

Securing your lockable cover clips

Step 1:

Keep the little plastic keys that arrive with the pool cover, however throw away the screws that are supplied with the cover as these are not required. Instead use the screws supplied by Pure Plunge with your welcome letter.

Step 2:

Place the pool cover on top of the pool ensuring the skirt is over the pools edge all the way around and is a snug fit.

Step 3:

Detach the body of the buckle from the clip and place it upside down aligned with the top seem of the pool and mark each of the holes with a permanent marker. Using the stainless steel screws supplied by Pure Plunge, secure the buckle to the pool using a cordless drill with appropriate size drill bit. Ensure the buckle is straight and inline with the pool cover strap.

Step 4:

Repeat steps for all bucks and clip and lock each buckle when not in use.

Important:

Please ensure you only use Dan's Premium screws 6g x 12. To avoid confusion, throw away the screws that come with the pool cover, however remember to keep the plastic keys.
