Nicky's Gardens of Hope (Nicky's Gardens), recently announced the appointment of Leah Moehlig to the Board of Directors.

We are very pleased that Leah Moehlig has joined our Board of Directors. Leah has various experiences within the investment industry, with a focus on sustainable investing. Leah's background and focus on environmental, social and governance (ESG) factors will be invaluable in the development of Nicky's Gardens of Hope, a residency for Autistic and intellectually developmentally disabled (IDD) adults. Leah's experience will be even more critical in the development of Nicky's Garden's Wall Street fundraising efforts, developing Impact Investment opportunities as Nicky's Gardens develops incubator businesses in sustainable energy, real estate, travel, and food services.

"With Leah's experience and guidance, we will be able to present new investment opportunities in these virtually untouched sectors. Revenues from these projects will pay for the support of our residency, and the building of many more Nicky's Gardens of Hope! This will turn my dream of safe dignified homes for Autistic and ID Adults into reality!" – said Adriana Piltz, Founder, CEO & Chairman of Nicky's Gardens of Hope.

Ms. Moehlig is currently an investor at a Global bank in the public equity space and is focused on sustainable investment opportunities and the integration of ESG factors into investment theses. She is also a Master's Degree Candidate, Sustainable Studies at Harvard Extension School. She is an active volunteer at Gigi's Playhouse NYC and is a member of the iMentor Alumni Council.

Ms. Moehlig has previously served as a Senior ESG Research Analyst at Calvert Research & Management, was an Equity Research Analyst at GE Asset Management, graduated from Michigan State University, and is both a Chartered Financial Analyst and an FSA Credential Holder.

About Nicky's Gardens of Hope
