

## About Us

For over 40 years, Jenner Engineering has delivered trusted machining and fabrication services across Mackay, the Bowen Basin, and the sugar industry. We specialise in CNC and manual machining, fabrication, repairs, refurbishments, and re-engineering of mining components and sugar rolling stock. Recognised as the region's expert in rolling stock refurbishment, we ensure safe, reliable, and sustainable performance for critical assets. Our strong quality management system, progressing toward ISO 9001 certification, underpins every project.

# What We Offer?

- CNC and manual precision machining
- Component manufacturing and refurbishment
- Rolling stock refurbishment
- Maintenance and breakdown services
- Rapid prototyping for new parts and equipment
- Environmentally responsible reworking and recycling

# Why Jenner Engineering ?

- Over five decades of machining expertise
- Exceptional customer-first service ethos
- Quick response and turnaround times
- Commitment to ESG compliance and carbon reduction
- Locally owned and community-integrated
- Proven environmental impact: our refurbishment work significantly reduces the carbon footprint of our clients' operations
- Active recycling of scrap metals, reducing landfill and raw material demand

“Both Colin & Gary have a world of knowledge. You can't buy experience like that. They are both professional and approachable. You won't go wrong.”

# Our Work

## Our Mission

We innovate with precision, solve complex metal challenges, and build a circular future. Through rapid, high-quality machining and a deep commitment to sustainability, we power regional industry, protect the planet, and put people first.

## Our Values

- Planet-First Thinking
- Roots in Community
- Excellence Without Compromise
- Customer-Driven Innovation
- Integrity in Every Action
- Solutions That Endure
- Empowered People, Inclusive Culture
