Cisco Stealthwatch Network

SNO

Course Overview

The Cisco Stealthwatch Network (SNO) v7.1 course focuses on using Cisco Stealthwatch Enterprise to complete both “proactive” and “reactive” activities required to maintain network health. The course content also includes configuring the Stealthwatch System to monitor your network’s health as well as providing helpful workflows that allow you to react quickly to common network operations issues.

This course will help you to generate reports about network utilization and determine the cause of network issues.

Objectives

Upon completing this course, the learner will be able to meet these overall objectives:

- Explain what Stealthwatch is and how it works
- Use Stealthwatch to proactively monitor your network
- Use Stealthwatch to react quickly to common issues facing network operations teams

Prerequisite Knowledge

It is strongly recommended to complete the Stealthwatch Foundations training prior to taking this course.

Real skills for real engineers
