Cisco Stealthwatch Security

SSO

Course Overview

The Cisco Stealthwatch Security (SSO) v7.1 course focuses on using Cisco Stealthwatch Enterprise from the perspective of a security analyst. The overarching goal of the course is to use Stealthwatch to investigate potential security issues and make initial determinations of whether to proceed with a more thorough investigation or to move on to the next potential threat.

This course will help you to develop workflows for security investigations and understand how events and alarms are produced in the system.

Objectives

Upon completing this course, the learner will be able to meet these overall objectives:

- Describe how the Stealthwatch System provides network visibility through monitoring and detection
- Describe the goals of using Stealthwatch in the proactive and operational modes
- Define basic concepts of investigation and detection of potential security issues using the Stealthwatch System
- Complete workflows to identify indicators of compromise in your network
- Describe alarm types and alarm notification within Stealthwatch
- Explain the utility of maps in the Stealthwatch System
- Describe how the Stealthwatch System contributes to successful incident handling

Prerequisite Knowledge

It is strongly recommended to complete the Stealthwatch Foundations training prior to taking this course.

Real skills for real engineers
