Groundhog Excavation is a family-owned and operated company with a mission to provide an all-encompassing excavation service. We have participated in a wide range of excavation, grading, demolition, and landscaping projects. With the experience of multiple generations of engineers, we have completed projects of varying sizes and operational stages with traditional methods as well as modern. We do everything from roads and ditches, to ponds, septic systems, drilling and blasting, material hauling, and more. We have worked as the only contractor on a site as well as in conjunction with larger companies and multiple contractors. Everything you need from your contractor, Groundhog will deliver.

Snowed in? We'll dig you out.

Roads and Ditches

Custom Hauling

Ditches & Roads

Groundhog Mining and Milling Co. is experienced with working on ditches and roads. Depending on the season, your needs may vary; whether you need plowing or grading, drainage repair or installation, or need a road constructed, we have the equipment and experience you will depend on for every job.

Equipment for every job.

Custom Hauling

If you need to haul an oversize load of equipment, material, or resources, we can accommodate you. We will secure the permits and licenses required, and provide the transportation and operator. Contact us today to schedule your custom haul.

Demolition & Foundations

No matter what size project, Groundhog has the equipment and capabilities to accomplish it. We'll assist you in everything: obtaining permits, passing inspections, excavating the structure or area, hauling away debris, reclamation of the land for your next use, prepping, leveling and pouring a new foundation, the final clean-up of the site, and whatever else you need done. We're committed to safe and exceptional results.

Fire Control Assist

Landscaping, Ponds & Aquatics

We can install, reinforce, redirect, move, and more, your ponds, culverts, aquatic features, etc.

Septic Systems

We have the experience and knowledge to install, move, or replace your septic system. We will verify an accurate and professional install, beginning to end, to keep your septic system sound and running smoothly.

Underground pipes

Drilling-Blasting

Rock-fall mitigation is a necessity in some areas, whether to improve safety and stability or protect property and habitats. With our experience and background in mining, our drilling-blasting services are exceedingly thorough.
