5. As a result of the session, I initiated the following action:

I plan on using several items from the workshop in my classroom this year.

I will create activities to promote early reading and writing success.

the information that I received to the best of my ability

This was one of the best PD's I have been to in a long time.

Prepare differentiated lessons. Engage students in daily phonological awareness and phonics activities. Teach comprehension strategies daily through direct teaching of vocabulary, daily readalouds, and developing of schema for my students. Teach and incorporate writing across the content areas.

Share with coworkers the instructional techniques used during this training.

More balanced reading strategies

Plan on using some of the applications in my classroom to help students improve their English acquisition skills

I found many interesting activities to implement in my classroom, to help my students in the writing process.

1

Average: **4.95**

Free Response

5. As a result of the session, I initiated the following action:

Use hands on materials to teach reading.

I am working deeply on my lesson plans.

There were many pieces that I will implement this year. I've separated many of the handouts to share with my team.

I obtain information that I will apply to my teaching as well as different documents that I will be using with my students.

Great handouts that can be used immediately.

A better working knowledge of literacy instruction in the kindergarten classroom setting

Change my work stations to target specific skills
