Engineering Cisco Meraki Solutions (Part 2)

ECMS2

Course Overview

The course, Engineering Cisco Meraki Solutions Part 2 (ECMS2) v1.0 elevates your knowledge of Cisco® Meraki™ technology. In this advanced technical training course, you'll learn how to plan for network deployments and integrations using the Cisco Meraki platform. Through practical hands-on instruction and experiences, you will learn how to operate Meraki networks and troubleshoot complex network incidents using the Meraki Dashboard and analytics. You will also learn how to design Meraki architectures for redundancy, high-density, and scalability by implementing comprehensive Meraki product features to meet design objectives.

This is the second of two courses that prepare you to take the Cisco Meraki Solutions Specialist certification exam.

Objectives

Upon completing this course, the learner will be able to meet these overall objectives:

- Plan for network deployments and integrations using the Meraki platform
- Design Meraki architectures for redundancy, high-density, and scalability
- Implement comprehensive Meraki product features to meet design objectives
- Operate Meraki networks and troubleshoot complex network incidents using the Meraki Dashboard and analytics

Prerequisite Knowledge

Before enrolling in the ECMS2 course, it is highly recommended that you have already attended and completed the ECMS1 course before attending this training.

You should also have general networking understanding, Meraki-specific proficiency, and knowledge.

Real skills for real engineers
