

The Scoop – November 2022

From the Desk of Pastor Sadler

REJOICE!

Seasons change. Leaves change their color and fall to the ground until many trees appear barren. But in the midst of the forest stands the evergreen that never changes its color. So is the love of God, his mercy and grace toward all humanity. It is important to rejoice even in the midst of challenges, change and crisis because our help and hope is in Christ Jesus.

The prophet Habakkuk reminds us to rejoice:

“Though the fig tree does not bud and there are no grapes on the vines, though the olive crop fail and the fields produce no food, though there are no sheep in the pen and no cattle in the stalls, yet I will rejoice in the LORD, I will be joyful in God my Savior.” Habakkuk 3:17-18 (KJV)

National Diabetes Awareness Month

November is National Diabetes Month, a time when communities across the country team up to bring attention to diabetes. This year's focus is on managing diabetes by building your health care team.

Diabetes is a disease that occurs when your blood glucose, also called blood sugar, is too high. It affects about 37 million Americans, including adults and youth. Diabetes can damage the eyes, kidneys, nerves, and heart, and is linked to some types of cancer. Please click on links below to learn more about diabetes.

For more information, visit the American Diabetes Association website at <https://diabetes.org/> More information can also be found on our website in the [Health Corner](#). If you have any questions concerning diabetes, prevention, treatment or would like to have your blood glucose checked via a glucometer at church please let me know.

Alzheimer's Disease Awareness Month

Alzheimer's disease is a progressive brain disorder that impacts memory, thinking and language skills, and the ability to carry out the simplest tasks. Alzheimer's disease is the most common cause of dementia. Dementia itself is not a disease, but a term used to describe symptoms such as loss of memory, loss of judgment and other intellectual functions. Alzheimer's disease can cause dementia. More than 6.2 million Americans are currently living with Alzheimer's disease.

Facts:

- Alzheimer's is deadlier than breast cancer and prostate cancer combined
- The disease is most prevalent in women and Black Americans
- 11 million Americans act as unpaid caregivers for a loved one diagnosed with Alzheimer's
- Fewer than 1 in 5 Americans are familiar with mild cognitive impairment, which can be an early stage of Alzheimer's
