About OverDynamics

OUR STORY

MISSION

PRODUCTS AND SERVICES

Our Story

- In 1996, OverDynamics' journey began with one of the first SAP implementations in Brazil, where our founder was part of a pioneering team at a major Consumer Packaged Goods (CPG) company. This early experience sparked a passion to not only implement SAP but to continuously innovate and improve business processes with new technologies.

- As the world of enterprise technology evolved, OverDynamics became a trusted partner in helping businesses transform. After several successful SAP implementations across diverse countries and cultures, our team has gained deep insights into the unique challenges and opportunities that different regions and industries face. This has enabled us to implement SAP and related technologies in ways that dramatically improve business processes and create lasting value for our clients.

- Today, with consultants in the USA, Canada, and Brazil, OverDynamics is proud to serve its customers with state-of-the-art technology solutions tailored to their specific needs. Whether it's ERP systems, cloud technologies, or process optimization tools, we work closely with businesses to ensure that our solutions are not only effective but also aligned with their language, culture, and strategic goals.

- At OverDynamics, we are driven by a commitment to excellence, a passion for continuous improvement, and a relentless focus on delivering business results. We are here to help our clients navigate the complex digital landscape and realize the full potential of their enterprise technologies.

Our Mission

At OverDynamics, our mission is to deliver innovative technological solutions that integrate seamlessly, improve efficiency, and exceed business expectations

Our Products and Services

SYSTEMS   PROJECTS   SERVICES

Systems

ALL STARTED WITH SAP, BUT MANY OTHER SYSTEMS SURROUNDING IT ARE NOW PART OF OUR PORTFOLIO ...
