

Press Release:

Global BEV Consultancy Mayhew Performance LTD. Welcomes Jennifer Brkljacich to Support Strategic Growth

SUDBURY, ONTARIO, July 19, 2023 – Battery Electric Vehicle (BEV) consultancy Mayhew Performance LTD. (MPL) is pleased to welcome Jennifer Brkljacich to the team as Senior Consultant Maintenance Analyst and Operational Excellence.

Jenn is an industrial, and master licensed electrician with over 20 years of proven operational mining experience and an impressive track record in developing and implementing e-learning training systems. She holds a certificate in Electrical Technologist, Electronic Technician Data Scientist.

In her previous role as Operational Readiness Manager at Sandvik, Jenn Brkljacich developed operational readiness and mine readiness programs for the transition from diesel to BEVs. These programs included change management, risk assessments, training, workplace electrical safety, and electrical PPE.

Before that, she spent 20 years at Vale, supporting their Power and Global Energy Department in positions of increasing responsibility and leadership. During that time, she became INCO's first globally licensed female electrician.

Her combination of expertise in practical electrical and mining operational contexts and in leadership and training makes her an outstanding fit for MPL's culture and growth strategy.

Quoted by Founders Mike and Nicole Mayhew

"We feel incredibly privileged to have Jennifer join the Mayhew Performance family. Her impressive range of hands-on operational experience and specific expertise in operational readiness and training will support key aspects of our business growth. We look forward to having her onboard as we usher in new aspects of our business to better serve our clients globally."

About Mayhew Performance

Mayhew Performance LTD. (MPL) specializes in battery electric vehicles and renewable energy and provides technical and operational expertise to deliver exceptional results under tight deadlines, all in close collaboration with global mining clients. Founder Mike Mayhew is a subject matter expert in battery technology, operational readiness, implementation, and performance with over 30 years of mining experience. Most notably, he was a pioneer in developing the first 40-tonne battery electric haulage truck from design to site implementation. This unique and practical expertise has enabled MPL to establish a proven track record of delivering safe production on schedule—and most importantly—on budget.
