EMPOWERING INTELLIGENT CONTROL SYSTEMS

FR CONTROLS

Company Profile

At FR CONTROLS, we empower businesses to achieve operational excellence by simplifying complex automation challenges. Our intelligent control systems and programmable solutions are designed to unlock new efficiencies, enhance reliability, and streamline performance across industrial and building environments.

We combine proven engineering with forward-thinking innovation—investing in R&D to develop advanced, flexible controllers that adapt to your needs. Our scalable product range, from compact PLCs to high-capacity control hubs, ensures seamless integration and future-ready automation.

Backed by dedicated support and a growing global reach, FR CONTROLS is your trusted partner in smart automation. With us, you gain not just powerful tools—but a commitment to helping your next project run smoother, smarter, and stronger.

Vision

To become the leading provider of intelligent automation and control solutions, enabling smarter, more efficient, and sustainable environments across industries worldwide.

Mission

At FR Controls, our mission is to deliver high-quality, reliable, and customizable control systems that empower businesses to optimize performance, reduce operational costs, and achieve seamless integration in building and industrial automation.

We are committed to:

- Innovating user-friendly, scalable automation solutions
- Supporting clients with expert technical guidance and responsive service
- Building long-term partnerships through trust, quality, and performance

Product and Services

- Building Management System (BMS)
- Energy Monitoring and Control Systems
- System Integration and Automation Solutions
- Remote Monitoring and IOT Solutions
- Technical Support and Troubleshooting
- Training and Consultation
- Programmable Logic Controller and Sensors

T3 Series Bacnet Programmable Controller

T3000 controller is a multi-user, T3-BB and T3-TB. It can stand DDC panel alone or in a multiple network system with full communication capabilities. The multiple communication ports allow the controller to operate on a network or host sub networks and to communicate with local and remote operators simultaneously.

Setup and programming are done on a PC not necessary to connect to live hardware as it is the case with many systems. When the program is ready for on-site testing, connect it to a live panel and download the T3000 software. Programming can be done remotely over the network and modem connections as well. The network system is very flexible and economical for the installation.

T3-TB

T3 Series Bacnet Programmable Controller

Specifications

| | |
|----------------------------|---|
| Industry Standard | Bacnet & Modbus Protocols |
| Control Basic Programs | 16 |
| User screen displays | 16 |
| User variables | 128 |
| Schedule & Holidays | 8 Weekly Routines, 4 Annual Routines |
| PID Controllers | 16 |
| Passwords and Users | 8 |
| RS485 Sub Baudrates | 9600 Thru to 115k |
| RS485 Main Baudrates | 1200 - 921600 |
| Main CPU Capacity | 512K Flash/ 512k Ram |
| Highly Configurable | Any Combination of Input/Output Cards Totaling Up to 64 Points |
| Digital Output | 5A/30VAC, 1A/30VDC |
| Analog Output | 0-10V |
| Universal Input | Thermistor, 0-10V, 0-5V, 0-20mA |
| Mechanical Relays | 2A, 24VAC/DC |
| Diagnostic LEDS | Hands Off Auto Switches |
| SD Disk Slots | Trend Logs, Alarms, Graphics |
| Ethernet Ports | Bacnet & Modbus Supported Simultaneously |
| RS485 Ports | 2 |
| USB Ports | T3-BB, T3-LB |
| RS232 Ports | T3-BB |
| Hardware Options | Several Optional Modules are Available to Support Zigbee, Wifi, 1k Pt Sensor Inputs |
| Wifi Security | WEP/WPA-PSK/WPA2-PSK |
| Operating Temperature | -30 to 70 Celsius (-22 to 158 Fahrenheit) |
| Maximum Power Consumptions | T3-BB : 10W , T3-TB : 6W |
| Case Color | Black |

