

# Got asset purchases lined up?

Use Asset Finance to spread the costs of your investments without interrupting cash flow.

If you're looking to buy something for your business but don't want to take a chunk out of your working capital, asset finance can be a great solution.

Asset finance will help you to purchase business assets like equipment, machinery and vehicles, and the cost of the item will usually be spread over the duration of its usable life. You'll pay the lender every month and at the end of the agreed period you will own the asset outright.

## Features of Asset Finance

- ☑ Spread the asset cost monthly.
- ☑ Offer collateral to secure the asset.
- ☑ Finance a broad variety of goods.
- ☑ Includes leasing, HP and refinance.
- ☑ Fund everything from tech to cars.

## Benefits of Asset Finance

- ☑ Finance almost anything.
- ☑ Preferential rates.
- ☑ Purchase vs. Lease options.
- ☑ Affordable monthly payments.
