Cisco Video Infrastructure Implementation

VII (500-710)

Course Overview

The Cisco Video Infrastructure Implementation (VII) is a 5-day instructor-led course that will provide you with the necessary knowledge and skills to implement a complete Cisco TelePresence solution, including TelePresence endpoints, integration of premise with cloud solutions, meeting solutions, and management software. It describes Cisco business TelePresence solutions and enables students to implement and troubleshoot basic and advanced TelePresence network solutions.

The course prepares you for the 500-710 - Cisco Video Infrastructure Implementation exam.

Objectives

Upon completing this course, the learner will be able to meet these overall objectives:

- Define Cisco Business TelePresence Solutions components and architectures
- Implement Cisco TelePresence Video Communication Server (Expressway) for basic and advanced video networks

Prerequisite Knowledge

To fully benefit from this course, you should have the following skills and knowledge:

- Working knowledge of basic IP networking
- Knowledge of video conferencing and streaming fundamentals

Real skills for real engineers
