for multiple configurations**
- **Minimized height and slim design are ideal for in-plant operation**
- **Intelli-Drive wireless control system is intuitive and easy to use**
- **One power pack can operate 2-3 trailers maximum depending on model**
- **Two trailers and power pack can be shipped inside a 20 ft. container**
- **Hydraulic power unit is tier-4 diesel engine for reduced emissions**

Capacity (per transporter)	Transporter Model Number	Maximum Configuration (transporters in rows)	Steering Range	Steering Mode		Retracted Height	Average Travel Height		Overall Length	Lifting Stroke	Wt. (SPMT)	HPU * Model No.	Wt. (HPU*)

* HPU = 54 kW Power Pack Diesel. HPU is sold separately.

Custom Heavy Lifting Solutions

When your application requires something other than our standard product offering, look to Enerpac's Heavy Lifting Technology, experience, and expertise.

Our group of engineers, designers, and specialists will work with you to understand your specific application and provide a turn-key solution that will exceed your expectations.

STEEL FABRICATION

Enerpac has a dedicated facility for steel fabrication and welding. We design and manufacture custom structures used in demanding Heavy Lifting applications.

ENGINEERING

Enerpac's multi-disciplined Heavy Lifting Technology team is capable of the design and development of all aspects of an integrated system. Leveraging design and application experience with the latest in methodologies, computer design, rapid prototyping and analysis ensures delivery of the highest quality.

ELECTRONICS

Enerpac designs all control systems in-house. This capability keeps control technology close to the design engineers who are developing the rest of the system. In doing so, we can tailor the control system to match unique project requirements.

MACHINING

Enerpac utilizes the latest in CNC machining technologies and manufactures all large and special hydraulic cylinders in-house. We can machine diameters up to 3 inches with lengths to 25 inches.

FIELD SUPPORT

Enerpac's Heavy Lifting-Technology team is available to provide on-site support including training and troubleshooting of systems. Enerpac also stocks repair parts and consumable items at several locations to ensure fast delivery for minimal downtime.

HYDRAULIC POWER UNITS

Enerpac designs, assembles and tests small to large hydraulic power units in-house. Power units range from 0.5 to 300 hp and are tested with the system they are intended to operate.

MAINTENANCE and REPAIR

Due to the unique nature of Enerpac's Heavy-Lifting Technology systems, we offer complete maintenance and repair services. Our M&R group is available to assist customers who do not have access to local service facilities qualified to work on these systems.

JACK-UP SYSTEM

The Jack-Up system is a custom developed multipoint lifting system. A typical system setup includes four jack up units, one positioned under each corner of a load. A four unit setup has a lifting capacity of 2200 tons (567 tons per unit).

STRAND JACK GANTRY

The Strand Jack gantry is a steel structure to facilitate erection and skidding back, forth and sideways of heavy loads. The Enerpac strand jack gantry can be used with either skidding systems or hydraulic gantries on top.

AUTONOMOUS SYNCHRONOUS HOIST SYSTEMS

The SHAS-Series Synchronous Hoist System is a below-the-hook crane attachment comprised of multiple self-contained, PLC-controlled hydraulic lifting devices. The system enables a single crane to precisely position heavy and unbalanced loads.

BRIDGE LAUNCH

Providing a solution for the most complex and demanding bridge construction applications, Enerpac has over 20 years experience providing unique customer bridge launching systems.

TRAVEL GANTRY

The travel gantry combines the safety and efficiency of a hydraulic gantry with the ease of use of SPMT (Self-Propelled Modular Transporter) technology. With a lifting capacity of 67 tons, the travel gantry sets a new standard in equipment and container handling.

ROTOR REMOVAL AND INSTALLATION SYSTEM

The generator rotor removal and installation system is a custom developed product for removing and installing the rotor (field) in a power plant's generator. The system is designed to comply with the varying dimensions and challenging accessibility of a plant's generator.

