Market Update

A few main lines are starting to shorten up as local season produce is coming to an end, and new Queensland season is only trickling through, which is causing a rise in price of a few lines.

This should be for a number of weeks as a good supply from Queensland should start coming through the market. As we are now heading towards winter, the availability of bunch lines and edible flowers will ease up as the cold nights become more regular.

Produce in Great Supply, Quality & Well-Priced

- Mandarins
 - Beans
- Rockmelon
- Sweet Corn
- New season apples
 - Fennel

Produce in Short Supply & Low Quality

- Mushroom
 - Eggs
