

A paint for every application

Sherwin-Williams manufactures a full array of interior and exterior coatings to meet virtually any project application.

**HIGH-QUALITY PAINT:
MORE FOR YOUR MONEY**

Higher-quality paint — even when priced higher — can save you money. Here's how: Say you need 20 gallons of exterior latex. A lower-grade paint at \$30 per gallon might offer a life expectancy of six years. A high-quality paint at \$45 per gallon might offer 25 years of service. By going with higher-quality paint, you save \$64 per year — a figure that still doesn't include labor costs or maintenance.