CUSTOM HYDRAULIC PRESSES

Our hydraulic presses can be configured to fulfill a broad range of applications. Each press is designed and manufactured according to customer specifications and in cooperation with our engineering team.

SELF-ERECTING TOWER

The Enerpac Self-Erecting Tower (ESET) is a self-erecting tower lift system that enables you to build a free standing gantry from ground level. The ESET can be supplied in various capacities and lifting heights and is built with standard modular components, enabling a flexible solution to future project demands.

LAS VEGAS WHEEL

Our expertise has been acknowledged by the world's leading industrial professionals and has contributed to the successful movement of a number of the most recognizable structures on earth. At the time of construction, the Las Vegas High Roller was the largest observation wheel in the world. A custom hydraulic drive system was developed to propel the wheel for daily use and was also used to construct the wheel in sections.

Enerpac “Yellow Pages” stand for Hydraulic Information!

If selecting hydraulic equipment is not your daily routine then you will appreciate these pages. The “Yellow Pages” are designed to help you work with hydraulics. They will help you to better understand the basics of hydraulics, of system set-ups and of the most commonly used hydraulic techniques. The better your choice of equipment, the better you will appreciate hydraulics. Take the time to go through these “Yellow Pages” and you will benefit even more from Enerpac High Pressure Hydraulics.

ENERPAC WARRANTY STATEMENT

www.enerpac.com

Visit our website for the complete Enerpac Global Warranty or call your Enerpac representative or Enerpac Authorized Service Center.

Enerpac is certified for several quality standards. These standards require compliance with standards for management, administration, product development and manufacturing.

Enerpac works hard to maintain the ISO 9001 quality rating, in its ongoing pursuit of excellence.

CE Marking & Conformity

Enerpac provides Declarations of Conformity, Declarations of Incorporation, and CE marking for products that conform to the European Community Directives.

Where specified, Enerpac electric power units meet the design, assembly and test requirements of The Standards Council of Canada (CAN C22.2 No. 68-92), and UL73 for the United States. Units were tested and certified for both USA and Canada by TUV, a nationally recognized testing laboratory.

Torque Tensioning		

EMC Directive

Where specified, Enerpac electric power pumps meet the requirements for Electro-magnetic Compatibility per EMC Directive 2004/108/EC.

ATP-1500, ZA and XA-Series air-motor driven pumps, and S- and W-Series Torque Wrenches are tested and certified according to the Directive 2014 / 34 / EU “ATEX Directive”. The explosion protection is for equipment group II, equipment category 2 (hazardous area zone 1), in gas and/or dust atmospheres. ATP-1500, ZA and XA-Series pumps are marked with: Ex II 2 GD ck T4.

ASME B30.1-2015

Our cylinders fully comply with the criteria set forth by the American Society of Mechanical Engineers (except RD, BRD, CLL, CLS and CLP-Series).

ISO1402, ISO4672, ISO6803

Enerpac thermoplastic hoses are related to the criteria set forth in these standards.

Product Design Criteria

All hydraulic components are designed and tested to be safe for use at maximum 10,000 psi unless otherwise specifically noted.

Safety Instructions

ENERPAC
POWERFUL SOLUTIONS. GLOBAL FORCE.

- Lift slowly and check often
- Avoid standing in the line of force
- Anticipate possible problems and take steps to avoid them

When used correctly, hydraulic power is one of the safest methods of applying force to your work. To that end we offer some DO's and DON'Ts, simple common sense points which apply to practically all Enerpac hydraulic products.

The illustrations and application photos of Enerpac products throughout this catalog are used to portray how some of our customers

have used hydraulics in industry. In designing similar systems, care must be taken to select the proper components that provide safe operation and fit your needs. Check to see if all safety measures have been taken to avoid the risk of injury and property damage from your application or system. Enerpac cannot be held responsible for damage or injury caused by unsafe use, maintenance or application of its products.

