Cisco Intersight

INSIG

Course Overview

Cisco Intersight (INSIG) v2.0 is a 2-day virtual or classroom instructor-led training that covers architecture, configuration and operation of Cisco Intersight, and is designed to serve the needs of engineers seeking to understand the capabilities of Cisco Intersight for managing data centers from a single management platform. You will learn how to use either the SaaS or on-prem version of Cisco Intersight to analyze, simplify, and automate environments in more advanced ways than the prior generations of tools.

Objectives

- Upon completing this course, the learner will be able to meet these overall objectives:
- Describe Intersight Managed Systems such as Cisco UCS, Cisco Hyperflex, Pure Storage
 - Describe benefits and use cases of Cisco Intersight
 - Understand differences between Cisco Intersight SaaS, virtual appliance and air-gap appliance
 - Setup Cisco Intersight account and claim devices to Intersight
 - Setup Role Based Access Control (RBAC), organizations, and generate API keys and setup IP access management to Cisco Intersight
 - Explain and implement various features of Cisco Intersight
 - Explain differences between Basic, Essential, Advantage and Premier licensing

Prerequisite Knowledge

- To fully benefit from this course, you should have the following knowledge and skills:
- Understanding of server system design and architecture
 - Familiarity with Cloud concepts
 - Familiarity with converged and Hyper-Converged infrastructure

Real skills for real engineers
