- (1) Preliminary metal sales and deliveries for gold include 409 ounces earned from the RDM NSR Royalty (cash settled).
- (2) The Company's royalty and stream revenues are converted to gold equivalent ounces by dividing the gold royalty and stream revenues for a specific period by the average realized gold price per ounce for the same respective period. Silver earned from royalty and stream agreements are converted to gold equivalent ounces by multiplying the silver ounces by the average silver price for the period and dividing by the average gold price for the period. The gold equivalent ounces attributable to Nomad include the revenues, net of cost of sales from the Bonikro gold stream from January 1 to May 27, 2020, reflected in the consolidated statement of cash flows, investing activities as Cash acquired for the three-month periods ended June 30, 2020.