Please contact the Enerpac office or a representative for guidance when you are in doubt as to the proper safety precautions to be taken in designing and setting up your particular system.

In addition to these tips, every Enerpac product comes with specific safety information and instructions. Please read them carefully.

Jacks

◀ Provide a level and solid support for the entire jack base area.

◀ The entire jack saddle must be in contact with the load. Movement of the load must be in the same direction as jack plunger.

◀ Never place any part of your body under the load. Ensure the load is on a solid support before venturing under.

◀ Remove the jack handle when it is not being used.

Cylinders

◀ Provide a solid support for the entire cylinder base area. Use cylinder base attachment for more stability.

◀ The entire cylinder saddle must be in contact with the load. Movement of the cylinder must be parallel with the movement of the load.

◀ Do not use cylinder without saddle. This will cause plunger to "mushroom". Saddles distribute load evenly on the plunger.

◀ As with jacks, never place any part of your body under the load. Load must be on cribbing before venturing under.

◀ Always protect cylinder threads for use with attachments.

◀ Keep hydraulic equipment away from open fire and temperatures above 150 °F (65 °C).

General

80% Manufacturer's rating of load and stroke are maximum safe limits. **80%** Good practice encourages using only 80% of these ratings!

Always read instructions and safety warnings that come with your Enerpac hydraulic equipment.

Both couplers must be connected when using double-acting cylinders. Ensure return hose is fitted.

Pumps

Don't use handle extenders. Hand pumps should be easy to operate when used correctly.

Close release valve finger tight. Using force will ruin the valve.

Fill pump only to recommended level. Fill only when connected cylinder is fully retracted.

Always use genuine Enerpac hydraulic oil.

Hoses and couplers

Clean both coupler parts before connecting. Use dust caps when coupler parts are not connected.

Detach cylinder only when fully retracted or use shut-off valves or safety valves to lock-in cylinder pressure.

Keep hoses away from the area beneath loads.

Don't kink hoses. Bending radius should be at least 4 1/2 inch. Don't drive over or drop heavy objects on hoses.

Don't lift hydraulic equipment by the hoses.

Never allow the cylinder to be lifted off of the ground through the couplers.

Pump Selection

www.enerpac.com

Visit our web site to learn more about hydraulics and system set-ups.

Flow

A hydraulic pump produces flow

Pressure

Pressure occurs when there is resistance to flow

Pascal's Law

Pressure applied at any point upon a confined liquid is transmitted undiminished in all directions (Fig.1).

This means that when more than one hydraulic cylinder is being used, each cylinder will lift at its own rate, depending on the force required to move the load at that point (Fig. 2).

Cylinders with the lightest load will move first, and cylinders with the heaviest load will move last (Load A), as long as the cylinders have the same capacity.

Figure 1

To have all cylinders operate uniformly so that the load is being lifted at the same rate at each point, either control valves (see Valve section) or Synchronous Lift System components (see Cylinder section) must be added to the system (Load B).

Figure 2

Synchronous Lift or Control Valves to provide uniform lifting of load.

CAUTION!

When lifting or pressing, always use a gauge.

A gauge is your "window" to the system. It lets you see what's going on. You will find the gauges in the System Components section.

Page: 131

Learn more about hydraulics

Visit www.enerpac.com to learn more about hydraulics and system set-ups.

Force

The amount of force a hydraulic cylinder can generate is equal to the hydraulic pressure times the “effective area” of the cylinder (see cylinder selection charts).

Force	=	Hydraulic Working Pressure	x	Cylinder Effective Area
F	=	P	x	A

Use this formula to determine either force, pressure or effective area if two of the variables are known.

Example 1

An RC-106 cylinder with 2.24 in² effective area operating at 8,000 psi will generate what force?

Force = 8,000 psi x 2.24 in² = 17,920 lbs.

Example 2

An RC-106 cylinder lifting 14,000 lbs will require what pressure?

Pressure = 14,000 lbs ÷ 2.24 in² = 6,250 psi.

