Driving your business forward

The full package

At Freightways we pride ourselves on our unloading/loading and warehousing skills. We have an experienced team that can handle any kind of goods from handballs to pallets, vehicles and abnormal loads.

We offer many different and secure storage options once your goods are safe with us. We can personalise your quote to meet your individual needs.

When you're ready, we will deliver your items around the UK or Europe using our dedicated vehicles or Palletforce Network. We will pick and pack, relabel, palletise or wrap your items if required.

Exceptional pallet network

Nationwide service

We are proud to partner with Palletforce, the UK's leading pallet network. Palletforce has over 120 depots across the UK, and Europe's largest SuperHub. Over the last 20 years Palletforce has delivered nearly 50 million pallets of freight for customers of all sizes.

Local expertise

Freightways is your local depot for pallet movements. We will collect your goods from any location in the UK and Europe, and transport it using the trusted Palletforce network. Why not ask us for a quote?

Container haulage

Freightways offers full UK and International haulage, from a single pallet, through to a full container load. Every port in the UK is covered, whether that be Southampton, Felixstowe, London Gateway, Tilbury, Bristol or Liverpool.

We also serve the main rail heads in the UK.

Our network of vehicles ensures your cargo is delivered from the port or loading location to its destination within the allocated time period. Our vehicles are satellite tracked so you can find out where your cargo is at any given time.
