# The Network Intuitive for Field Engineers (4 Day)

## TNIFE4D

## Course Overview

Cisco is rewriting the networking playbook with an intent-based network, powered by Cisco Digital Network Architecture (DNA), that will fundamentally change your business.

The objective of The Network. Intuitive for Field Engineers (TNIFE4D) training is to ensure you are confident in installing and configuring intent-based networks, built on Cisco DNA.

The TNIFE3D training is a 4-day instructor-led course that provides an information on how to automate and assure services within enterprises using Cisco DNA. The training provides information on how to use Cisco DNA Center, how to deploy Cisco Software-Defined Access (SD-Access) using Cisco DNA Center and Cisco Identity Services Engine (ISE), and how to detect and mitigate threats using Cisco StealthWatch and Encrypted Traffic Analytics (ETA) and how to deploy SD-WAN

## Objectives

Upon completing this course, the learner will be able to meet these overall objectives:

- Cisco DNA Center
- Cisco SD-Access for Wired and Wireless
- Cisco ISE
- Cisco StealthWatch and Encrypted Traffic Analytics (ETA)
- SD-WAN

## Prerequisite Knowledge

To fully benefit from this course, you should have the following knowledge and skills:

- Basic understanding of network routing and switching principles, equivalent to the Cisco CCNA certification level
- Basic understanding of Cisco ISE and 802.1x operation
- Basic familiarity with SD-Access concepts
- Basic familiarity with SD-WAN concepts

Real skills for real engineers