Example 3

An RC-256 cylinder with 5.15 in² effective area is required to produce a force of 41,000 lbs. What pressure is required?

Pressure = 41,000 lbs. ÷ 5.15 in² = 7961 psi.

Example 4

Four RC-308 cylinders each with 6.49 in² effective area are required to produce a force of 180,000 lbs. What pressure is required?

Pressure = 180,000 lbs ÷ (4 x 6.49 in²) = 6933 psi.

Remember, since four cylinders are used together, the area for one cylinder must be multiplied by the number of cylinders used.

Example 5

A CLL-2506 cylinder with 56.79 in² effective area is going to be used with a power source that is capable of 7,500 psi. What is the theoretical force available from that cylinder?

Force = 7,500 psi x 56.79 in² = 425,925 lbs.

Cylinder Oil Capacity

The volume of oil required for a cylinder (cylinder oil capacity) is equal to the effective area of the cylinder times the stroke*.

Cylinder Oil Capacity	=	Cylinder Effective Area	x	Cylinder Stroke
-----------------------	---	-------------------------	---	-----------------

* **Note:** these are theoretical examples and do not take into account the compressibility of oil under high pressure.

Example 1

An RC-158 cylinder with 3.14 in² effective area and an 8 in. stroke will require what volume of oil?

Oil Capacity = 3.14 in² x 8 in = 25.12 in³

Example 2

An RC-5013 cylinder has an effective area of 11.05 in² and a stroke of 13.25 in. How much oil will be required?

Oil Capacity = 11.05 in² x 13.25 in = 146.41 in³

Example 3

An RC-10010 cylinder has an effective area of 20.63 in² and a stroke of 10.25 in. How much oil will it require?

Oil Capacity = 20.63 in² x 10.25 in = 211.46 in³

Example 4

Four RC-308 cylinders are being used, each with an effective area of 6.49 in² and stroke of 8.25 in. How much oil will be required?

Oil Capacity = 6.49 in² x 8.25 in = 53.54 in³ for one cylinder

Multiply by four to obtain the required capacity: 214.17 in³

CAUTION!

Enerpac oil will compress 2.28% at 5,000 psi and 4.1% at 10,000 psi.

Page: 136

Conversion Tables

Key to cylinder dimensions

Dimensions shown in the Selection Charts of the cylinder section are identified on the relevant drawings by the capital letter references listed here: A for collapsed height through Z for depth of internal base thread.

- A = Collapsed height
- B = Extended height
- C = Cylinder body length
- D = Cylinder outside diameter
- D1 = Cylinder width
- E = Cylinder inside diameter (bore)
- F = Plunger rod diameter
- G = Oil inlet thread
- H = Cylinder bottom to advance port
- I = Cylinder top to retract port
- J = Saddle outside diameter
- K = Cylinder rod protrusion at collapsed height
- L = Plunger center to side of base
- M = Mounting holes to plunger center
- N = Length of smaller cylinder part
- O = Plunger hole or thread of saddle
- P = Plunger thread length
- Q = Plunger outside thread (pull cylinders only)
- U = Bolt circle diameter of mounting holes
- V = Thread of cylinder mounting holes
- W = Collar thread
- X = Collar thread length
- Y = Center hole diameter (hollow cylinders only)
- Z = Depth of internal base thread

Key to measurements

All capacities and measurements in the catalog are expressed in uniform values.

The conversion chart provides helpful information for their translation into equivalent systems.

You can also visit our website at www.enerpac.com to download a FREE conversion calculator.

