

This chart can help you choose which fish to eat, and how often to eat them, based on their mercury levels.

What is a serving? As a guide, use the palm of your hand.

For an adult 1 serving = 4 ounces

Eat 2 to 3 servings a week from the “Best Choices” list (OR 1 serving from the “Good Choices” list).

For children, a serving is 1 ounce at age 2 and increases with age to 4 ounces by age 11.

If you eat fish caught by family or friends, check for [fish advisories](#). If there is no advisory, eat only one serving and no other fish that week.*
