

PowerStages: Turns Entities into Operational Forms.

ABOUT B&B INFORMATION TECHNOLOGIES SERV./POWERSTAGES:

We are expert on Dynamics 365 Ecosystem. Our individuals dedicate their skills to Microsoft technologies more than 20 years and signed numerous successful solutions and deliveries in the market worldwide. We focus on specific solutions for certain markets so our solutions help to customers to utilize their daily requirements in Dynamics 365 and Power Apps effectively.

WHAT WE OFFER

The solution operates custom entities as forms in order to define submit, approve, reject actions through a flow. Our solution makes form operations seamless, configurable and maintainable. PowerStages defines form centric approach to organizations.

Our solution helps our customers to keep form operations in Dynamics 365 easily. Transforming paper-based form into Dynamics 365 allows organizations to use power of Microsoft common data model and other Azure Services with less effort. Thus, Customers can easily use PowerApps, Power BI even Azure Artificial Intelligence services as a result of transformation.

You can define conditions and rules to configure process flows (sender-recipient pair), operations (submit, reject, approve), items appearance (invisible, read-only, mandatory), notification and advanced logging for your forms. Apart from that You can easily extend the solution with your specific requirements via Dynamics 365 enhanced customization capabilities.

Organizations have numerous type of forms such as application, registration, subscription, appeal, incident etc. with internal or external dependencies. PowerStages meets form requirements in Dynamics 365 product family. Solution appends one layer top of the digital form to setup submission direction, items visibilities, notifications and logging

Transform your custom entities in Dynamics 365 into operable forms.

Mark the custom entity as “Staged” then just add necessary conditions and rules to finalize conversion.

TALENT

Extend your virtual team and coordinate faster with a consolidated view of team members, activities and responsibilities.

MARKETING

Gain end-to-end visibility by connecting data from external markets, social and legacy sources

WHY MICROSOFT DYNAMICS 365

Modern applications that deliver new experiences and connect with a businesses' existing systems to allow organization to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes that enables business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers actionable insight. Data in the new world includes social, relationship and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment that enables change. The right solution establishes a data, communication and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.