Pressure:

- 1 psi = .069 bar
- 1 bar = 14.50 psi
- 1 kPa = .145 psi

Volume:

- 1 in³ = 16.387 cm³
- 1 cm³ = .061 in³
- 1 liter = 61.02 in³
- 1 liter = .264 gal
- 1 US gal = 3,785 cm³
- = 3.785 l
- = 231 in³

Weight:

- 1 pound (lb) = .4536 kg
- 1 kg = 2.205 lbs
- 1 metric ton = 2,205 lbs
- 1 ton (short) = 2,000 lbs
- 1 ton (short) = 907.18 kg

Temperature:

To convert °F to °C:

$$T_{°C} = (T_{°F} - 32) \div 1.8$$

To convert °C to °F:

$$T^F = (T_{°C} \times 1.8) + 32$$

Torque:

- 1 Ft.lbs = 1.356 Nm
- = 0.138 kgf.m
- 1 Nm = .738 Ft.lbs
- = 0.102 kgf.m

Other measurements:

- 1 in = 25.4 mm
- 1 mm = .039 in
- 1 in² = 6.452 cm²

Cylinder Speed

This chart will help you calculate the time required for an Enerpac cylinder to lift a load when powered by a 10,000 psi Enerpac hydraulic pump.

The Cylinder Speed Chart can also be used to determine the pump type and model best suited for an application when you know the plunger speed required.

To determine:

Cylinder plunger speed

An RC-308 cylinder (30 ton) is powered by a ZE-5 pump. While lifting the load, the cylinder plunger will require 3.2 seconds to travel 1 inch. While extending towards the load, the cylinder

5 t	30 t	50 t	75 t	100 t	Pump Type
No Load	No Load	No Load	No Load	No Load	
20.6	3.2	5.5	44.2	8.0	XC Series*

No Load indicates the plunger speed as the plunger extends toward the load (1st stage).

Load indicates the plunger speed as the load is lifted at a system pressure of 10,000 psi (2nd stage).

Formula $V = A \div Q$

V (sec/in) = A (in²) \div Q (in³/min)

V = Cylinder plunger speed in seconds per inch

A = Cylinder effective area in square inches

Q = Pump oil flow in cubic inches

Example: At what speed (V) will the RC-308 (30 ton) cylinder move when powered by a ZE3 electric driven pump?

RC-308 Cylinder effective area A = 6.50 in²

ZE3 pump oil flow Q , (no load) is 450 in³/min

$V = 6.50 \text{ in}^2 \div 450 \text{ in}^3/\text{min} \times 60 = .87 \text{ sec/in}$

$$\text{Cylinder Plunger Speed (sec/in)} = \frac{\text{Cylinder Effective Area}}{\text{Pump Flow Rate}} \times \frac{60 \text{ sec}}{1}$$

Ways

The (oil) ports on a valve.

A 3-way valve has 3 ports: pressure (**P**), tank (**T**), and cylinder (**A**).

A 4-way valve has 4 ports: pressure (**P**), tank (**T**), advance (**A**) and retract (**B**).

Single-acting cylinders require at least a 3-way valve, and can, under certain instances, be operated with a 4-way valve.

Double-acting cylinders require a 4-way valve, providing control of the flow to each cylinder port.

Positions

The number of control points a valve can provide. A 2-position valve has the ability to control only the advance or retraction of the cylinder. To be able to control the cylinder with a hold position, the valve requires a 3rd position.

Center Configuration

The center position of a valve is the position at which there is no movement required of the hydraulic component, whether a tool or cylinder.

The most common is the **Tandem Center**. This configuration provides for little to no movement of the cylinder and the unloading of the pump. This provides for minimum heat build-up.

The next most common is the **Closed Center** configuration, which is used mostly for independent control of multi-cylinder applications. This configuration again provides for little to no movement of the cylinder, but also dead-heads the pump, isolating it from the circuit. Use of this type of valve may require some means of unloading the pump to prevent heat build-up.

There are many more types of valves, such as Open Center and Float Center. These valves are used mostly in complex hydraulic circuits and require other special considerations.

Open Center

Float Center

Directional Control Valves

3-Way Valves

are used with single-acting cylinders

4-Way Valves

are used with double-acting cylinders

Valves may be either pump mounted or remote mounted.

