

Freightways has a solution to meet your commercial logistics and warehousing needs. We have an experienced team who can handle any kind of goods from handballs to pallets, vehicles and abnormal loads.

If you don't have sufficient space on your premises, we can store your goods, and pick, pack and deliver them to your preferred destination. We offer competitive rates on long and short term storage, providing an affordable alternative to quay storage.

Freightways will sort your cartons, re-label and re-palletise your goods, unload and reload your containers or vans.

And when you're ready for your goods to be moved on, we will provide an onward delivery service through our own vehicle operation or our Palletforce pallet network.

We'd love to hear from you