T3 Series Bacnet Programmable Controller

Specifications

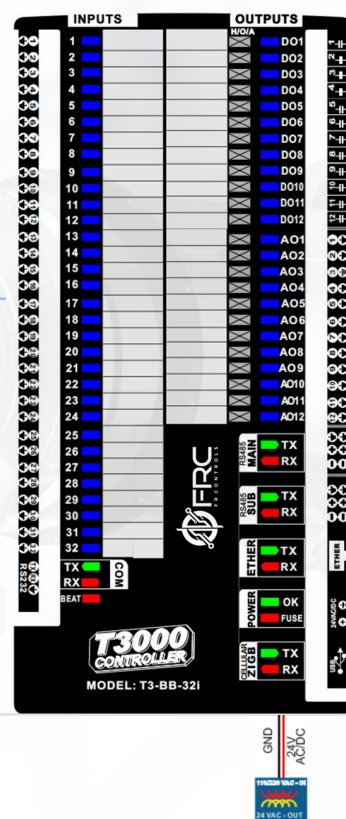

- * Surge-protected Universal Inputs with 12-bit resolution
- * UL listed ABS enclosure with rubberized texture creates a high end feel.
- * Software configure the I/O ranges with the free T3000 software or by writing to the registers with your own software.
- * Each output has a hand-off-auto switch for easy troubleshooting and overrides.
- * Each I/O as well as the RS485 connections have a separate screw terminal, there's no need to gang two wires under one terminal for any of the terminations.
- * High/Low speed input pulse counters
- * Communication methods are RS485, Ethernet, USB, Zigbee but it can, at the same time, support Modbus and Bacnet.

Sensors

Humidity and Temperature Transmitter with Waterproof Connector

Humidity & Temperature transmitters are designed for environment monitoring and controlling in industrial, commercial and other buildings. These transmitters can be used for indoor air temperature and humidity monitoring in various industrial plant, clean room, lab, machine room, office and commercial building, airport, station, library and stadium. The modbus interface is documented and integrator friendly. They also have transducer outputs for connecting as analog inputs to all popular control systems. Various models are available: Duct Mount, Wall Mount, Room Mount and 2 meter cable.

BACnet MS/TP and Modbus RTU protocols

HUM-C1

Humidity and Temperature Transmitter with Waterproof Connector Specifications

| | |
|---------------------|---|
| Power | 15V to 24V AC or DC, +-10% |
| Current Output Load | < 500Ω |
| Display | LCD Screen for Wall Outdoor/ Room Mount and Duct Mount |
| Display Resolution | 0-1 Celcius, 0.1%RH |
| Temperature Limit | -30 to 70 Celcius, 0-95% RH (Non Condensing) |
| Plastic Housing | Flammability Rating UL94HB |
| Connector | UL File E365137, Vol 1 |
| Protection | IP65, Outdoor Rated for Duct and Wall Mount Models; IP30 for Room Mount |
| Filter | Sintered Stainless Steel, 60μm |

| | Relative Humidity | Temperature |
|---------------|----------------------------------|--|
| Sensors | Capacitance Polymer | 10k internal |
| Range | 0 to 100% Non Condensing | -30 to 70 Celcius (-22 to 158 Farenheit) |
| Output | 4-20mA, 0-5V or 0 to 10V, RS 485 | 4-20mA, 0-5V or 0 to 10V, RS 485 |
| Accuracy | +/-2% @ (0-90%) | +/-0.2Celcius @ 5-6 Celcius |
| Hysteresis | < +/-1% RH | |
| Response Time | <10s | |
| Drift | <0.5% RH/year | |

Humidity and Temperature Transmitter with Waterproof Connector

Specifications

- High performance digital sensors and circuits, ensure accurate measurement and temperature compensation
- Good long term stability and reliability
- 100% field changeable sensors, no recalibration needed
- Fast response
- Multiple output signals selectable: 4-20mA, 0-5V or 0-10V
- Display in degrees Fahrenheit or Celsius (connection to Modbus)
- HUM-C is same as HUM-W but with extended cable to connect the sensor
- Featured as pluggable sensor pipe
- Dew point and enthalpy can be configured by register list
- BACnet MS/TP and Modbus RTU protocols over RS485, with an ethernet port.

| Accuracy | + -2% @ (0-90%) | + -0.2Celcius @ 5-60 Celcius |

Thermostat Tstat10E

Tstat10 Bacnet programmable controller is a low cost high performance programmable controller. With an I/O configuration, it can be extended through external I/O modules to form a complete building automation solution. There are five relays and two analog outputs as well as 8 universal inputs. These i/o can be configured using the free software. There are more than 300 settings with many options for each of the settings so its possible to configure these devices for most any application. Once the unit is configured, save the config file for copying to other controllers and backing up project settings. Options are available for occupancy sensor, zigbee, and humidity / enthalpy. Supports Bacnet MSTP and Modbus RTU for the RS485 model.

Wifi version supports Bacnet IP and Modbus IP

Tstat10E

Tstat10E

Specifications

- Software configure the I/O ranges with the free T3000 software or by writing to the registers with your own software
- Universal I/O can be configured for nearly any sensor, no jumper settings required
- Well documented register list for easy integration with other systems.
- 8 universal inputs for external temperature sensors, contacts, etc.
- 5 relay outputs, each rated at 12~24vac, 2 amps
- 2 analog outputs, 0-10V @ 100ma.
- Color LCD display with scroll bar.
- Each I/O as well as the RS485 connections have a separate screw terminal
- Clock with infinite life supercap battery backup.
- Supports Modbus RTU and Bacnet protocols simultaneously.