Pump Mounted

Remote Mounted

Valves may be either manually or solenoid operated.

Manually Operated

Solenoid Operated

Advance Hold Retract

Single-acting cylinder

Controlled by a 3-way, 3-position valve.

Advance

The oil flows from the pump pressure port P to the cylinder port A: the cylinder plunger will extend.

Hold

The oil flows from the pump pressure port P to the tank T. The cylinder port A is closed: the cylinder plunger will maintain its position.

Retract

The oil flows from the pump port P and cylinder port A to the tank T: the cylinder plunger will retract.

Double-acting cylinder

Controlled by a 4-way, 3-position valve.

Advance

The oil flows from the pump pressure port P to the cylinder port A, and from cylinder port B to tank T: the cylinder plunger will extend.

Hold

The oil flows from the pump pressure port P to the tank T. The cylinder ports A and B are closed: the cylinder plunger will maintain position.

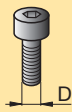

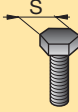

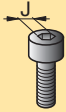

Retract

The oil flows from the pump pressure port P to cylinder port B, and from cylinder port A to tank T: the cylinder plunger will retract.

* Heavy hexagon nuts.

Determine the maximum torque according to the bolt (nut) size and grade. Always consult the manufacturers instructions or engineering recommendations when making bolted connections.

IMPORTANT

The hexagon sizes shown in the tables should be used as a guide only. Individual sizes should be checked before specifying any equipment.

BSH-Series Sockets

Use only Heavy Duty Impact Sockets for power driven torquing equipment, according to ISO2725 and ISO1174; DIN3129 and DIN3121 or ASME-B107.2/1995.

Page: 210

Tightening Methods

Principally there are two modes of tightening: "Uncontrolled" and "Controlled".

Uncontrolled tightening

Uses equipment and/or procedures that cannot be measured. Preload is applied to a bolt and nut assembly using a hammer and spanner or other types of impact tools.

Controlled tightening

Employs calibrated and measurable equipment, follows prescribed procedures and is carried out by trained personnel.

Advantages of Controlled Tightening

Known, controllable and accurate bolt loads

Employs tooling with controllable outputs and adopts calculation to determine the required tool settings.

Uniformity of bolt loading

Especially important on gasketed joints as an even and consistent compression is required for the gasket to be effective.

Safe operation following prescribed procedures

Eliminates the dangerous activities of manual uncontrolled tightening and requires that the operators be skilled and follow procedures.

Reduces operational time resulting in increased productivity

Reduces tightening time and operator fatigue by replacing manual effort with the use of controlled tooling.

Reliable and repeatable results

Using calibrated, tested equipment, following procedures and employing skilled operators achieves known results consistently.

The right results first time

Many of the uncertainties surrounding in-service joint failures are removed by ensuring the correct assembly and tightening of the joint are carried out the first time.

Bolting Integrity Software

A comprehensive on-line software solution for Bolted Joint integrity.

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants
- Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

www.enerpac.com

What is Torque?

It is a measure of how much force acting on an object which causes that object to rotate.

What is Torque Tightening?

The application of preload to a fastener by the turning of the fastener's nut.

Torque Tightening and Preload

The amount of preload created when torqueing is largely dependant on the effects of friction.

Principally there are three different "torque components":

- torque to stretch the bolt
- torque to overcome the friction in bolt and nut threads
- torque to overcome friction at the nut spot face (bearing contact surface).

Torque Tightening

Turning movement

Stretch of Fastener (Pre-load)

Preload (residual load) = Applied Torque *minus* Frictional Losses

Lubrication Reduces Friction

Lubrication reduces the friction during tightening, decreases bolt failure during installation and increases bolt service life. Variation in friction coefficients affect the amount of preload achieved at a specified torque. Higher friction results in less conversion of torque to preload. The value for the friction coefficient provided by the lubricant manufacturer must be known to accurately establish the required torque value.

