Dear Sheriff Hill,

I am making a Surety Bond claim against General Registrar Eric Olsen, for his failures to perform his official duties listed below. If he cannot meet the reasonable remedy proffered, I ask that you carry out your duties to remove his surety bond and remit proceeds from his bond which will make him ineligible to perform his duties.

In addition, because of on-going lawsuits from Election Machine Companies against various entities (Fox News, Mr. Mike Lindell, others), you must ensure all cast vote records and all other artifacts from the 2020 election be retained.

Violations/Failures to perform official duties

1. Gross negligence and failure to assure that voters on existing voting rolls are lawful voters
2. Gross negligence and failure to assure that new registrants from Virginia DMV Data base are lawful voters
3. Failure to exercise Articles 13 and 32 of the Hart Contract SBE-140324-HART Voting Machines, Equipment & Related Services in an independent, publicly transparent, 3rd Party audit of the software and operation of the machines to ensure all componentry is free of any communication capabilities, and there is proper legal accountability for all software updates, and recording/accounting of all resident data sets (to include ballot images), matching of reasonable sample size of ballot images and their recorded tallies with legally retained ballots, changes to data sets, and communication/data transfer (to include thumb drive and thumb drive data accountability) and log history with all off premise cloud storage and processing of voting data. It is incumbent as part of the express and implied duties of the Registrar, that Sworn Public Officials must be able to demonstrate an ability to conduct these activities to operate and protect Federally designated Critical Infrastructure (Election Machines and related equipment) independently and separate from the vendor.

Details on these failures to perform official duties are presented in Attachment 1

2019 FOIA of Jury Duty Rejections is Attachment 2

I thank you for your prompt attention to these matters.

V/R

Colonel (RET) John R. Mills
Director, NEIA
