

# Doctel@School

# A Complete

# Healthcare Program

# for Schools

Unleashing health potential through smart technology, personalized care, and comprehensive wellness programs designed specifically for students.

# The Critical Need for Student Healthcare

**76%**

Health Conditions

School children identified with medical conditions in 2023 survey

**47%**

BMI Issues

Students with BMI outside healthy range

**59%**

Vision Problems

Students with eye or vision issues requiring attention

Modern students face academic pressures with limited time for fitness. Schools must take initiative to implement comprehensive health programs addressing sedentary lifestyles and emerging health risks.

# Our Mission & Approach

## Healthcare as a Birthright

Doctel maximizes health potential for every child through user-centric, cutting-edge diagnostic and telehealth solutions. We partner with schools to reshape the future generation.

Parents demand more than academics—they expect clear communication, additional resources, and collaborative solutions to larger challenges.

"Our team comprises seasoned professionals from healthcare, medicine, physical education, and management—delivering exemplary programs that improve each student's performance."

# Comprehensive Program Components

## Disease Prevention

Communicable disease screening and prevention protocols

## Health Screening

BMI, visual acuity, hearing, dental, and anemia assessment

## Nutrition Services

Personalized dietary plans and nutritional reports

## Fitness Programs

Tailored physical activity and wellness initiatives

Additional services include learning disorder assessment, behavioral problem support, basic medicine kit, health report cards, and referral services to Doctel's panelist hospitals and diagnostic centers.

# LifePulse Station: Revolutionary Health Technology

Our innovative LifePulse station conducts 100+ medical tests, specially curated for comprehensive student health assessment.

## Body Composition

BMI, body fat, muscle mass, bone mass, protein, hydration, metabolic age, visceral fat analysis

## Vital Signs

Blood pressure, pulse rate, oxygen saturation, temperature, ECG 12 Lead, cardiovascular assessment

## Diagnostic Tests

Blood glucose, hemoglobin, malaria, hepatitis, dengue, typhoid, COVID-19, and more

## Specialized Screening

Vision tests, derma-scope, oto-scope, intra-oral camera, spirometer, digital stethoscope

# Our Unique Strength

## Measure Parameters

Track health metrics over time with precision

## Analyze Data

Process individual health patterns and needs

## Personalized Plans

Create tailored dietary recommendations for each student

- Our USP:** We cannot change sedentary lifestyles, but we can influence nutrition. After several iterations with 20+ schools and 40,000+ students, we've perfected personalized diet plans based on measured health parameters. **User-centricity is at our core.**

Our unique mix of business acumen, grassroots operational presence, and trusted healthcare provider network creates exceptional value for students and schools alike.
