All our machines are in-house owned and operated, are supplied with service schedules full compliant under PUWER / LOLER and can be transported by our own HGV anywhere in the UK within a very short timeframe.

HSE and Working at Height

The HSE state “**avoid** work at height where it's *reasonably practicable*”

This means balancing the level of risk against the measures needed to control the real risk in terms of money, time or trouble. However, you do not need to take action if it would be grossly disproportionate to the level of risk.

to do so

At MRF Contracting we assess the job, complete a pre works risk assessment and where possible can fell trees using excavators which are then chipped without a chainsaw being used. Much safer, quicker and cheaper!
