

CYBER HUNTER TRAINING PROGRAM

Hands-On

No Prior Experience Necessary

Practical

Designed specifically for Law Enforcement professionals, this course teaches cutting edge tactics designed to give officers a strategic advantage in the detection, interaction, collection, and preservation of cyber evidence.

LEARN HOW TO:

- Investigate any case involving a digital device
- In real time, locate and track internet-enabled devices:
 - cell phones
 - computers / laptops / tablets
 - vehicles with Wi-Fi hotspots
- Analyze a target's Wi-Fi network to identify all connected devices and browsing activities
- Defeat challenges of a suspect using public Wi-Fi
- Analyze logs to link browsing activities
- Crack passwords – PDFs, Word documents, etc.
- Increase officer safety by remotely disrupting a target's network connectivity (e.g., Wi-Fi surveillance cameras)

WHO SHOULD ATTEND:

- Patrol Officers
- Detectives / Special Agents / ICAC
- Supervisors
- Investigative Support / Crime Scene Technicians

Students will be issued all equipment, resources, and training manuals used during training.