Tstat10E

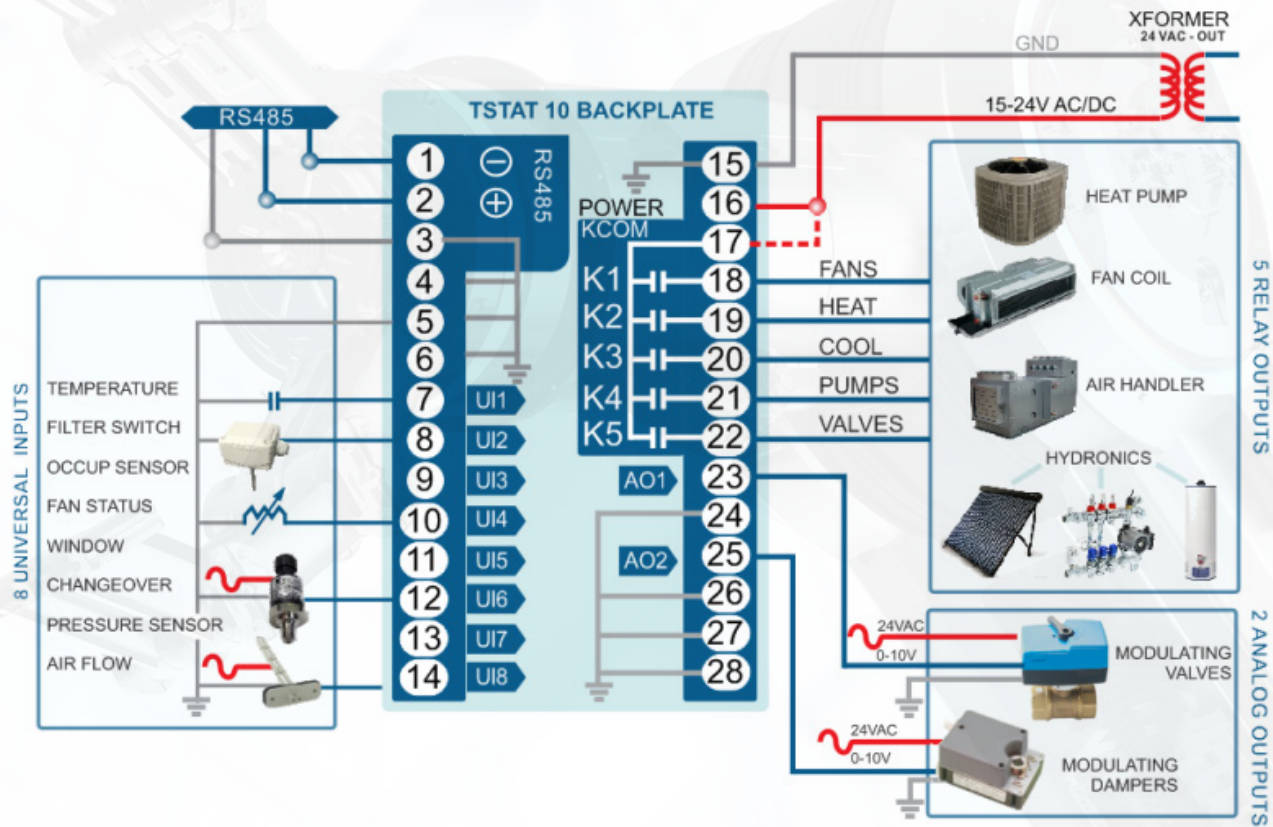

Specifications

| | |
|---------------------|--|
| Outputs | 5 Relay Outputs, 2 Analog Outputs 10V@100mA |
| 8 Universal Inputs | 10k Therm, contacts, 4-20mA, 0-5V, 0-10V |
| Operating Range | -30 Celcius to 70 Celcius / 0 to 99% Relative Humidity |
| Supply Voltage | 12 to 24 VAC/VDC +- 20%, 50-60Hz |
| Power Consumptions | 100mA at 12VDC |
| Relay Contacts | 5 relays, 2A @ 24VAC UL File : E169380 |
| Plastic Housing | Flammability rating UL94 file E56070 |
| Enclosure Rating | IP31 |
| Protocols | Bacnet MSTP and Modbus RTU |
| Baudrate | 9600, 19200, 38400, 57600, 115200 |
| Temperature Sensors | 10K Thermistor +-0.5 Celcius |
| Setup Software | Free, No Licensing, Open Source |