Lubricant or anti-seizure compounds should be applied to both the nut bearing surface and the male threads.

Frictional Losses

Example of how a lubricant can reduce the effect of friction and convert more torque to bolt preload.

Torque Procedure

When torquing it is common to tighten only one bolt at a time, this can result in Point Loading and Load Scatter. To avoid this, torque is applied in stages following a prescribed pattern:

Torque Sequence

- Step 1** Spanner tight ensuring that 2 - 3 threads extend above nut.
- Step 2** Tighten each bolt to one-third of the final required torque following the pattern as shown above.
- Step 3** Increase the torque to two-thirds following the pattern shown above.

- Step 4** Increase the torque to full torque following the pattern shown above.
- Step 5** Perform one final pass on each bolt working clockwise from bolt 1, at the full final torque.

Friction points should always be lubricated when using the torque tightening method.

Select the Right Wrench

Choose your Enerpac torque wrench using the untightening rule of thumb:

- When loosening a nut or bolt more torque is usually required than when tightening.
- For general conditions it can take up to 2½ times the input torque to breakout.
- Do not apply more than 75% of the maximum torque output of the tool when loosening nuts or bolts.

Conditions of bolted joints

- Humidity corrosion (rust) requires up to twice the torque required for tightening.
- Sea water and chemical corrosion requires up to 2½ times the torque required for tightening.
- Heat corrosion requires up to 3 times the torque required for tightening.

Breakout Torque

When loosening bolts a torque value higher than the tightening torque is normally required.

This is mainly due to corrosion and deformations in the bolt and nut threads.

Breakout torque cannot be accurately calculated, however, depending on conditions it can take up to 2½ times the input torque to breakout.

The use of penetrating oils or anti-seize products is always recommended when performing breakout operations.

Tensioning requires longer bolts

INCORRECT

CORRECT

What is Bolt Tensioning

Tensioning is the direct axial stretching of the bolt to achieve **preload**. Inaccuracies created through friction are eliminated. Massive mechanical effort to create torque is replaced with simple hydraulic pressure. A uniform load can be applied by tensioning multiple studs simultaneously.

Tensioning requires longer bolts, and a seating area on the assembly around the nut. Tensioning can be done using detachable Bolt Tensioners or Hydraulic Nuts.

Preload (residual load) = Applied Load *minus* Load Losses

What is Load Loss

Load loss is a loss of bolt elongation depending on factors such as thread deflections, radial expansion of the nut, and embedding of the nut into the contact area of the joint. Load loss is accounted for in calculation and is added to the preload value to determine the initial **Applied Load**.

The preload depends on Applied Load and Load Loss (load loss factor).

GLOSSARY OF TERMS

Applied Load: The load applied to a bolt during tensioning which includes an allowance for Load Loss.

Bolt Tensioning: A method of controlled tightening which applies preload to a bolt by stretching it axially.

Breakout Torque: The amount of torque required to loosen a tightened bolt. (Usually more torque is required to loosen a bolt than was used to tighten it.)

Elastic Range: The range on a bolt's stress / strain curve where stress is directionally proportional to strain.

Load Loss: The losses in a bolt which occur on transfer of load from a tensioning device to the bolt assembly (these may arise from phenomena such as thread deflection and embedding of

the nut to the contact area of the joint, and is calculated as a factor of the length to diameter ratio of the bolt).

Load Scatter: The spread of differing loads in a sequence of bolts after they have been loaded. It is mostly due to the elastic interaction of the bolts and the joint member; as subsequently tightened bolts further compress the joint, previously tightened bolts are subject to some relaxation.

Plastic Range: The range on a stress/strain curve where the tensile load applied to a bolt results in permanent deformation.

Preload: The load in a bolt immediately after it has been tightened.

Proof Load: Proof load is often used interchangeably with Yield Strength but is usually measured at 0.2% plastic strain.

Tensile Point: The point at which the tensile loading on a bolt causes the bolt to rupture.

