To Whom It may Concern

Dr Jennifer S L Lutin – letter of support

Jennifer has been known to our museum service for some years and has worked with us very successfully. The most recent was in the last 18 months when she collaborated with our Learning and Engagement Officer to provide a series of fantastic workshops and experiences (The Planetarium Experience, Bronze Age Live! and Science at the Museum – the Autumn equinox stargazing and weather watching, here at Low Parks Museum and in our nearby iconic building Hamilton Mausoleum.

The Planetarium was a very exciting new idea for us and Jennifer worked with us to come up with ways to make it happen in a building with some challenges and obstacles. It worked wonderfully well.

The experiences proved extremely popular and brought a new and interesting dimension to our learning provision at the museum. We are so pleased she has moved to a new area of working to further develop her wonderful talents, but, selfishly, sorry we now don't have her all to ourselves.

Jennifer's creative enthusiasm and infectious interest in all she does is something to be treasured, valued and supported in these very challenging times, and we wish her very well in all she does.

Yours faithfully,

Sharon Paton
