TOKALEV Garnet

TOKALEV Garnet

Abrasives for Sandblasting & Waterjet cutting

#20-40	Applications
<p>SuperiorBlast: Our toughest blend for superior cleaning jobs on hard surfaces</p>	<ul style="list-style-type: none"> Removes high build-up coatings and / or heavy rust at a fast rate Provides ideal surface cleanliness that helps in superior adhesion for coatings Best suitable for heavy industrial maintenance
#30-60	Applications
<p>PrimeBlast: Our general purpose abrasive for standard everyday blasting jobs</p>	<ul style="list-style-type: none"> Removes thick coatings, mill scale, and / or medium to heavy rust Enables the surface preparation of stainless steel, aluminum and titanium, as well as etching glass Best suitable for general industrial maintenance
#80	Applications
<p>FineCut: Industry standard grade for all general purpose waterjet cutting</p>	<ul style="list-style-type: none"> Delivers a fine balance between superior cutting speed and optimum surface finish Uniformly graded particle sizes protects the equipments Ideally suited for wide variety of cutting applications including Stainless Steel or Aluminium to Granite
#120	Applications
<p>SuperfineCut: Our finest blend for high precision and minimum tolerance edge cutting</p>	<ul style="list-style-type: none"> Delivers high precision and versatile cutting speeds where narrow indents are required Provides smooth cutting experience for complex designs Ideally suited for thinner, softer, or brittle materials like marble, brass, plastic and ceramics.
