

CAREER TRAINING

OVERVIEW

1

ASSIGNED MENTORS

We pair each student with a MAP Mentor that has expertise in their desired industry to successfully guide them through the recruitment process.

2

INDUSTRY EXPOSURE

We work throughout the year to prepare students for interviews with partner-companies and others. In the process, we introduce them to senior stakeholders that educate them on different lines of business, job functions, and observations regarding company culture.

3

PROGRAMS

Each MAP Fellow co-moderates a panel discussion or workshop during the year to network with professionals from the MAP family, learn more about specific industries, and develop new technical skills.
