SightseeRM: Core business of tourism sector are now in line with power of Dynamics 365.

Microsoft Dynamics 365

ABOUT B&B INFORMATION TECHNOLOGIES SERV./SIGHTSEERM:

We are experts on Dynamics 365 Ecosystem. Our individuals dedicate their skills to Microsoft technologies more than 20 years and signed numerous successful solutions and deliveries in the market worldwide. We focus on specific solutions for certain markets so our solutions use proper terminology for atomic sectors like Tourism agencies with SightseeRM.
WHAT WE OFFER

Our solution handles:
- Tour
- Flight
- Accommodation
- Excursion Activity
of the tourist for travel agencies or any other parties that are related with tourism sector like ground services in order to track history of the customer travel by leveraging Dynamics 365 CE. Thus, We define customer centric approach to the sector.

Our solution transforms sectoral core business into customer centric data and aligns them with common data model of Microsoft so other Azure Services can be utilized with less effort by tourism sectoral players. Thus, Companies can easily use Power BI even Artificial Intelligence services of Azure and much more for sure….

You can define tour for a specific period and add customers, flights, accommodations main details and bind activities including excursion.
You can easily extend solution with your specific requirements via Dynamics 365 enhanced customization capabilities.

Tourism sector expectations are fully met by Dynamics 365 product families as well as Azure services so you can easily track tourists experience about their holiday and can help them in case of any issues at airport, hotel, transfer …

If you are looking turn key solution for your business as a travel agent or involving with transfer

as part of ground services, just buy and then start using it.

WHY MICROSOFT DYNAMICS 365

Modern applications that deliver new experiences and connect with a businesses' existing systems to allow organization to digitally transform their way. Applications that use mixed **reality**, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes that enables business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers actionable insight. Data in the new world includes social, relationship and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment that enables change. The right solution establishes a data, communication and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.