Torque Tightening: The application of Preload to a bolt by turning of the bolt's nut.

Ultimate Strength: The maximum tension which can be created by tensile load on a bolt.

Yield Strength: The point at which a bolt begins to plastically deform under tensile loading.

NOTE: Bolt is used as a generic term for a threaded fastener.

**Manufacturer's rating of pressure and load are maximum safe limits.
Good practice encourages using only 80% of these ratings!**

Tensioning Operation

Tensioning permits the simultaneous tightening of multiple bolts; the tools are connected in sequence via a high-pressure hose assembly to a single pump unit. This ensures each tool develops the exact same load and provides a uniform clamping force across the joint. This is especially important for pressure containing vessels requiring even gasket compression to affect a seal.

General Procedure

- Step 1:** The bolt Tensioner is fitted over the stud
- Step 2:** Hydraulic pressure is applied to the tensioner which then stretches the stud.
- Step 3:** The Stud's nut is wound down against the joint face
- Step 4:** Pressure is released and the tool removed.

The bolt behaves like a spring, when the pressure is released the bolt is under tension and attempts to contract, creating the required clamping force across the joint.

Step 1

Step 2

Step 3

Step 4

Less than 100% Tensioning

Not all applications allow for the simultaneous fit of a tensioning device on each bolt, in these cases at least two tensioning pressures are applied. This is to account for a load loss in those bolts already tensioned as the next sets are tightened. The load losses are accounted for in calculation and a higher load is applied to allow the first sets to relax back to the target preload.

Set-up using a 100% tensioning procedure

All bolts are tensioned simultaneously.

Set-up using a 50% tensioning procedure

Half the bolts are tensioned simultaneously, the tools are relocated on the remaining bolts and they are subsequently tensioned.

Read Instruction Manuals

Please refer to the product Instruction Sheets for safe use guidelines and detail on the correct set up and operation of the equipment.

Enerpac manufactures high-force hydraulics (cylinders, pumps, valves, presses, pullers, tools, accessories and system components) for industry and construction and provides hydraulic workholding and OEM solutions to industries worldwide.

With an 80-year history of quality and innovation, the broadest line in the business, and more than 4,000 distributors and factory-trained service centers around the world, Enerpac leads the industry by setting new standards in design, strength, durability and local support. Strict quality programs, zero tolerance for defects, and ISO-9001 certification are your assurance of safe, trouble-free operation.

Enerpac is ready to tackle your toughest challenge and provide the hydraulic advantage you need to increase productivity, labor efficiency and speed of operation.

Enerpac Academy - The Power of Knowledge

The Enerpac Academy is our in-house training program, offering Enerpac product operators and maintenance staff the opportunity to be trained in the use and maintenance of high-pressure hydraulic tools.

Operating these tools requires sound knowledge of how they work and how they should be maintained. Correct use of these tools increases safety and reduces risk – both for the operator and the environment in which the tools are used. Having the right training enables the operator to use the tools safely and properly.

Enerpac Academy

- Safety focus for operators, tools and environment
- Dedicated in-house Enerpac training centers
- Both standard training courses and specialized training services
- Highly experienced trainers
- Selection of training courses with a proven (value-added) track record
- Knowledge and experience sharing

In-house Training Centers

Do you work with high-pressure hydraulic tools on a regular basis or even every day? The training courses are designed to be highly interactive with a strong hands-on element. Each training course is led by a qualified trainer, an Enerpac specialist capable of providing high quality training. A written or practical exam is part of certain training courses.

Training Center Locations

- Columbus, Wisconsin (USA)
- Ede (The Netherlands)
- Hosur, Bangalore area (India)
- Singapore
- Sydney (Australia)

Enerpac Academy offers a meticulously compiled training program covering tool knowledge, repairs and maintenance, and safe operation of Enerpac hydraulic tools. If you would like to schedule a training course, please contact Enerpac for a training calendar, application form, and brochure at www.enerpac.com.
